RE: Hydrocarbon Barge Loading 2006 ERC Annual Report
Small Source Permit No. 0180-00186-03, Agency Interest No. 100581

To Whom It May Concern:

Williams Olefins, LLC (Williams) contracts barge loading of Debutanized Aromatic Concentrate and crude Butadiene products to Honeywell Specialty Chemicals (Honeywell) at the Honeywell loading dock in Ascension Parish at Mississippi River mile 187 AHP near Geismar, Louisiana. Williams began operating a marine vapor control system at this facility in October 2002 in order to reduce VOC emissions associated with the barge loading. This was a voluntary installation, not mandated by existing state or federal law or regulation.

Williams submitted a Louisiana Emission Reduction Credits (ERC) bank application and supporting documentation in February 2003. The provisions of LAC 33:III.613.B.2 require an annual ERC bank report. Williams is hereby submitting the attached Louisiana ERC Annual Report for the 2006 calendar year.

CERTIFICATION STATEMENT

I certify, under provisions in Louisiana and the United States law which provide criminal penalties for false statements, that based on information and belief formed after reasonable inquiry, the statements and information contained in this ERC Annual Report are true, accurate, and complete.

If you have any questions or require additional information, please contact Doug Badon at (225) 642-2114 or doug.badon@williams.com.

Sincerely,

Larry Bayer
