9	5/00	LDEQ
9-update	5/00	LDEQ
10	10/05	LDEQ
10-update	6/30/10	FEMA plan review updates
10-update-2	8/31/10	Added Ochsner Flight Care to LOA.
11	1/5/11	Complete update
12	12/2013	Complete update
13	12/2014	Complete update
13- update	05/22/2015	NUREG cross reference change C.6 to Appendix I
14	12/02/15	Complete Update
15	12/01/16	Complete Update
16	12/2020	Complete Update
17		No Update Performed; Next Revision Number will match LPRRP and Attachments 2 and 3
18	4/2023	Complete Update, FEMA plan review updates

ATTACHMENT 1
FOREWORD
ST. CHARLES PARISH

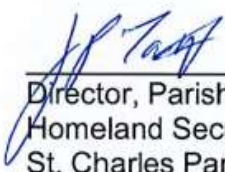

This plan, consisting of the General Plan and the Parish Enclosure, has been developed as an operations guide for St. Charles Parish in preparing for and conducting local government emergency operations in the event of an incident at Waterford 3 Steam Electric Station.

Emergency Implementing Procedures to implement and support functional assignments by the responsible Parish departments/agencies have been developed and are maintained in current status.

This plan shall be revised, updated, tested periodically and maintained in current status to assure a state of maximum readiness for the protection of public health, safety and property.

This revision to the Radiological Emergency Response Plan for St. Charles Parish, State of Louisiana, supercedes all previous editions. Revision 18 is declared official and is effective upon receipt.

APPROVED:

Director, Parish Department of
Homeland Security and Emergency Preparedness
St. Charles Parish

ATTACHMENT 1

I. Introduction

This General Plan of Attachment 1, Louisiana Peacetime Radiological Response Plan (LPRRP), constitutes the entire planning document to guide the direction and control of local government responses to an emergency situation at Waterford 3 Steam Electric Station. The Enclosures, along with the General Plan of Attachment 1, address preparedness criteria and planning elements for each Parish. It outlines the direction and control, the responsibilities for the performance of Parish emergency operations and support activities, timely warning and protective actions as needed for citizens threatened by a release of radioactive material, and integrating the actions of local government with those of other parishes, the State of Louisiana, and Entergy Operations, Inc.

Although the construction of nuclear power facilities provides substantial safeguards against the occurrence of radiological emergencies, an additional level of safety is there to ensure protection of the public through a coordinated emergency response by local government.

A. Authority

1. State

- a. The Louisiana Homeland Security and Emergency Assistance and Disaster Act
- b. The Louisiana Environmental Quality Act, La. R. S. 30:2001 et seq.

2. Local

Ordinances or resolutions enacted pursuant to requirements or authorities cited in the Plan.

3. Federal

- a. Federal Civil Defense Act of 1950, as amended 50 USCA App.2251 et seq.
- b. Stafford Disaster Relief and Emergency Assistance Act, as amended.

B. Purpose

This Attachment is intended to serve as a tool and reference for emergency actions and procedures in response to a fixed nuclear facility accident at Entergy Operations Inc. (EOI) Waterford 3 Steam Electric Station (W3SES) near Taft, Louisiana. The information is solely for utilization by governing officials of St. Charles and St. John the Baptist Parishes. As such, it will allow for an integrated, comprehensive and efficient response of State and local government and Waterford 3 in the event of a radiological accident at

Waterford 3 Steam Electric Station (W3SES). The Concept of Operation is purposefully outlined to ensure protection of the health, safety and welfare of the populace, both resident and transient, within the risk areas of the above named Parishes.

C. Development and Organization

1. This first attachment to the "Louisiana Peacetime Radiological Response Plan" (LPRRP) is for Waterford 3 Steam Electric Station (W3SES) near Taft, Louisiana. It has been developed by the Department of Homeland Security and Emergency Preparedness, St. Charles Parish, and the Office of Homeland Security and Emergency Preparedness, St. John the Baptist Parish. These two parishes will together be referred to as the Waterford 3 Parishes (W3P). Preparation of this Attachment was coordinated by Louisiana Department of Environmental Quality (LDEQ).
2. The content of this attachment has been developed in accordance with the guidelines of the LPRRP and the criteria as set forth by the Federal Emergency Management Agency (FEMA) and the Nuclear Regulatory Commission (NRC), in its document, NUREG-0654 / FEMA-REP-1, Revision 2, entitled "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants", December, 2019.
3. This Attachment has been arranged in two major divisions, a General Plan section and an Enclosure section. The General Plan includes all that information which is generic to all the W3P. The Enclosure section is comprised of two individual Parish Radiological Emergency Response Plans. The nature of the information included in the Enclosure section tends to be Parish specific.

D. Scope

This Attachment provides the basis for the coordination of offsite emergency response by State and local government and Waterford 3. It has been designed so that the planning measures are detailed for response from the onset of an incident to its termination and recovery. It is intended to be comprehensive, i.e. the information included will allow for rapid and appropriate protective measures so as to safeguard the public in the event of an accident, regardless of its severity. Particular attention has been paid to the areas of notification, methods and procedures, emergency communication, public information and education, and exercises and drills. Although every effort has been made to produce a thorough and accurate document, revisions will be made continually throughout the operational life of the Waterford 3 Steam Electric Station (W3SES), as needed and appropriate.

II. Concept of Operation

- A. The information in this Attachment is organized into a General Plan portion of generic information to the Waterford 3 Parishes (W3P) and individual Enclosures of specific information for each Parish. Therefore, by design, each Parish will have its specific Enclosure in combination with the General Plan which together will provide all the information necessary to meet the requirements of NUREG-0654 FEMA-REP-1, Rev. 2.
- B. EOI, as licensee for Waterford 3 Steam Electric Station (W3SES), will provide initial notification and all follow-up notifications pursuant to any radiological accident or potential accident including its termination and final plant status.
- C. Any event or sequence of events which occur at Waterford 3 Steam Electric Station (W3SES) that could impact the populace in the area offsite from the plant will be classified according to established Federal (NRC and FEMA) guidelines; i.e. one of the Emergency Classifications (ECLs) of Unusual Event, Alert, Site Area Emergency, or General Emergency will be declared as appropriate to the situation.
- D. Waterford 3 Steam Electric Station (W3SES) will activate its emergency centers--the Technical Support Center (TSC), the Operational Support Center (OSC), the Emergency Operations Facility (EOF), and the Joint Information Center (JIC), when required, based on accident severity. Coordination with Parish and State government will be continuous through the use of communication networks and contact with liaison personnel.
- E. In the event of an accident at Waterford 3 Steam Electric Station (W3SES), LDEQ is tasked with offsite radiological monitoring and analysis and protective action recommendations. Recommendations are formulated in conjunction with technical accident information from Waterford 3 Steam Electric Station (W3SES).
- F. Protective action recommendations may be issued at the Alert, Site Area Emergency, or General Emergency Classification.
- G. Federal technical support will be called upon and coordinated through LDEQ.
- H. GOHSEP will activate the State Emergency Operations Center (EOC) when required and coordinate all State resources through the appropriate agencies of the State.
- I. Federal operational support will be called upon and coordinated through GOHSEP. Federal support will be integrated into the emergency operations based on the expertise of the agency providing the support. Just-in-time training on administrative limits, contamination threshold, survey meter operations, etc., will be provided as needed.
- J. The Governor may preempt local governments as primary legal authority if a State "Declaration of Emergency" is issued.
- K. In the event of an accident, the Waterford 3 parish (W3P) governments,

which are responsible for the safety and welfare of their citizens, may implement this response plan as conditions warrant.

- L. An accident at Waterford 3 Steam Electric Station (W3SES) may require protective actions involving portions of both of the Waterford 3 Parishes.
- M. All available Parish resources will be utilized as necessary. If Parish resources are expended and/or the situation involves other jurisdictions, State emergency plans will be implemented to provide additional resources and support to make up for any shortfalls in capabilities and resources. Possible shortfalls in support may be found, but are not limited to, at Reception Centers, Emergency Workers Monitoring and Decontamination Stations, Transportation Personnel, Equipment, and/or Traffic and Access Personnel.
- N. Privately owned vehicles will be the primary mode of transportation if evacuation is necessary.
- O. Emergency Planning Zones (EPZs) for both the Plume Exposure (10-mile) and Ingestion Exposure (50-mile) Pathways are established. The Plume Exposure Pathway (10-mile) EPZ is further divided into zones of 2, 5 and 10 miles and into Protective Response Areas (PRA). This partitioning of the 10-mile EPZ allows for maximum flexibility of decision making for protective response measures. Within the Ingestion Exposure Pathway (50-mile) EPZ, all probable routes of food chain contamination (e.g. food crops, livestock, drinking water, etc.) will be identified so that appropriate protective responses can be implemented.
- P. In the event of an evacuation at W3SES, the St. Charles Parish Sheriff's Department and St. John's Sheriff's Department is responsible for traffic control per St. Charles Parish and St. John the Baptist Parishes Radiological Emergency Implementing Procedure: Law Enforcement Procedures.

III. Administration

A. Responsibility

The responsibility for the development, maintenance and revision of this Attachment lies with the W3P Offices of Emergency Preparedness, in conjunction with LDEQ and GOHSEP.

B. Review and Revision

All information contained within this Attachment will be reviewed annually by the W3P Offices of Emergency Preparedness. Any additions/deletions or recommendations will be forwarded to LDEQ for review. Proposed revisions to this Attachment will be considered by the W3P, LDEQ, GOHSEP and EOI. Upon acceptance the new information will be incorporated into this Attachment and all revised or new material will then be distributed as appropriate. Revised pages will be dated and marked to show changes have been made. Revision logs, contained in the plans/procedures will be utilized

to preserve historical context of changes made.

C. Distribution

The Parish Director of Emergency Preparedness (DEP) has the authority to distribute uncontrolled copies of this Attachment to Parish or emergency staff officials and others with responsibility for its implementation. The DEP is, in addition, responsible for maintaining a complete and current Parish distribution list. LDEQ is responsible for the controlled distribution of the LPRRP to include this Attachment as appropriate.

IV. Chapters

CHAPTER 1

Emergency Classification System

A. Purpose

A gradation of Emergency Classifications (ECLs) based on Emergency Action Levels (EALs), as established by NRC and FEMA in their planning guidance document, "Criteria for Preparation and Evaluation of Radiological Emergency response Plans and Preparedness in Support of Nuclear Power Plants," (NUREG-0654 FEMA-REP-1, Rev. 2), is utilized to provide for early and prompt notification of an accident to the W3P response organizations and to assure that adequate opportunity is provided for preparatory actions prior to any offsite impact of an accident.

B. Concept of Operations

1. Waterford 3 Steam Electric Station (W3SES) is responsible for the initial recognition and classification of the emergency condition, and for notification of State and Parish organizations.
2. The Emergency Classification Levels (ECL) (See Tab A - Emergency Classification Level) will be included with the initial and all follow-up notification message information provided to the W3P.
3. The W3P will take initial preparatory actions consistent with the guidelines for their emergency response organizations established in their plans (Enclosures) and implementing procedures. Subsequent actions will be taken in accordance with the ECL, the technical information from Waterford 3 Steam Electric Station (W3SES), and the protective action recommendations of LDEQ.
4. W3SES will review the ECL and emergency action level (EAL) scheme with the offsite organizations (ORO) annually to ensure accuracy.

TAB A TO CHAPTER 1

Emergency Classification Level*

A. Unusual Event

1. Description

An ECL indicating that events are in progress or have occurred which indicate a potential degradation of the level of safety of the plant or indicate a security threat to facility protection. No releases of radioactive material requiring offsite response or monitoring are expected unless further degradation of safety systems occurs. This term is sometimes shortened to Unusual Event (UE) or other similar site-specific terminology. The terms Notification of Unusual Event, NOUE, Unusual Event, and UE are used interchangeably.

2. Purpose

Purpose of offsite notification is to (1) assure that the first step in any response later found to be necessary has been carried out, (2) bring the operating staff to a state of readiness, and (3) provide systematic handling of unusual events information and decision-making.

B. Alert

1. Description

An ECL indicating that events are in progress or have occurred which involve an actual or potential substantial degradation of the level of safety of the plant or a security event that involves probable life threatening risk to site personnel or damage to site equipment because of hostile action. Any releases are expected to be limited to small fractions of the EPA PAG exposure levels.

2. Purpose

Purpose of offsite alert is to (1) assure that emergency personnel are readily available to respond if situation becomes more serious or to perform confirmatory radiation monitoring if required, and (2) provide offsite authorities current status information.

C. Site Area Emergency

1. Description

* "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants" (NUREG-0654 FEMA-REP-1, Rev. 2) December, 2019.

An ECL indicating that events are in progress or have occurred which involve an actual or likely major failure of plant functions needed for protection of the public or hostile action that results in intentional damage or malicious acts; 1) toward site personnel or equipment that could lead to the likely failure of or; 2) prevents effective access to equipment needed for the protection of the public. Any releases are not expected to result in exposure levels which exceed EPA PAG exposure levels beyond the site boundary.

2. Purpose

Purpose of the site area emergency declaration is to (1) assure that response centers are manned, (2) assure that monitoring teams are dispatched, (3) assure that personnel required for evacuation of near-site areas are at duty stations if situation becomes more serious, and (4) provide consultation with offsite authorities.

D. General Emergency

1. Description

An ECL indicating that events are in progress or have occurred which involve actual or imminent substantial core degradation or melting with potential for loss of containment integrity or hostile action that results in an actual loss of physical control of the facility. Releases can be reasonably expected to exceed EPA PAG exposure levels offsite for more than the immediate site area.

2. Purpose

Purpose of the general emergency declaration is to (1) initiate predetermined protective actions for the public, (2) provide continuous assessment of information from licensee and offsite organization measurements, (3) initiate additional measures as indicated by actual or potential releases, (4) provide consultation with offsite authorities and (5) provide updates for the public through offsite authorities.

CHAPTER 2

Public Education and Information

A. Purpose

To develop an ongoing educational program related to emergency response for Waterford 3 Steam Electric Station (W3SES) and, in the event of a radiological accident, a procedure for the timely release of accurate and pertinent information to the public and the news media.

B. Concept of Operations

1. Educational Program

- a. LDEQ will coordinate with GOHSEP, the W3P, and Waterford 3 in an ongoing annual program to acquaint the public on how they will be notified of an accident at Waterford 3 and what their actions should be. This information will include:
 - i. educational information on radiation,
 - ii. points of contact for additional information,
 - iii. emergency planning zones,
 - iv. protective response areas,
 - v. protective measures including evacuation routes,
 - vi. reception centers,
 - vii. sheltering,
 - viii. respiratory protection,
 - ix. transportation availability, and
 - x. special needs of the handicapped will be identified.
- b. Each household and business within the 10-mile EPZ is sent material which directs members of the public to the Entergy Public Information website in addition to providing means to obtain printed emergency information. The Entergy Public Information website and printed emergency information describe steps to be taken in the event of an accident occurring at W3. Information for the transients will be made available by means of a brochure distributed by the RBP to industries, hotels, motels, public buildings and retail outlets in the 10-mile EPZ. LDEQ, GOHSEP, the W3P, and Waterford 3 will conduct an annual program to acquaint the news media with the emergency plan, radiation information, and points of contact for the release of public information.

- c. Special Needs
 - i. Individuals needing assistance with evacuation are originally identified when they mail in the return cards provided with the Public Information found on the Entergy Public Information website.
 - ii. Among other needs, these cards keep track of the number of persons without private transportation throughout the EPZ.
 - iii. These cards are kept securely at the W3P EOC's, where the personal information is protected.
 - iv. During an emergency, these individuals will be contacted in accordance to process outlined in the St. Charles Parish and St. John the Baptist Transportation Procedures.
 - v. Specifics on resources, including quantities and types of vehicles can be found in the St. Charles Parish and St. John the Baptist Transportation Procedures and the Emergency Transportation Resource Guidebook.
- d. Transients
 - i. Emergency information for transient people will be in buildings, visitor centers, and retail outlets in the 10-mile EPZ.
 - ii. The Parish emergency officials will determine the locations to supply with this material.
 - iii. The locations will be reviewed for efficacy and changed as needed and the information updated.
- e. Ingestion Pathway
 - i. LDEQ has developed the brochure "Louisiana Radiological Emergency Information for Farmers, Food Processors and Distributors" to provide public Ingestion Pathway information.
 - ii. This brochure is delivered electronically each year for public distribution to the following parties:
 - 1) The Emergency Preparedness Directors of every Parish within the 50-Mile EPZ,
 - 2) The GOHSEP Regional Coordinators of each GOHSEP region within the 50-Mile EPZ,
 - 3) The LDAF Assistant Commissioner for Emergency Programs,
 - 4) The REP Program Manager for Mississippi Emergency Management Agency, and
 - 5) The Disaster Programs Coordinator for the LSU Ag

Center Extension Service, for dissemination to the county agents.

- iii. More basic ingestion pathway information is included in the informational postcard, directing to the Entergy Public Information website, mailed annually by W3 to individual residences and commercial businesses throughout the 10-mile EPZ.
- f. Media
 - i. LDEQ, GOHSEP, W3P, and EOI will conduct an annual program to acquaint the news media with the emergency plan, radiation information, and points of contact for the release of public information.
 - ii. EOI provides an annual mail out that includes the W3 informational brochure, a W3 press kit and media instructions for obtaining information relating to W3.

2. Information Release

- a. A public information program, designed for persons living, working and traveling in risk areas of the W3P, will be developed and annually updated by LDEQ and GOHSEP with Parish assistance.
- b. Emergency public information will be available in the "Information Brochure" and is intended to support information from the Emergency Alert System (EAS/formerly EBS).*
- c. The W3SES Parishes will release EAS messages directly to the assigned local EAS radio stations. WWL 870-AM/WLMG 101.9-FM will serve as the primary EAS station for St. Charles Parish and St. John Parish. Also serving as an EAS radio station is WWL 105.3-FM. If problems with back-up power should occur at the primary station, this station will serve as the alternate. The general manager will be the point of contact.
- d. The Alert Notification System will be activated by the W3P DEP under the direction of the Parish Presidents when conditions at Waterford 3 Steam Electric Station (W3SES) warrant protective actions for the general public. Once the decision is made to activate the Alert Notification System, the DEP will verify that the EAS is on standby and ready to broadcast prepared messages.
- e. Continuing information will be provided through the EAS, during the emergency, to inform the public of the nature and severity of the accident and protective actions. Supplemental EAS messages will include any necessary changes or updates to the emergency as

*The terminology is effective Nov, 10, 1994. It must be implemented by July, 1997 based on FCC Guidelines.

needed. Pre-scripted EAS messages, that can modified and edited as necessary, through approval by the OHSEP Director, will be used as needed throughout the emergency.

- f. The W3P DEP will be responsible for recommendations and support to LDEQ and GOHSEP for the advance development of prepared messages designed for dissemination over the EAS during an emergency. These messages provide specific emergency instructions based on the protective actions taken (See Tab A to Chapter 2 - EAS Message Listing).
- g. A designated Public Information Officer (PIO) at the Parish EOC will serve as a source of information to the Parish Spokesperson at the Joint Information Center (JIC), who will release emergency public information to the news media at the time of an accident as noted in the Parish procedures:
 - St. Charles Parish Emergency Plan Implementing Procedure: Emergency Operations Center: Attachment 7 – Radiological Decision Making
 - St. John the Baptist Parish Emergency Operations Plan: Standard Operation Procedure: ESF #15 - Public Information; Annex N
- h. In the case of HAB, release of sensitive information should be approved by IC or law enforcement liaison.
- i. News releases will be coordinated among the W3P and State through the Joint Information Center (JIC) hosted by Governor’s Office of Homeland Security and Emergency Preparedness (GOHSEP) and located at 7667 Independence Blvd., Baton Rouge, LA.
- j. For more information, including a physical description of the JIC, see W3 EPP-423 “Joint Information Center Activation, Operation, and Deactivation.”
- k. Media phone queries will be directed to the JIC at GOHSEP, where the Public Inquiry team will contact the affected Parish(es) for additional information and will be responsible for transferring the replies back to the general public. The telephone number is published in the yearly public postcard and on Entergy press releases during an event.
- l. The W3P OHSEP Directors will ensure the PIO’s at the EOC listen to the broadcasts to ensure accurate information is disseminated.
- m. The JIC is usually activated at an Alert or higher ECL. The W3P DEP will direct the news media to the Joint Information Center (JIC), located at GOHSEP.
- n. The Joint Information Center (JIC), operated by GOHSEP, performs

rumor control.

- i. Rumor control will be coordinated by the W3P Spokespersons and Parish PIOs, in conjunction with the State and utility.
- ii. The telephone number is published in the yearly public postcard directing to the Entergy Public Information website and on Entergy press releases during an event.
- iii. At the JIC, several televisions are kept tuned to major news outlets in order to effectively monitor media information messages to identify incomplete, inaccurate, or ambiguous information related to the emergency in the public domain.
- iv. For more information on rumor control, see:
 - W3 EPP-423: Emergency Planning Procedure: Joint Information Center Activation, Operation, Deactivation.

TAB A TO CHAPTER 2

EAS Message Listing*

1. Initial Notification
2. St. Charles Protective Action
3. St. John Protective Action
4. Reentry
5. Precautionary Actions for Farmers, Farm Workers, Food Processors and Food Distributors
6. Emergency Actions for Farmers, Farm Workers, Food Processors and Food Distributors

*Actual EAS messages are included in the PIO field procedures in St. Charles Parish and the EAS Manual in St. John the Baptist Parish.

CHAPTER 3

Accident Assessment

A. Purpose

The following establishes the process by which an accident at Waterford 3 Steam Electric Station (W3SES) will be assessed to determine if protective action(s) is necessary, and if so the method in which the protective action(s) would be recommended to the W3P.

B. Concept of Operation

1. State Responsibility

- a. In Chapter 6 of the Basic Plan of the LPRRP, responsibility for accident assessment is assigned solely to the Louisiana Department of Environmental Quality (LDEQ). Assessment of a radiological accident at W3SES will be made based on technical information received from W3SES which includes but is not limited to: plant status, emergency classification, time of initiation of release (if any), type of release, actual or projected dose rates, meteorological conditions, and predicted duration of existing conditions. In conjunction with W3SES, protective action recommendations will be formulated and transmitted to the W3P, as appropriate. Decisions on relocation, reentry, and return can be found in Chapter 11 in the LPRRP, Recovery, Reentry, and Post Accident Operations.
- b. LDEQ is assigned the responsibility for radiological monitoring, sample collection, and analyses and will supply and maintain its own specialized equipment and modes of transportation.

2. Parish Responsibility

- a. The W3P have no responsibility in accident assessment but are expected to carry out protective response measures based on the recommendations from LDEQ. Protective action recommendations are issued by W3 directly to the Parishes and State agencies concurrently, but the State may separately agree or disagree with the recommendation issued by W3 and ultimately will defer to LDEQ.
- b. Actual protective action(s) taken by the W3P is solely the responsibility of the individual Parish governments.

CHAPTER 4

Protective Response to Plume Exposure Pathway EPZ

A. Purpose

To establish those actions, methods and procedures, which constitute the State of Louisiana's protective response, in the event of an accident at a fixed nuclear facility affecting the State and Parishes. These actions, methods and procedures are specific for response within the Waterford-3 Steam Electric Station's plume exposure pathway EPZ.

B. Situation

1. The Plume Exposure Pathway (10-mile) EPZ has been partitioned into 16 Protective Response Areas (PRAs). The PRAs have been delineated for ease of public recognition on the basis of jurisdictional boundaries, roads and intersections, bodies of water and other natural landmarks, where possible, and also corresponding to approximate distances of 0-2, 2-5 and 5-10 miles from W-3.
2. The principal sources of radiological exposure within the plume exposure pathway EPZ are whole body gamma radiation from the plume and from deposited radioactive material and the inhalation of radioisotopes from the plume.
3. Primarily, the U.S. Environmental Protection Agency's Protective Action Guides (PAG), referenced in Chapter 6 of LPRRP, Accident Assessment, will be used to support the formulation and subsequent implementation of the State's protective response. The State and affected Parishes will implement those actions that, in the judgment of responsible officials, are appropriate to the situation and circumstances.
4. The LDEQ Secretary or designee will finalize the protective action recommendations (PAR) taking into account any operational considerations in consultation with GOHSEP and/or other agencies as appropriate.
 - a. Specific actions for the protection of the general public may include, but are not limited to:
 - i. Sheltering
 - ii. Respiratory protection
 - iii. Access control
 - iv. Evacuation
 - v. Monitor and Prepare

- b. Specific actions for the protection of emergency workers may include, but are not limited to:
 - i. The administration of the thyroid protective drug Potassium Iodide (KI), (see Tab 1 to Chapter 9).
 - ii. Respiratory protection
 - iii. Limitation to duration of exposure
 - c. Specific actions for the protection of institutionalized persons may include, but are not limited to:
 - i. Sheltering
 - ii. The administration of the thyroid protective drug Potassium Iodide (KI), (see Tab 1 to Chapter 9).
 - iii. Respiratory protection
 - iv. Evacuation
5. Protective action recommendations are issued by Waterford 3 Steam Electric Station (W3SES) directly to the Parishes and State agencies concurrently, but the State may separately agree or disagree with the recommendation issued by W3SES.
 6. Each risk Parish will evaluate the State-level protective action recommendation and, in coordination with other risk Parishes, LDEQ and GOHSEP, will implement those actions necessary to protect public health, safety and welfare.

C. Concept of Operation

1. Protective Actions Recommendations (PAR) Scenarios are pre-determined areas around Waterford-3 Steam Electric Station to be evacuated based on the wind direction. The Plume Exposure Pathway (10 mile) EPZ is also partitioned into 16 sectors A through R with each sector with 22.5 degrees. Based on the plan condition and radiological release there are three levels of initial PAR scenarios available. There are 28 PAR Scenarios available.
 - a. Evacuate 2 mile radius and evacuate 5 mile downwind and monitor and prepare the remainder of the 10 mile radius.
 - b. Evacuate 2 mile radius and evacuate 10 mile downwind and monitor and prepare the remainder of the 10 mile radius.
 - c. Evacuate 2 mile radius and evacuate 5 mile downwind and shelter in place 5-10 mile downwind and monitor and prepare the remainder of the 10 mile radius.
2. W-3 will select and disseminate PAR scenario appropriate for the radiological condition and wind direction to State and the Parishes on Emergency Notification Message Forms at the time of General

Emergency.

3. Teleconference among GOHSEP, LDEQ and W3Ps is conducted to agree upon the PAR Scenario to implement, decide the ANS time and EAS message broadcasting time.
4. At the designated time, each risk Parish will activate its Alert/Notification System.
5. Shortly after ANS activation, St. Charles Parish EOC will have WWL 870-AM/WLMG 101.9-FM radio station to broadcast EAS Message.
6. In the event of a site evacuation of Waterford-3 Non-Essential Personnel, private vehicles will be used to evacuate via Highway 18 to St. John The Baptist Catholic Church in Edgard or Monsanto Park in Luling.
7. In the event that a public evacuation is recommended, specific prearranged procedures will be implemented.
 - a. Primary evacuation routes have been identified for each Protective Response Area (PRA) Traffic control points will be manned along these routes in accordance with provisions found in Enclosures to this Attachment.
 - b. Parishes designated to support risk Parishes will be notified primarily by the requesting parish and will implement their operating procedures. Parishes may request assistance from other parishes with no prior mutual agreement using the Intrastate Mutual Aid Compact.
 - c. Procedures for dealing with potential impediments along primary evacuation routes will be implemented according to Parish Enclosures to this plan.
 - d. The principal means of transportation in the event of an evacuation is the private automobile augmented by bus transportation. Specific arrangements have been made for the transportation of institutionalized persons and school children.
8. Relaxation of protective actions and recovery.
 - a. State-level recommendations for the relaxation of protective actions and the initiation of recovery activities will be prepared primarily by LDEQ based upon plant conditions and ambient levels of radiation compared to Protective Action Guides.
 - b. LDEQ consequence assessment (which includes field monitoring and sampling, laboratory analyses and dose assessment) activities will continue, in coordination with appropriate Federal and State agencies, and other States, as

necessary, until no further threat to public health exists.

- c. LDEQ Secretary or designee will finalize recommendations on recovery activities and immediately communicate these to GOHSEP. GOHSEP, in turn, will communicate those recommendations to all risk Parishes.
- d. Support Parishes and ingestion pathway EPZ Parishes and State agencies will be advised by GOHSEP of the recovery recommendation.

CHAPTER 5

Protective Response for the Ingestion Exposure Pathway (50-mile) Emergency Planning Zone

A. Purpose

To establish the level of involvement the Parishes of Louisiana which comprise the Ingestion Exposure Pathway (50-mile) EPZ, will have in the protective response measures of the State of Louisiana.

B. Concept of Operation

1. All of the Parishes comprising the Ingestion Exposure Pathway (50-mile EPZ) will be notified at the time of an accident at W3SES (see Chapter 5 Tab A - Parish Listing for the Ingestion Exposure Pathway (50-mile EPZ).
2. LDEQ will directly notify the W3P of any protective response recommendations from LDAF, LDH, and LDWF concerning food, water, animal feed or livestock.
3. GOHSEP will notify the Parishes (other than W3P) within the 50-mile EPZ of the protective response recommendations from the appropriate agencies, such as LDAF, LDH, and LDWF, concerning food, water, animal feed or livestock. GOHSEP may also utilize an EAS message to notify the agricultural community of information on the protection of livestock and crops during an accident.
4. LDEQ in conjunction with American Radiation Services (ARS) will coordinate the sampling and analysis of soil, vegetation, milk, and water., and relay pertinent information to local officials within the Ingestion Exposure Pathway (50-mile) EPZ.LDEQ will coordinate

with the respective local officials all sampling and monitoring activities in the 50-mile EPZ.

5. The decision to relax protective action(s) within the Ingestion Exposure Pathway (50-mile EPZ) will be made using the same criteria and decision procedures as the recommendation(s) to implement the initial action(s) (refer to the LPRRP, Chapter 8, Protective Response for the Ingestion Exposure Pathway EPZ).

TAB A TO CHAPTER 5

Parish Listing for the Ingestion Exposure Pathway (50-mile) EPZ

50-mile EPZ is comprised of all or part of 21 Louisiana Parishes:

- Ascension
- Assumption
- East Baton Rouge
- Iberia
- Iberville
- Jefferson
- Lafourche
- Livingston
- St. Bernard
- St. Charles*
- St. Helena
- St. James
- St. John the Baptist*
- St. Martin
- St. Mary
- St. Tammany

- Orleans
- Plaquemine
- Tangipahoa
- Terrebonne
- West Baton Rouge

* Also within Plume Exposure Pathway (10-mile EPZ).

CHAPTER 6

Radiological Exposure Control

A. Purpose

To establish methods and procedures for the protection of the public and emergency workers in the W3P from radiological exposure in the event of a radiological accident at Waterford 3 Steam Electric Station (W3SES).

B. Concept of Operation

1. General

- a. LDEQ will offer technical advice and protective action recommendations to the W3P, who will implement appropriate radiological exposure control measures. The W3P will report resource shortages and operational support requirements to GOHSEP.
- b. At the time of a radiological accident at Waterford 3 Steam Electric Station (W3SES), LDEQ will make recommendations for protective action(s) for members of the general public and emergency workers to the W3P Parish Presidents. These recommendations will be based on the following:
 - i. Guidance from the U. S. Environmental Protection Agency (EPA) given in the “PAG Manual: Protective Action Guides and Planning Guidance for Radiological Incidents” (EPA-400-R-17-001, revised January, 2017).
 - ii. Information from Waterford 3 Steam Electric Station (W3SES) concerning the nature of the accident, radiological consequences (if any), protective action recommendations, duration of any radiological release and its potential offsite doses, meteorological conditions and updates on plant status. (For a complete listing of information received from Waterford 3 Steam Electric Station (W3SES) refer to Chapter 2 of the LPRRP.)
 - iii. “In house” (and/or independent) dose projections determined for any radiological release.
 - iv. Planning guidance for the W3P as outlined in the Basic Plan of the LPRRP (Chapter 6) and W3P Radiological Exposure Control Emergency Implementing Procedures and the individual vehicle and personnel monitoring and decontamination station procedures, and this Attachment.

- c. All radiological monitoring and decontamination for members of the public and animals will take place at reception centers which will be established outside the 10-mile EPZ. Persons showing on their body a reading greater than 0.1 mR/hour above background on a survey meter, greater than 300 cpm, or persons setting off the alarm while surveyed with a portal monitor, will be considered contaminated, and will be processed through decontamination procedures. St. Charles and St. John the Baptist Parishes will not be responsible for the decontamination of members of the general public. Note: Some facilities use action levels of greater than 100 cpm above background or 2X background. Emergency Worker monitoring and decontamination will take place at locations which will be established in the W3P's at the time of an accident.

Details of the monitoring and/or decontamination processes, including the number of individuals needed to perform the operations, are located in the Waterford 3 Standard Operating Procedure for Radiological Monitoring and Decontamination.

For more information on reception center requirements, see LPRRP, Chapter 9, Section IV.B.

- d. Arrangements will be made for the acquisition, distribution, and use of KI at the time of an accident. The use of KI as a thyroid-blocking agent will be considered for emergency workers and for institutionalized persons who may not be able to evacuate immediately. (Refer to Chapter 9 of the LPRRP, Radiological Exposure Control).
 - i. LDEQ Secretary or designee will coordinate with the Governor's Office of Homeland Security & Emergency Preparedness (GOHSEP) and will seek the advice of the State Health Officer regarding the issuance of KI to assure that any protective action recommendations (PAR) and appropriate radiological exposure control measures are disseminated to the affected Parishes.
 - ii. This substance will be administered with approval of the State Health Officer from the Louisiana Department of Health in accordance with State policy. Note: In addition to W3P KI resources, the Luling and Reserve Office of Public Health (OPH) Parish Health Units –have a cache of KI intended as a backup supply for emergency first responders. For the general public, evacuation is the primary means of preventing radiological exposure. Each OPH has 100 packs of

IOSAT with 14 -130 mg tablets each. Each office also maintains a cache of 400 – 30 ml bottles of Thyroshield.

- e. The dosimetry and survey meters which may be used to support a radiological emergency operation will be inspected, inventoried and functionally checked annually, as well as after each use under the supervision of the Parish Radiological Officer. GOHSEP is responsible for the calibration of all offsite organizations survey meters and dosimeters. Reserves to replace those items of equipment removed for calibration or repair will also be supplied by GOHSEP. GOHSEP maintains an electronic database to track the inventory of survey meters and dosimeters. Portal monitors used at Reception Centers will be functionally checked and maintained under the supervision of the Officer in Charge of the fire department who is responsible for manning the reception center. Waterford 3 is responsible for the calibration of Portal monitors used at Reception Centers.
- f. Additional equipment, such as traffic cones or barricades, not found in emergency workers kits, needed to aid emergency operations may be requested through GOHSEP, who will have the appropriate state emergency support function (ESF) lead fill the request.

2. Emergency Workers

- a. Emergency Workers (defined as those persons who are engaged in public service activities and as such voluntarily place themselves under different criteria for protection than the general public) will be equipped with self-reading dosimeters and a permanent record dosimeter (such as a thermoluminescent dosimeter (TLD)) at the time of an accident (see Tab A - Resource Requirements for Radiological Exposure Control).

A pocket dosimeter can be substituted for the electronic dosimeters; however, they must be equipped with a “low range” and a “high range” dosimeter. For example, a 0-200 mR pocket dosimeter and a 0-5 R pocket dosimeter could be distributed.

- b. Emergency workers, as volunteers, will be advised of risks and trained in the proper use of dosimeters, limitation of exposure (time, distance, shielding) and the use, administration, limitations and precautions of KI.
- c. All emergency workers, including those not in identified risk areas, will record their dosimeter readings every 30 minutes throughout their period of participation.

- i. Emergency workers will be responsible for filling out dosimeter report forms and giving them to the Parish Radiological Officer (or his designee) at the conclusion of the emergency.
- ii. Emergency workers will report to their supervisors when the self-reading dosimeter reads 200 mR (0.2 R). If the self-reading dosimeter reads 1000 mR (1 R) or above, the emergency worker will immediately relocate to an area with lower background radiation and report to the supervisor.

Individual report forms and exposure control guidelines can be found in the following procedures:

- St. Charles Parish Emergency Response Procedure for Radiological Exposure Control
 - St. John Parish Emergency Response Procedure for Radiological Exposure Control
- d. St. Charles and St. John the Baptist Parish Presidents will be responsible for authorizing their emergency workers and members of the general public (e.g., farmers who voluntarily wish to enter a risk area) to incur exposures in excess of the EPA General Public Protective Action Guides. Authorization will be considered after consultation with LDEQ. An explanation of the risks involved with exceeding the occupational dose limits will be explained to applicable individuals and documentation of its completion will be retained by the Parish.

For more information on emergency worker exposure exceeding EPA Guidelines see:

- St. Charles Parish Emergency Plan Implementing Procedure: Emergency Operations Center: Attachment 7 – Decision Making and Radiological Exposure Control
 - St. John the Baptist Parish Emergency Operations Plan: Emergency Operations Center Standard Operation Procedure: Attachment 7 – Decision Making and Radiological Exposure Control
- e. Consideration for authorization of exposure beyond 5 R Total Effective Dose Equivalent (TED) for whole body and/or 25 R Committed Dose Equivalent (CDE) for thyroid will be consistent with the following:

Guideline	ACTIVITY	CONDITIONS*
5 rem (50 mSv)	all occupational exposures	all reasonable achievable actions have been taken to minimize dose.
10 rem (100 mSv)	Protecting critical infrastructure necessary for public welfare (e.g., a power plant)	exceeding 5 rem (50 mSv) unavoidable and all appropriate actions taken to reduce dose. Monitoring available to project or measure dose.
25 rem (250 mSv)	Lifesaving or protection of large Populations	exceeding 5 rem (50 mSv) unavoidable and all appropriate actions taken to reduce dose. Monitoring available to project or measure dose.
>25 rem (250 mSv)	Lifesaving or protection of large Populations	All conditions above and only for people fully aware of the risks involved

- f. Emergency workers will be monitored and decontaminated at facilities set outside of the Plume Exposure Pathway (10-mile) EPZ, and at pre-determined locations in un-affected Parishes. If needed, arrangements will be made for decontamination of emergency workers at reception centers outside of the Plume Exposure Pathway (10-mile) EPZ. Provisions will be made at these centers to survey and decontaminate emergency workers and to transport them to medical facilities for further treatment of wounds or contamination, if necessary.
- i. Persons showing on their body a reading greater than 0.1 mR/hour above background on a survey meter, greater than 300 cpm, or persons setting off the alarm while surveyed with a portal monitor, will be considered contaminated, and will be processed through decontamination procedures. Note: Some facilities use action levels of greater than 100 cpm above background or 2x background.
- ii. Contaminated supplies, instruments and equipment used by emergency workers will be stored at these sites until arrangements for their proper surveillance and decontamination or disposal can be made. Decontamination action levels for objects are set the

“PAG Manual: Potective Action Guides and Planing Guidance for Radiological Incidents,” EPA 400-R-17-001, January 2017.

same as those for emergency workers, as stated in the previous paragraph.

- g. Emergency workers will be responsible for completing dosimeter report forms and giving them to the Parish Radiological Officer (or his designee) at the conclusion of the emergency.

For a sample dosimeter report form, see:

- St. Charles Parish “Individual Dosimeter Report Form”
- St. John the Baptist Parish Emergency Operations Plan Standard Operating Procedure: Radiological Exposure Control, Attachment 4a “Individual Dosimeter Report Form”

- h. Emergency workers’ permanent record dosimeters (TLDs) will be turned in to W3SES for laboratory analysis and report.

It will be required that EW TLDs are turned in at the end of the event. However, TLDs can be returned to be read at any time during the incident.

- i. W3SES provides the W3P with 144 KI packets of 14 tablets each, for a total of 2,016 tablets per parish. The utility is responsible for maintaining an adequate supply of unexpired tablets. The Radiological Officer will oversee the distribution of KI to emergency worker and will inform emergency workers to ingest KI, upon the approval of use by the State Health Officer.

For more information on distribution of KI, see:

- St. Charles Parish Emergency Plan Implementing Procedure: Radiological Exposure Control
- St. John the Baptist Parish Emergency Operations Plan Standard Operating Procedure: Radiological Exposure Control

TAB A TO CHAPTER 6

Resource Requirements for Radiological Exposure Control

1. Emergency Workers
 - a. Digital Dosimeter (Range: 0.1mR-100R) or equivalent
 - b. Thermoluminescent Dosimeter (TLD) or Film Badge
 - c. Individual Dosimeter Report Forms
 - d. KI packages containing 144 KI packages of 14 tablets (2,016 tablets) each W3P.
2. Reception/Survey/Decontamination Center
 - a. Ludlum 3A survey meter (Range:0-50mR/hr) or equivalent
 - b. Ludlum 3A survey meter (Range:0-500R/hr) or equivalent
 - c. Portal Monitor
 - d. Reception Log Form
 - e. Shower facilities (male/female)
 - f. Provisions for obtaining a change of clothing (for contaminated individuals)
 - g. Storage/isolation area for contaminated material(s)
 - h. Vehicles/drivers for contaminated individual transport
 - i. Contamination Survey Decontamination Log Forms
3. For more information on emergency kit information, see:
 - a. The Annual Letter of Certification for quantities of equipment at each location
 - b. St. Charles Parish Emergency Plan Implementing Procedures, Radiological Exposure Control
 - c. St. John the Baptist Parish Emergency Operations Plan Standard Operating Procedure: Radiological Exposure Control

CHAPTER 7

Recovery, Reentry, and Post Accident Operations

A. Purpose

To establish the methods used for the relaxation of any protective measures and the initiation of reentry into evacuation and/or exclusion areas. Also, to identify the means and methods necessary to support reentry and recovery activities.

B. Concept of Operation

1. Relocation

- a. LDEQ will recommend the extension or further restriction of protective measures in affected areas in both the Plume Exposure Pathway (10-mile) and Ingestion Exposure Pathway (50-mile) EPZs to the W3P Presidents. These measures may include the temporary or permanent relocation of households. (Refer to Chapter 11 of the LPRRP, Recovery, Reentry, Post Accident Operations).
- b. The W3P responsibility for the relocation process will be handled by the same agencies and organizations that implemented protective actions.
- c. Access Control/Check points will be established to ensure only those authorized to enter relocation areas are permitted. A process to control contamination and exposure will be established at the access control point. Monitoring and decontamination of those exiting the relocation areas will be set up and performed, as necessary.
- d. Refer to Chapter 11 of the Basic Plan for physical economic, and financial assistance of individuals being relocated and provisions for monitoring and decontaminating individuals that are relocated from areas not previously evacuated.

2. Reentry

- a. LDEQ will recommend the temporary entry into a restricted zone under controlled and monitored conditions to the W3P Presidents. (Refer to Chapter 11 in the LPRRP, Recover, Reentry, and Post Accident Operations.)
- b. The W3P responsibility for the reentry process will be handled by the same agencies and organizations that implemented protective actions.

- c. Access Control/Check points will be established to ensure only those authorized to enter reentry areas are permitted. Parishes will notify law enforcement personnel at access control points of personnel authorized for reentry. A process to control contamination and exposure will be established at the access control point. Monitoring and decontamination of those exiting the reentry areas will be set up and performed, as necessary.

3. Return

- a. LDEQ will recommend the relaxation of protective measures to allow the reoccupation of cleared areas for unrestricted residence or use to the W3P Presidents. (Refer to Chapter 11 in the LPRRP, Reentry, Recovery, and Return.)
- b. The W3P responsibility for the return process will be handled by the same agencies and organizations that implemented protective actions.
- c. LDEQ will recommend a buffer zone to be established around the area exceeding EPA PAGs and parishes will be asked to restrict the area.

4. Recovery

- a. The recovery phase of emergency operations will commence when the emergency has been terminated and with the relaxation of any protective measures. Recovery will extend for a period of time as determined by the severity of the accident.
- b. Recovery actions will be initiated by the W3P on the recommendation of LDEQ. Refer to the Basic Plan Chapter 11 for resources and responsible party for clean up operations
- c. Services provided as part of the recovery phase will be coordinated among State, Parish and volunteer agencies to include social, health, economic and insurance-related assistance as required in accordance with the Louisiana Emergency Operations Plan.
- d. The pre-established chain of command will be maintained from the emergency response to the recovery activities. Any change in the organizational structure affecting recovery will be communicated through established channels to involved agencies and organizations. Also through the same communication channels, all involved response organizations will be informed of recovery phase plans/procedures being developed, such as remedial measures, how long they will take, and the expected final outcome.

- e. LDEQ will provide details on monitoring, sampling, and technical assessment of radiological conditions and consequences will be used to determine that no threat to the public exists.
- f. Recovery operations will commence with the relaxation of the protective action. State and local officials will consider necessary actions and processes needed to implement recovery. LDEQ in coordination with appropriate state agencies and local officials, will follow established criteria for determining the reoccupancy of an area that has acceptable radiation levels in accordance with Federal PAG guidelines.
- g. Restoration of vital services will be prioritized and taken into account to provide the returning populations adequate resources. Services such as schools, utilities, and health/medical care are given priority in restoration and recovery.

CHAPTER 8

Exercises and Drills

A. Purpose

To develop a program of exercises and drills to regularly evaluate the adequacy of the W3P plans and level of preparedness. It is the intent of these exercises and drills that areas not adequately addressed and/or needing improvement be identified.

B. Concept of Operations

1. Exercises

- a. A full participation exercise is an exercise in which (1) state and local government, emergency personnel are engaged in sufficient numbers to verify the capability to respond to the actions required by the accident scenario; (2) the integrated capability to adequately assess and respond to an accident at a commercial nuclear power plant is tested; and (3) the implementation of observable portions of State and/or local plans is tested.
- b. Each of the W3P will participate in an exercise for Waterford 3 Steam Electric Station (W3SES) at least once every two years. In addition, W3P will participate in an Ingestion Pathway Exercise once during each eight year cycle. Participation will be such that all major elements of the plans and preparedness organizations are tested within an eight-year period.
- c. To the extent possible, every effort will be made to vary scenarios, including the weather conditions simulated and times (hourly , yearly)* for each exercise.
- d. A partial participation exercise refers to an exercise in which sufficient State and local government emergency personnel are engaged to adequately test direction and control functions for protective action decision making related to emergency action levels and communication capabilities among affected State and local governments and the licensee.
- e. A remedial exercise is an exercise that tests deficiencies of previous joint exercises that are considered significant enough

* To include provisions for off-hours and unannounced exercises once every six years.

to impact on the public health and safety.

- f. Types of exercise scenarios are Plume Exposure Pathway Exercise and Ingestion Exposure Pathway Exercise.
- g. Scenario Elements include Hostile Action Based (HAB), Rapid Escalation, No/Minimal Release of Radioactive Materials and Resource Integration. These scenario elements could be combined.
- h. All major elements of plans/procedures are tested at the minimum frequency specified.

2. Critique and Exercise Evaluation

- a. Arrangements will be made for observation and critique of each exercise by representatives of Parish, State and Federal government and the media as appropriate to the scale of the exercise.
- b. The critique, to be conducted as soon as practicable after the exercise, will result in a formal evaluation of the ability of each organization to respond as called for in the Plan (LPRRP/Attachment 1) and will utilize FEMA REP's assessment methodology.
- c. In addition, a critique of the chronological sequence of events will be conducted to identify time delays and their possible cause.
- d. The Parish OHSEP Directors, in conjunction with LDEQ and GOHSEP, will review Parish level plans (Enclosures) and implementing procedures to resolve deficiencies identified in exercise critiques and evaluations within the FEMA specified timeframe.

3. Drills

A Drill is a supervised instruction period aimed at developing and maintaining skills in a particular operation. A Drill may be a component of an exercise. Type and frequency of drills are listed below:

a. Communication Drills

- i. Communication drills will test both the adequacy of communications links and the response agency understanding of emergency classification and message content.
- ii. Communications between Waterford 3 Steam Electric Station (W3SES), the W3P and the State will be tested monthly through the operational Hot Line (OHL) and an Internet based electronic notification system..

- iii. Communications between Waterford 3 Steam Electric Station (W3SES), the W3P, and the State will be tested annually (may be during an exercise).
- iv. Communications between Federal emergency response organizations and the State of Louisiana will be tested quarterly.

b. Medical Emergency Drills

- i. A medical emergency drill will involve the transportation and treatment of a simulated contaminated injured person by Parish or local support services.
- ii. Medical emergency drills involving the designated primary local hospital will be conducted as required by FEMA. The offsite portions of the medical drill may be performed as part of the required biennial exercise.

NOTE 1: An Evaluated (by FEMA) Drill with either the primary or back-up hospital will be conducted annually.

NOTE 2: In general, there is no requirement for parish government involvement in medical drills, other than being included in standard notification procedures. When relocation centers are exercised (as during full scale biennial exercises), the capability to direct "contaminated injured" members of the general public to the appropriate hospital will also be tested.

c. Environmental Monitoring Drills

- i. An annual Environmental Monitoring drill will involve the direct radiation measurements in the environment, collection and simulated analyses of sample media, such as water, soil, vegetation and air as well as provisions for communications and record-keeping.
- ii. The W3P will participate as requested with the State and EOI in the Environmental Monitoring drills held for W3SES.

d. Critique and Drill Evaluation

- i. Each drill will be supervised and evaluated by a qualified drill instructor(s).
- ii. The drill instructor(s) will be responsible for addressing any resulting drill deficiencies in a timely and

appropriate manner.

4. Scenarios

a. Development and Design

- i. The State, in conjunction with the W3P and Waterford 3 Steam Electric Station (W3SES), will develop exercise and drill scenarios based on NRC and FEMA guidance.
- ii. Exercises and drills will be designed to allow free-play for decision-making by the principal response organizations. Scenarios will include but not be limited to the following criteria:
 - 1) The basic objective(s) of each exercise or drill, and evaluation criteria..
 - 2) The date(s), duration, location(s) and participating organizations and/or individuals.
 - 3) The events and/or items to be simulated.
 - 4) A time schedule of real and simulated initiating events.
 - 5) A narrative summary describing the conduct of the exercise or drill to include such things as simulated casualties, offsite fire department assistance, rescue of personnel, use of protective clothing, deployment of Field Monitoring Teams, and public information activities (e.g., EAS message transmission).
 - 6) Arrangements for providing plan and scenario information material, in advance, to official observers.

b. Critique and Scenario Evaluation

- i. Each scenario will be evaluated for its success in accomplishing its intended purpose and its contribution to the success or failure of the exercise or drill.
- ii. The review of the scenario will consider such things as the effect of controllers versus the use of cue cards; whether to follow a sequence of events time, scenario time, or real time; time compression; simulation; and other issues as they relate to the success and effectiveness of the scenario.

CHAPTER 9

Radiological Emergency Response Training

A. Purpose

To establish guidelines and requirements for a radiological emergency response training program for the personnel of the W3P having a role in response to an accident at Waterford 3 Steam Electric Station (W3SES). These trainings will be appropriately documented, through attendance rosters and will be retained by W3 and/or LDEQ.

B. Concept of Operations

1. Utility Directed Training Programs – Offsite Support to W3SES
 - a. Waterford 3 will provide site-specific emergency response training for those offsite emergency organizations which may be called upon to provide assistance onsite, through pre-established agreement, should the need arise..
 - b. Training will be provided for emergency response personnel, hospital employees, ambulance/rescue workers (paramedics), and sheriff and fire department personnel. It will include procedures for notification, basic radiation protection, and the specific roles of each support organization. For the support personnel who will enter the site, training will also include access procedures and the onsite individual to whom they would report for coordination of their support activities onsite. Training will be documented through sign-in sheets, email correspondence, etc. and will be retained by LDEQ.
 - c. For each primary and backup hospital designated to provide medical support for “contaminated injured” personnel, initial training and periodic retraining programs will be provided on evaluation and treatment of radiologically “contaminated injured” patients. Transportation providers will receive basic training in contamination control.
2. State Directed Training – Response Plan Implementation
 - a. LDEQ, in conjunction with GOHSEP, will provide for the training of the W3P personnel who will implement the radiological emergency response plans.
 - b. Personnel who will receive training on radiological emergency response include the following: DEP, staff of the emergency response organizations (EOC staff), sheriffs and deputies, security personnel, medical support personnel (offsite only),

communications and transportation personnel, mutual aid organizations and any fire fighting, first aid and rescue personnel not trained by the "Utility Directed" Program.

- c. The initial training of response personnel will include an overview of radiological emergency response plans, including the facility, Waterford 3 Steam Electric Station (W3SES), State and Parish plans and procedures, basic information on radiation and radiation protection as well as more specific training on individual organization responsibilities and functions.
- d. Training for response personnel will be designed to enhance comprehension of the radiological emergency response plans and to orient personnel to their specific response function in relation to the overall protective response.
- e. In addition to plan orientation, those response personnel who will conduct activities within the Plume Exposure Pathway (10-mile) EPZ will receive training on radiological exposure control to include respiratory protection, protective clothing, dosimetry, management of total dose through exposure time limitations, reading and recording of personal dose data, decontamination procedures, and the use of potassium iodide (KI), a radioprotective drug.
- f. After the initial training program, retraining of personnel will be accomplished on an annual basis. The scope of this training will be essentially the same as the initial Program but will emphasize any new material and the reinforcement of original information.
- g. Mini-training sessions on detailed procedural aspects of the radiological emergency preparedness program will be conducted on an "as needed" basis with the W3P DEP (as stated in the W3SES plan) for individual members of the St. Charles and St. John the Baptist Parish EOC staffs or the staffs collectively. These sessions will consist of individual procedure clarification or integrated "table-top" exercises for the staff which will be general or designed to concentrate on areas of inadequacy.
- h. Just-in-time training will be given to personnel responding to emergencies through mutual aid agreements. These trainings will consist of appropriate information based on the the type of support being provided. Personnel will receive, but are not limited to, just-in time training on contamination thresholds, dosimetry reporting limits, survey and monitoring techniques, as well as additional pertinent procedural information.

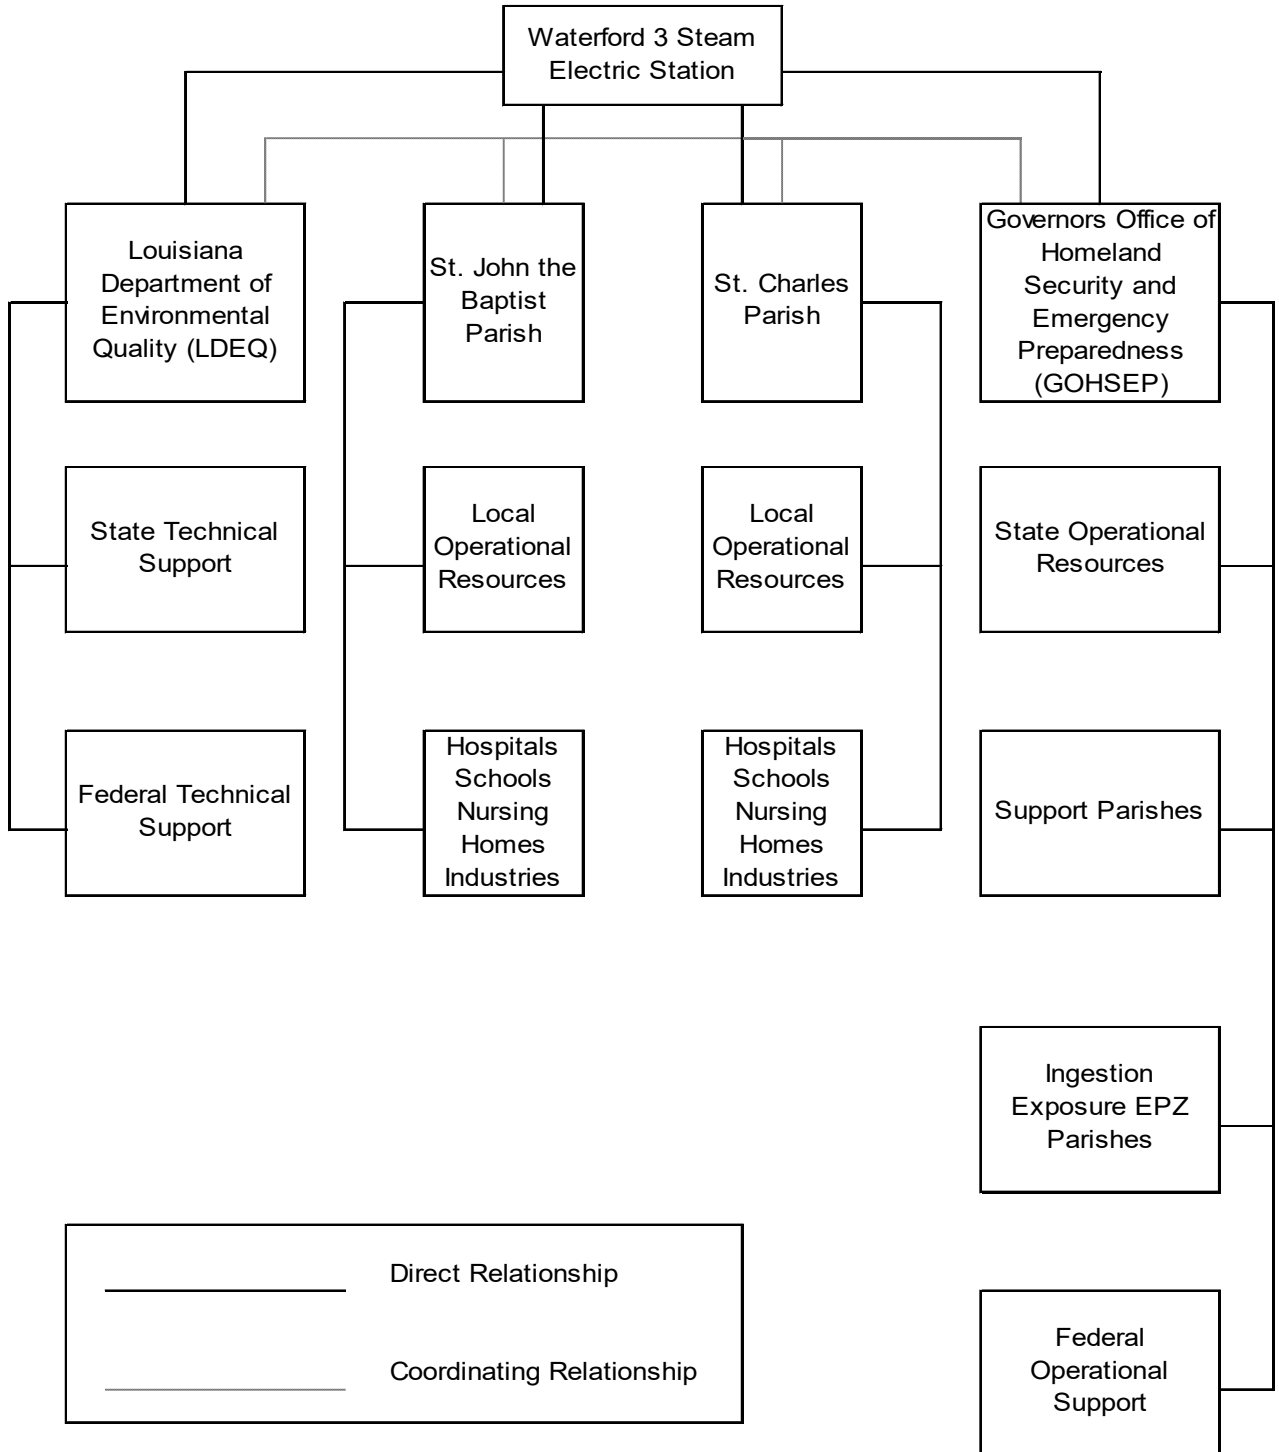

- i. LDEQ, in conjunction with GOHSEP, will provide for initial and follow-up training of the W3P elected officials who will evaluate protective response recommendations and coordinate the implementation of Parish protective response measures.
 - j. LDEQ and GOHSEP will coordinate with and assist the utility with medical support personnel training identified in paragraph 8.b.1.c above, to the extent that qualified instructors are available.
3. Federal Training Programs
- a. FEMA and DOE offer several training courses for various aspects of radiological emergency planning, assessment and response. (Refer to Chapter 12 in the LPRRP, Training for more information pertaining to these courses).
 - b. The W3P will designate appropriate Parish personnel to attend these courses, as available, to enhance overall plan development and strengthen specific aspects of emergency response through detailed technical training.

A. Introduction

This Enclosure together with the General Plan of Attachment 1, Louisiana Peacetime Radiological Response Plan, constitutes the entire planning document to guide the direction and control of local government responses to an emergency situation at Waterford-3 Steam Electric Station. This Enclosure addresses preparedness criteria and planning elements specific for St. Charles Parish. It outlines the direction and control, the responsibilities for the performance of Parish emergency operations and support activities, the means for timely warning and protective actions as needed for citizens threatened by a release of radioactive material, and the means of integrating the actions of local government with those of the State of Louisiana, and Louisiana Entergy Operations, Inc. (EOI).

Although the construction of nuclear power facilities provides substantial safeguards against the occurrence of radiological emergencies, this Enclosure provides an additional level of safety to ensure protection of the public through a coordinated emergency response by local government.

B. Authority

Authority for the development and implementation of this Enclosure is consistent with and pursuant to the provisions of St. Charles Parish Civil Defense Ordinance 262, dated August 12, 1953.

C. Direction and Control

St. Charles Parish, when affected by an emergency at Waterford 3 Steam Electric Station, is responsible for initial radiological emergency response operations within its jurisdiction. The Parish President has the authority to declare a State of Emergency for St. Charles Parish giving him full control of emergency response. The Parish will coordinate such actions through the St. Charles Parish Department of Homeland Security and Emergency Preparedness and its Emergency Preparedness Director. The Emergency Preparedness Director will provide the necessary direction and control to initiate actions and conduct emergency operations required to protect the population of St. Charles Parish from an emergency at Waterford 3 Steam Electric Station. In his absence, responsibility will be delegated according to Parish procedures for continuity of Parish government.

The Emergency Operations Center (EOC) for St. Charles Parish is located on 15026 River Road, Hahnville, across the street from the courthouse. The St. Charles Parish EOC maintains 24-hour operations. The EOC contains an emergency communications center and provides adequate space for staff and equipment for staff to perform ESF functions including but not limited to tables, telephones, computers (with internet access), and status boards. The St. Charles Parish EOC has two 600 kW diesel generators as backup power supply, either one of which is capable of handling the EOC building electrical load in the absence of utility-provided electrical power. The St. Charles Parish alternate EOC is located at the Luling VFD station #23 on Ellen Street in Ama,

Louisiana. Additional information regarding the alternate EOC, including layout, can be found in the St. Charles Parish Implementing Procedures: EOC Activation and Deactivation.

Generally, staff assignments to the EOC may include representatives of the following:

1. Operations Staff

- a. Parish President
- b. Homeland Security and Emergency Preparedness
- c. Director
- d. Parish Sheriff
- e. Homeland Security and Emergency Preparedness Senior Coordinator
- f. EOC Coordinator
- g. Public Information Officer
- h. Law Enforcement Services Officer
- i. Radiological Officer
- j. Transportation Officer
- k. School Services Officer
- l. Health/Medical Officer
- m. Fire Services Officer
- n. Public Works Officer
- o. State Police Representative
- p. Technical Advisor (W-3)

2. Resource Staff

- a. Council on Aging Director
- b. Parish Health Unit Director
- c. Parks and Recreation Department Director
- d. Resource Officer
- e. American Red Cross Representative
- f. USDA Parish Emergency Board Chairperson
- g. Emergency Coordinator

State agency support and technical analysis will be provided through the Louisiana Department of Environmental Quality (LDEQ) and the Governor's Office of Homeland Security and Emergency Preparedness (GOHSEP). The LDEQ will be responsible for offsite radiological monitoring and analysis

and protective action recommendations. The GOHSEP will coordinate all state resources through the appropriate state agencies. In the event the emergency situation is beyond local control and response capabilities, the Governor may issue a "Declaration of Emergency," whereby any or all emergency operations would then be under the direction of the Governor. Any additional personnel provided in support of operations during the emergency will receive just-in-time training. The just-in-time training will include, but is not limited to, administrative limits, dosimetry reporting frequency, contamination threshold, surveying techniques, etc.

At the time of an emergency at Waterford 3 Steam Electric Station (W3SES), EOI will deploy a liaison to the St. Charles Parish Emergency Operations Center to ensure coordination of emergency efforts.

D. Organization and Responsibilities

Local organizations with emergency responsibilities are identified in the following sections. Each organization is responsible for assuring continuity of resources to support emergency operations for a protracted period. Each organization or sub-organization having an operations role is responsible for maintaining its own Emergency Implementing Procedures (EIP) which describe detailed emergency actions to be performed.

The relationships between the local organizations are graphically depicted in Figure D-1. As shown, local organizations are coordinated by the Parish Emergency Preparedness Director with the exception of the Parish Health Unit, which is coordinated by the Louisiana Department of Health (LDH); the Department of Children and Family Services (DCFS); and the American Red Cross; however, the Emergency Preparedness Director may provide limited coordination, if required by the circumstances at the time of the emergency, with the approval of the LDH and DCFS. The primary and support responsibilities of the local organizations for key emergency functions are specified in the Emergency Function and Responsibility Matrix shown in Figure D-2.

1. Local Government

a. Parish President

The St. Charles Parish President has the following responsibilities.

- i. The safety and well being of persons in the Parish.
- ii. Maintenance and implementation of the St. Charles Parish Radiological Emergency Response Plan through the Parish Emergency Preparedness Department for response to an accident at Waterford 3 Steam Electric Station.
- iii. Initiating actions and providing direction and control at the local level.

- iv. Conducting emergency operations through the Emergency Preparedness Director.
- v. Through the advice of LDEQ, authorizing emergency workers to incur exposure in excess of general public PAGs
- vi. Management of resources and facilities within the parish.
- vii. Liaison to state agencies, military, and industry.
- viii. Designating a chief spokesperson and approving official news releases for the Parish

b. Parish Attorney

The Parish Attorney is responsible for:

- i. Providing legal advice and counsel to the Emergency Preparedness Director in the interpretation of Parish, State, and Federal law relating to disaster preparedness under a given circumstance.
- ii. Ensuring legality of any and all emergency laws and ordinances passed by the Parish Council.
- iii. Providing an emergency representative to the Parish EOC, as requested, during an emergency.

c. St. Charles Parish Homeland Security and Emergency Preparedness

The Emergency Preparedness Department, under the direction of the Emergency Preparedness Director, is responsible for the development and maintenance of procedures to implement his plan.

The Emergency Preparedness Director is responsible for:

- i. Acting as the Chief of Staff for the Parish President and directing and coordinating Parish emergency response to an accident at Waterford 3 Steam Electric Station.
- ii. Serving as the liaison between the Parish President and emergency response forces.
- iii. Supervising the development and maintenance of plans and procedures for Parish response to an accident at Waterford 3 Steam Electric Station, including quarterly verification and update of emergency implementing procedures telephone numbers, and an annual review and update of emergency implementing procedures.
- iv. Supervising the development and implementation of

training and public information and education programs within the Parish.

- v. Maintaining an adequate supply of radiation monitoring equipment through a program of equipment inspection, inventory, and operational checks.
- vi. Maintaining an adequate supply of KI and ensuring the KI is stored at room temperature.
- vii. Developing and maintaining contracts and agreements necessary to implement the Parish radiological emergency response plan.
- viii. Ensuring the coordination of special facility (e.g., schools, nursing homes, jails, and industry) emergency procedures and protective actions with Parish plans in response to an accident at Waterford 3 Steam Electric Station.
- ix. Ensuring notification and coordination of all local agencies supporting emergency operations, as required, including the coordination with GOHSEP for activation and use of appropriate reception centers and shelters should an evacuation be necessary.
- x. Coordinating overall emergency operations to protect life and property at the local level.
- xi. Coordinating with GOHSEP and LDEQ in supporting emergency operations at the local level.
- xii. Activating the public alert system, ensuring warning and notification of persons within the 10-mile EPZ, as necessary. For more information, see the St. Charles Parish Emergency Plan Implementing Procedure: Emergency Operations Center – Attachment 8: Public Alert.
- xiii. Maintaining adequate communications to conduct and coordinate local emergency operations.
- xiv. Coordinating with the Public Information Officer to disseminate public information.
- xv. Appointing a Public Information Office, Radiological Officer, Coordinator, Emergency Coordinator, and Health/Medical Officer.

d. The Public Information Officer is responsible for:

- i. Participating in the Parish-level program aimed at educating the public on response to an accident at Waterford 3 Steam Electric Station.

- ii. Providing liaison with news media organizations prior to and during an emergency.
 - iii. Assisting in preparation of news releases.
 - iv. Providing information to the Joint Information Center.
- e. The Radiological Officer is responsible for:
- i. Establishing arrangements for the surveying and decontamination of emergency personnel and vehicles, and coordinating this effort with LDEQ.
 - ii. Distribution of dosimetry devices to emergency personnel and maintenance of related records.
 - iii. Ensuring that emergency personnel in the field are informed of radiological conditions and necessary protective actions, as necessary.
 - iv. Maintaining an inventory of radiological equipment within the parish. Storage location and quantities of dosimeters and KI can be found in St. Charles Parish Implementing Procedure Radiological Exposure Control.
 - v. Gathering radiological information and keeping records on the radiological response efforts.
 - vi. Distribution of potassium iodide to emergency personnel and maintenance of related records.
- f. The Coordinator and Emergency Coordinator are responsible for:
- i. Ensuring the maintenance and availability of communication equipment and all call lists necessary to provide alert/notification and communications support in an emergency.
 - ii. Initiating the communication of the alert/notification message to emergency response organizations.
 - iii. Establishing and maintaining a communications system capable of linking the St. Charles Parish EOC with Waterford 3 Steam Electric Station, state response agencies, parish emergency response agencies, and with St. John the Baptist Parish.
 - iv. Recruiting and training radio operators and telephone attendants.
 - v. Monitoring all communications equipment 24 hours a day, seven days a week.
- g. The Health/Medical Officer is responsible for:

- i. Providing rescue and emergency medical services, including the transportation of victims of radiological incidents.
- ii. Providing transportation support for non-ambulatory evacuees.
- iii. Coordinating with hospitals from adjacent jurisdictions.
- iv. Coordinating with the Parish Health Unit and local medical practitioners.
- v. Providing medical services assistance to other W3P, as needed.
- vi. Maintaining communications with the Parish Sheriff's Office.

h. Sheriff's Office

The Sheriff's Office is the lead law enforcement and traffic control agency within St. Charles Parish and has overall control of all safety operations within the parish. The Sheriff, as the Chief Law Enforcement Officer, will be responsible for:

- i. Managing the evacuation of portions of the Parish within the 10-mile EPZ.
- ii. Direction and control of traffic within the Parish.
- iii. Direction and control of traffic coming from other W3P in transit to reception centers in nearby support parishes.
- iv. Preservation of law and order.
- v. Instituting access control and area security.
- vi. Assisting in performing search and rescue work, as required.
- vii. Assisting in warning residents and transients, as required.
- viii. Providing assistance to, and liaison with outside law enforcement agencies, as required.
- ix. Coordination with local and state law enforcement agencies to provide emergency support operations.
- x. Emergency communications support.
- xi. Providing a representative to the parish EOC, as requested, during an emergency.
- xii. Providing protective measures for Parish Correctional Center inmates.

i. Volunteer Fire Departments

The Volunteer Fire Departments within St. Charles Parish support Emergency Preparedness by providing technical assistance, manpower, and equipment to aid disaster victims within the Parish. Under the direction of the respective Chiefs, the Volunteer Fire Departments are responsible for:

- i. Providing fire and rescue aid.
- ii. Assisting in warning and notification of the public within the EPZ, if needed.
- iii. Providing a representative to the EOC, as requested, during an accident.

j. School Board

The Parish School Board, under the direction of the Superintendent, is responsible for:

- i. Providing school buses and drivers for evacuation of students and school personnel from schools in portions of the Parish within the 10-mile EPZ.
- ii. Providing transportation for assisting evacuation of residents and transients from the affected areas.
- iii. Establishing arrangements for the care of school students at reception centers or host schools until students are picked-up by parents.
- iv. Maintaining communications with the Parish EOC on operations and support needs and coordinating with other agencies on support services.
- v. Providing an emergency representative to the Parish EOC, as requested, during an accident.

k. St. Charles Parish Public Works Department

The Director of the St. Charles Parish Public Works Department is responsible for:

- i. Assisting in traffic control and re-entry/recovery operations by providing signs and barriers.
- ii. Coordinating resources available to the Parish.
- iii. Providing highway maintenance and clearing impediments to allow road passage.
- iv. Coordinating with the State Department of Transportation and Development and Office of Highways personnel for additional assistance as

required.

- v. Providing an emergency representative to the Parish EOC, as requested, during an accident.

I. St. Charles Parks and Recreation Department

The St. Charles Parks and Recreation Department Director is responsible for providing personnel, equipment, open-space areas, and facilities in assisting the Emergency Preparedness Director. Other responsibilities include:

- i. Assisting Public Works in carrying out emergency response tasks.
- ii. Support of fire-fighting operation with equipment and manpower.
- iii. Assisting elderly, handicapped, or others with special needs during evacuation, and at reception and care facilities in host areas, if requested.
- iv. Supporting procurement of medical supplies.
- v. Assisting with expedient acquisition of radio-protective drugs and for their use by emergency workers and institutionalized persons, if required.

2. Parish-Level State Support Agencies

a. Health Unit (LDH)

In conjunction with the Louisiana Department of Health, the Parish Health Unit, under the direction of the Parish Health Unit Director, is responsible for:

- i. Assisting in the coordination of required medical services.
- ii. Assisting with expedient acquisition of radio-protective drugs (i.e., KI) and for their use by emergency workers and institutionalized persons, if required.
- iii. Assisting in collection of water and milk samples, and transportation of such samples for laboratory analysis.
- iv. Maintaining communications with the Parish EOC on operations and support needs and coordinating with other agencies on support services as needed.
- v. Providing an emergency representative to the Parish EOC, as requested, during an emergency.
- vi. Providing for, in coordination with the FDA, the collection of water, milk, sewage, and food samples from food processing plants, and for the transportation of such samples for laboratory analysis, during a

radiological emergency.

- vii. In coordination with the Department of Agriculture and Forestry, USDA, and LDEQ, when requested, providing guidance and advice on identifying storing and disposing of contaminated agricultural products.
- viii. In coordination with the FDA, providing guidance for the diversion or destruction of radiologically contaminated food, crops, and milk during an accident.
- ix. Providing for the inspection of shelter facilities to ensure that adequate sanitary, water, and food service is available for the number of people assigned.
- x. Providing guidance and advice to water purification facilities of an accident and advice on the appropriate protective action.
- xi. Supporting the relocation of hospital patients from hospitals within the risk areas to identified support hospitals during an accident.
- xii. Assisting in the provision of mass emergency medical transportation resources to be used for the relocation of hospital patients during an accident.
- xiii. Supporting risk health care facilities and risk Parishes with identification and coordination of medical resources.

3. Parish Extension Service

The St. Charles Parish Extension Service, under the direction of the County Agent, in cooperation with the State Department of Agriculture and Forestry and USDA, is responsible for:

- i. Providing general assistance and coordination with USDA federal disaster assistance programs to include crop loss, livestock feed, and other emergency measures as applicable.
- ii. Disseminating agricultural advisories to affected Parish farmers and other agribusinesses during an accident at Waterford 3 Steam Electric Station.
- iii. Assessing damage to Parish crops and livestock in the event of an emergency.

4. State Police (Troop B)

In conjunction with the State Department of Public Safety and Corrections, the State Police, under the direction of the Troop Commander, will be responsible for the following:

- i. In coordination with the Sheriff, assisting in traffic control operations during an evacuation, particularly on State or Federal highways.
- ii. In coordination with the Sheriff, assisting in establishing access control to affected areas.
- iii. In coordination with the Sheriff, assisting in security and law enforcement support for affected areas.
- iv. Providing communications support, if necessary.
- v. Providing a representative in the Parish EOC, as requested, to coordinate State Police support with the State EOC.

5. St. Charles Parish Council on Aging

The St. Charles Parish Council on Aging, under the direction of the Executive Director, is responsible for:

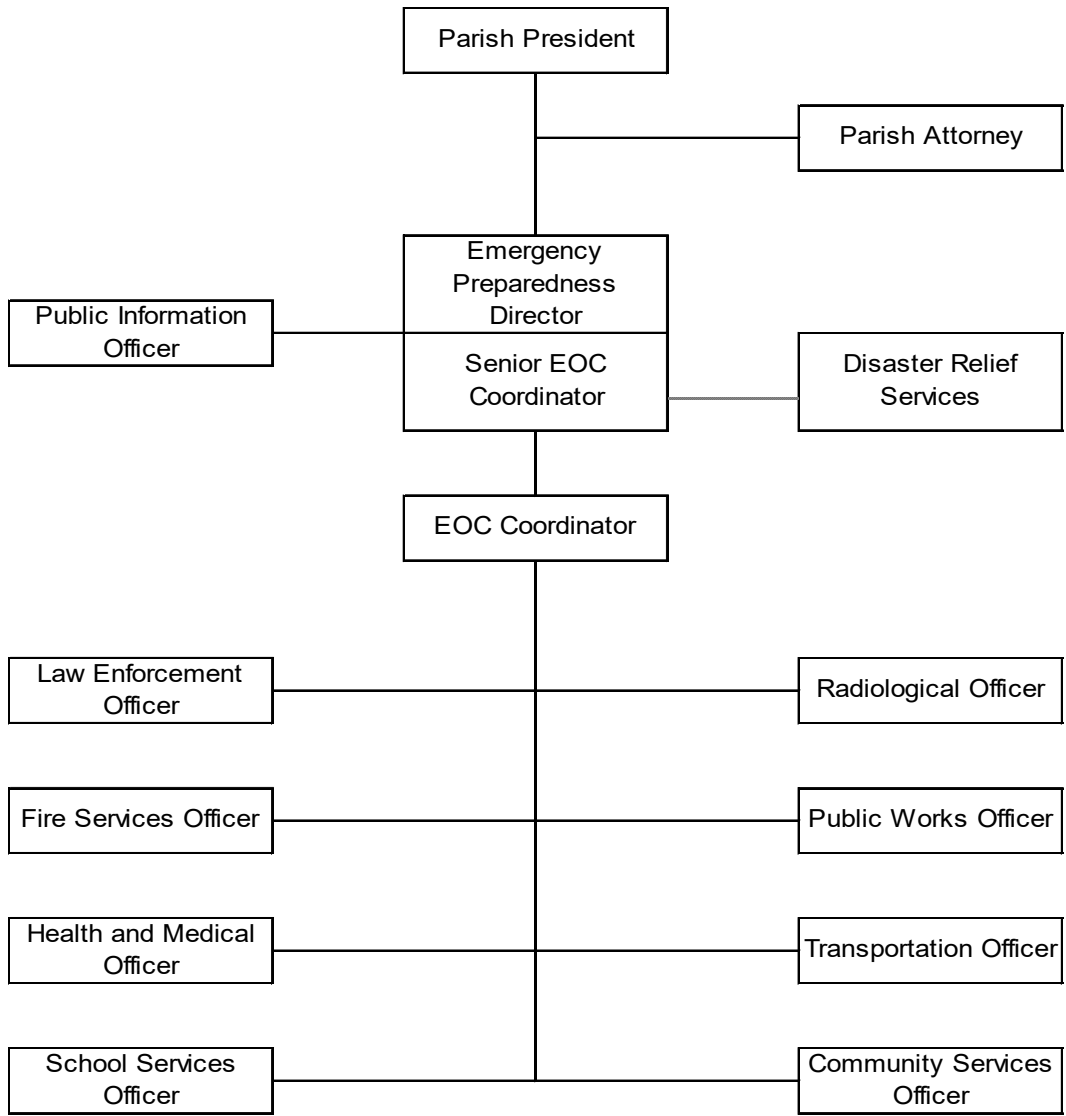

- i. Providing transportation assistance for disabled and elderly evacuees.
- ii. Providing annual update of lists of non-institutionalized disabled personnel.

7. St. Charles Parish Hospital

- i. The St. Charles Parish Hospital, under the direction of the Administrator, is responsible for providing health and medical care services to non-contaminated injured individuals.
- ii. The primary hospital for medical support for contaminated injured persons will be either Ochsner Medical Center or West Jefferson Medical Center. The secondary or backup hospital is Our Lady of the Lake Regional Medical Center.

E. Notification and Activation

Once an emergency classification has been declared at W-3, the Control Room will notify the Parish warning points. Emergency Coordinators at the EOC (Parish 911 Center as backup) will provide for 24-hour per day coverage of the communications equipment. Notification messages, including those received from entities other than the licensee, will be verified by the dispatcher in accordance with established procedures. The primary means of initial and subsequent notifications throughout an emergency is the Internet-based Electronic Notification System; 2) the Waterford 3 Operational Hotline; 3) the commercial telephone system; and 4) the Office of Emergency Preparedness Radio System (See Section F - Emergency Communications).

This emergency response plan will be activated by the Parish President through the Office of Emergency Preparedness Director. Local response organizations will be notified of the emergency by the Parish. Such notification messages will specify whether the organization is to standby, or start to mobilize emergency response personnel. Emergency response personnel will be called to duty using the alert/notification call system of the response agency. Support agencies will be alerted by the agency they are supporting. Should mobilization be required, emergency response personnel will report to their agency response center for specialized equipment and further instructions.

Emergency personnel contacts are located in the St. Charles Parish Emergency Plan Implementing Procedure, Emergency Operations Center, Attachment 1, Staff Notification Procedure, Enclosures 1 – 4. The EOC is declared fully operational upon the arrival of the operations staff defined in St. Charles Parish Emergency Plan Implementing Procedure, Emergency Operations Center, Attachment 2, EOC Activation.

During an emergency at W3SES, St. Charles Parish will not send personnel to the W3SES EOF.

The sequences for anticipated notifications and activation of emergency response personnel for each emergency classification are provided below. Details of notification and activation consistent with the emergency classification scheme are provided in established procedures.

1. Unusual Event

a. Notification

Upon receipt of a classification of Unusual Event by W-3, the Parish Emergency Coordinator will notify the Office of Emergency Preparedness Director and other key individuals consistent with this

classification and in accordance with established procedures utilizing the paging system described in Section F. During normal working hours, notification is made to the Emergency Operations Center (EOC) with the 911 Center as a backup; after normal hours, the EOC Emergency Coordinator provides notification to the Emergency Preparedness Director.

b. Activation

No activation of emergency response personnel or emergency facilities is anticipated for the Unusual Event. However, such action can be taken if deemed appropriate at the time. The Office of Emergency Preparedness Director will monitor the situation and be prepared to escalate to a higher level of response if the situation warrants, or standby until closeout of the emergency.

2. Alert

a. Notification

Upon receipt of a classification of Alert by W-3, the EOC Emergency Coordinator will notify the Office of Emergency Preparedness Director (if not previously notified), other key individuals, and other supporting response organizations consistent with this classification and in accordance with established procedures utilizing the paging system described in Section F. The Department Directors will, in turn, alert emergency personnel in their respective organizations by telephone or two-way radio. Also, local radio stations WWL-AM/WLMG-FM (the primary EAS stations for St. Charles Parish) will be alerted to standby by the EOC. For more information, see St. Charles Parish All Hazards Plan, Annex C, and St. Charles Parish Emergency Plan Implementing Procedure: Public Information Procedures.

b. Activation

Upon notification, the Office of Emergency Preparedness Director and key staff will augment the Parish's emergency response resources by activating key staff members to the Parish EOC and activating the Communications Center with the Parish EOC. All supporting response organizations will maintain standby status until closeout or escalation of the emergency.

3. Site Area Emergency

a. Notification

Upon receipt of a classification of Site Area Emergency by W-3, the EOC Emergency Coordinator will notify the Office of Emergency Preparedness Director (if not previously notified), other key individuals, and other supporting response organizations consistent with this classification and in accordance with established procedures. The paging system described in Section F will be utilized. The Department Directors will, in turn, notify key emergency personnel in their respective departments by telephone or two-way radio. Local radio stations WWL-AM/WLMG-FM (the primary EAS radio stations for St. Charles Parish) will be notified and brought to standby status (if not previously alerted) and, if appropriate, given messages to broadcast consistent with the situation via St. Charles Parish EOC.

b. Activation

Upon notification, the Office of Emergency Preparedness Director will activate the Parish EOC and other emergency response centers as appropriate. The OHSEP Director is responsible for maintaining an active emergency response roster. All local emergency response organizations will report to their duty stations. A duty roster for extended operations will be established, which consists of two 12 hour shifts for 24 hour coverage. The various implementing procedures give each duty officer the responsibility of establishing their relief officer. Traffic control and transportation support personnel will prepare for possible evacuation and reception centers will prepare for opening should conditions warrant. Local radio stations WWL-AM/WLMG-FM (the primary EAS radio stations for St. Charles Parish) will provide the public in the affected areas of St. Charles Parish, out to a 10-mile radius of W3, with periodic updates of the emergency.

4. General Emergency

a. Notification and Activation

Upon receipt of a classification of General Emergency by Waterford 3, the EOC Emergency Coordinator will notify the Office of Homeland Security and Emergency Preparedness Director (if not previously notified), other key individuals, and other supporting response organizations in accordance with established procedures, and emergency response centers will be activated. The Alert Notification System will be activated in the Parish.

b. All other response actions will be as for a Site Area Emergency.

5. Alert/Notification of the Public

- a. The primary alert system for St. Charles Parish is comprised of a combination of fixed sirens, helicopters fitted with mounted alerting devices, the St. Charles Parish Industrial Hot Line, cable TV override, automatic telephone dialing devices, school board radios, and the U.S. Coast Guard for the notification of ships along the Mississippi River.
- b. Upon determination that conditions at Waterford 3 warrant protective actions, the Office of Emergency Preparedness Director will issue instructions for the activation of the primary alert system.
- c. Should an element of the primary alert system fail, the Office of Homeland Security and Emergency Preparedness Director has available a number of backup methods, including route alerting in populated and wetland areas and commercial telephone.
- d. Once a decision is made by the President of the Parish to activate the Prompt Notification System, the Director of the Office of Homeland Security and Emergency Preparedness will select and/or modify the appropriate EAS message and St. Charles Parish will contact WWL/WLMG Newsroom Hotline directly for release of the appropriate EAS messages. The Hotline is assessible 24 hours a day, 7 days a week.
- e. As the emergency warrants an update or additional supplemental information, the notification process will restart and a new or additional emergency alert message will be communicated to the public.
- f. The default rebroadcast time for St. Charles Parish is 15 minutes, however, circumstances could dictate a shorter or longer rebroadcast frequency, at the discretion of the St. Charles Parish DEP.

F. Emergency Communications

This section describes the various communications systems available for prompt communications among principal organizations and emergency personnel, and to the public. For more information, see St. Charles Parish Implementing Procedures, Attachment 3-Communication and Public Information procedures. A summary of communications systems available is shown in Figure F-1.

The Parish EOC provides the focus of communications for emergency operations. Direction, control and coordination emanates from the EOC through the Parish President and the Office of Emergency Preparedness Director. Data and feedback relevant to the administration of emergency operations will be directed to the EOC.

1. W3SES Notification System

The primary means of 24-hour per day notification and communications between W3SES and the St. Charles Parish emergency response organization is an Internet-based Electronic Notification System. This is a dedicated notification system which allows St. Charles Parish, the other W3P, LDEQ and GOHSEP to receive emergency notification messages from W3SES simultaneously.

Locations equipped with a W3SES Internet-based Electronic Notification System include, but are not limited to, the following:

- W3SES Control Room
- W3SES Technical Support Center (TSC)
- W3SES Emergency Operations Facility (EOF)
- W3SES Back-up EOF
- St. Charles Parish EOC,
- St. Charles Parish 911 Center
- St. John the Baptist Parish EOC
- St. John the Baptist E-911 Center
- LDEQ, REP&R Unit Office, Baton Rouge
- GOHSEP EOC, Baton Rouge

The Internet-based Electronic Notification System is backed up by a W3SES Operational Hotline and dedicated telephone system. The EOC provides 24-hour per day monitoring within the Parish. The 911 Center is used as a backup.

In addition, the capability exists for W3 to transmit hard-copies of emergency

information to the St. Charles Parish EOC, the GOHSEP EOC, and the LDEQ Office. Types of information that can be received on hard-copy include initial and follow up notification messages, plant status, release information, dose projections, protective action recommendations, and press releases.

Upon receiving notification of an emergency at Waterford 3, the Parish Dispatcher will notify key emergency personnel within the St. Charles Parish Emergency Organization. The organizational titles and alternate contacts can be found in the EOC Call-Out Book, located in St. Charles EOC. The Parish Emergency Coordinators will activate the EOC when an Alert, SAE, or GE is declared, or as directed by the Director of St. Charles Parish OHSEP. Additional information regarding staff and contact information of individuals needing to be notified/activated can be found in the St. Charles Parish Implementing Procedure: Notification.

2. Back-up Communication System

The Emergency Preparedness Radio System serves as a alternate communication system to the Internet-based Electronic Notification System. A receive-transmit console is available at the same locations listed above. Twenty-four hour per day monitoring of the Emergency Preparedness Radio System is provided by the EOC of St. John Parish. This Radio System serves as another alternate communication system for communicating with St. John Parish, LDEQ and GOHSEP.

3. Agency Radio Systems

Fixed, mobile and hand-held radios operating on various frequencies provide for communication between the Parish EOC and representatives from the following organizations (see also Figure F-1):

- Sheriff's Office
- Volunteer Fire Departments
- Hospitals (St. Charles Hospital)
- Parish Public Works
- Parish Emergency Medical Services
- State Police
- School Board

4. Medical Support Facilities Communications Systems

A coordinated communications link for the Parish EOC, hospitals, and ambulances is provided by Emergency Medical Services and Fire Services Communications Systems. These systems are comprised of either

fixed/mobile radios or commercial telephones. Coordinated radio communications with ambulances and St. Charles Parish Hospital is provided. Commercial telephones serve as backup communications from the EOC to St. Charles Parish Hospital.

5. Commercial Telephone

Commercial telephone service is available at each emergency response facility and can be used as an alternate communication system. The Parish is serviced by AT&T. Total breakdown is backed up by special lines outside the normal System.

St. Charles Parish has requested priority from AT&T for restoring service provided in the Parish EOC.

6. Paging System

Key emergency personnel in the emergency response organizations and supporting emergency personnel can be contacted through the paging system.

7. Alert Notification System

An Alert Notification System located throughout the 10-mile EPZ will be used to alert the public to listen to the local radio stations WWL-AM 870/WLMG-FM 101.9. That portion of the system located within St. Charles Parish will be activated from the Parish EOC. This system is maintained by Waterford 3 Steam Electric Station. For more information, see the St. Charles Parish Emergency Plan Implementing Procedure: Emergency Operations Center – Attachment 8: Public Alert.

Special notification devices, such as tone activated alarm pagers or automatic telephone dialing systems, are provided for special facilities including schools, hospital, and major employers. Facilities with special notification devices are shown in Figures F-2 and 2a. When activated, the Emergency Preparedness Director can provide information and instructions over the system.

Mobile sirens and public address systems mounted on patrol cars, fire department and other emergency vehicles, and helicopters could provide backup to the Alert Notification System.

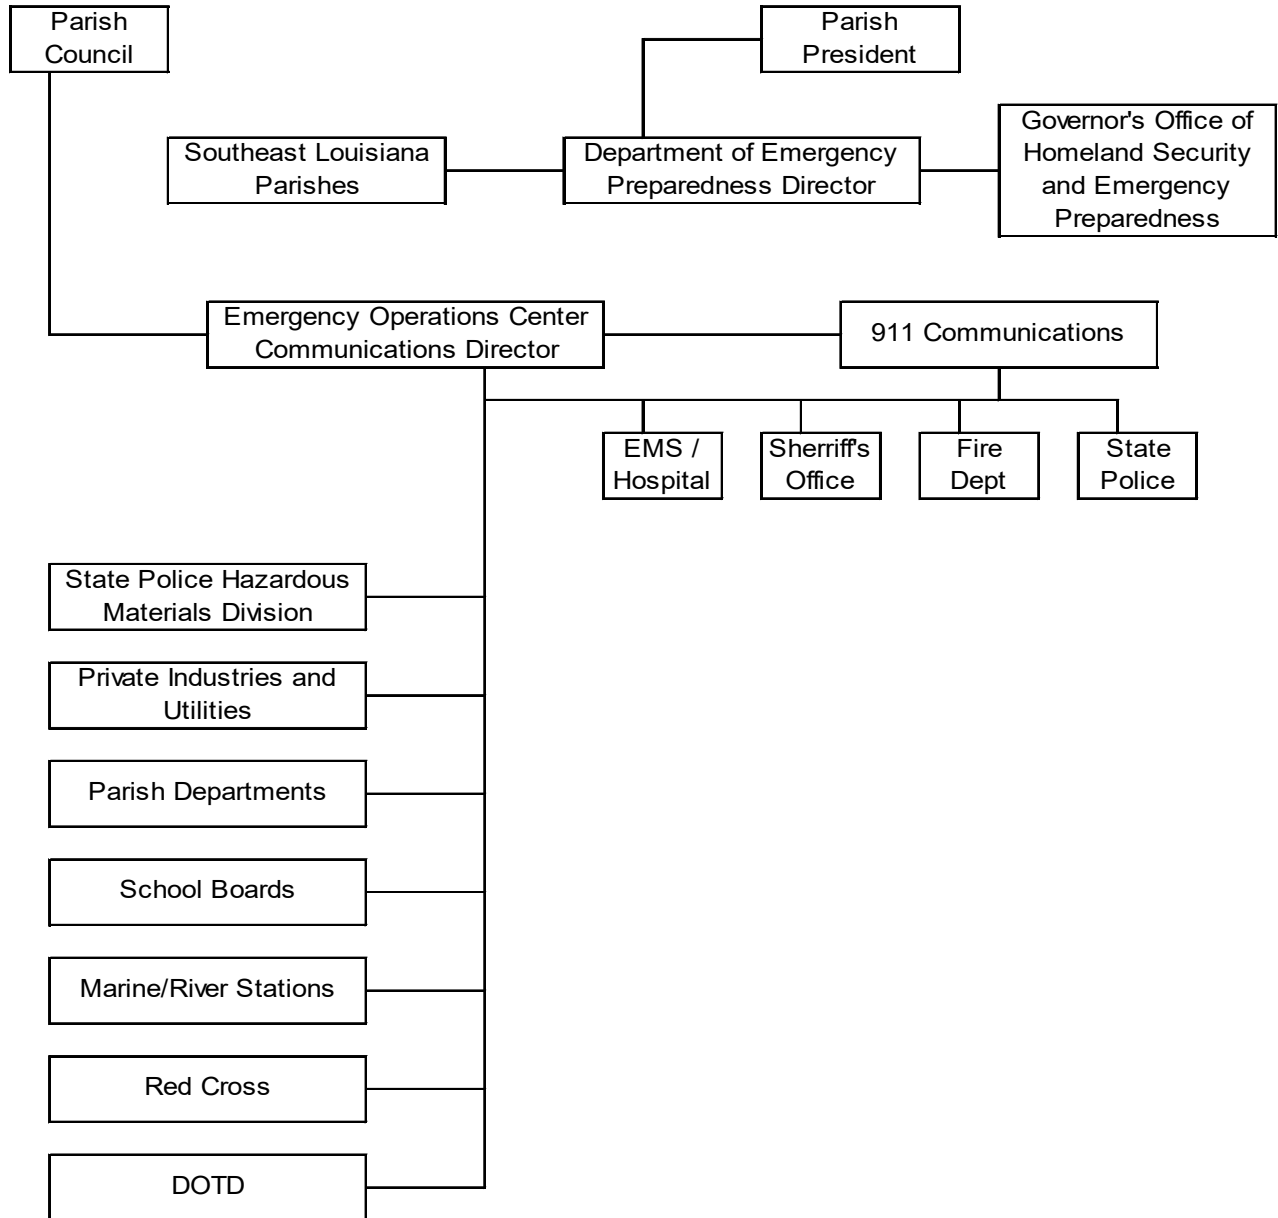

8. Testing

Periodic testing of emergency communications and the Alert Notification System is conducted on a regularly scheduled basis (approximately monthly) in accordance with established procedures. For more information see

LPRRP, Basic Plan, Chapter 4, Section IV and St. Charles Parish Emergency Plan Implementing Procedures: Emergency Operations Center – Attachments 3–Communications and 8- Public Alert/Notification

G. Protective Response for the Plume Exposure Pathway (10-mile EPZ)

1. Waterford 3 Steam Electric Station (W3SES) will simultaneously notify the Parish and State agencies of protective action recommendations based on accident conditions.
2. LDEQ will provide an independent assessment and protective action recommendations to the LDEQ Secretary or designee, who will coordinate with GOHSEP on the efficacy of proposed recommendations.
3. The Parish will make a decision on the implementation of these recommendations based on local conditions and report its decision to LDEQ.
4. St. Charles Parish will coordinate operational elements for implementation of the protective action recommendations with GOHSEP as appropriate to the situation.
5. Predetermined protective actions will be taken when the projected dose at any place and time appears to be at or above those recommended in Protective Action Guides (PAG).
6. The Parish and the 10-mile EPZ have been divided into Protective Response Areas (PRA) for designation of threatened areas and to denote where protective actions are to be taken. Tab A to Appendix B in Attachment 1 address the PRA in detail.
7. Protective Actions

Actions taken to protect the public may include any or all of the following:

- a. An advisory to Monitor and Prepare
- b. Notification of affected residents and transients to seek immediate shelter,
- c. Evacuation of transients and residents within a designated Protective Action Section to reception centers or shelter areas outside the ten mile EPZ,
- d. Implementation of respiratory protection procedures: people within the risk area will be advised to cover their noses and mouths with handkerchiefs, cloth, or other protective materials, and to limit air intake from heating or cooling systems if they take in outside air.
- e. Control of entrance into affected areas,
- f. Implementation of procedures to prevent the consumption and distribution of contaminated food and water supplies, and
- g. Implementation of procedures to decontaminate persons when necessary.

Precautionary protective actions can be taken in advance of a release or a declaration of a General Emergency (GE). These actions can include, but are not limited to, the closing off of waterways and the evacuations of schools, nursing homes, and/or other special facilities, etc.

8. Monitor and Prepare

If current conditions at the nuclear power plant do not warrant an evacuation, but there is a possibility that an evacuation or other protective action may be warranted later as the situation develops, the public in the affected sections will be advised to Monitor and Prepare, that is, to stay tuned to TV, radio and other media to keep informed of any future protective action decisions, and to prepare for the possibility of evacuation, Shelter in-place, or other protective actions.

9. Control of Entrance into Affected Areas

Under certain conditions, action will be taken to limit the number of people who enter an affected area. These conditions will be determined by the Parish President upon recommendations from LDEQ. The Parish Sheriff's Office will provide support to control access with assistance as requested from Louisiana State Police.

10. Sheltering (in-place)

The decision to recommend taking shelter indoors will be made by the Parish President through the advice of the Secretary of LDEQ or designee. The notification to take shelter indoors will be issued via the Alert Notification System and the EAS.

11. Evacuation

a. Evacuation of the Utility

In the event of an evacuation at W3SES, the St. Charles Parish Sheriff's Department is responsible for traffic control per St. Charles Parish Radiological Emergency Implementing Procedure: Law Enforcement Services. Waterford 3 evacuates all non-essential personnel to either Monsanto Park, Luling or St. John the Baptist Catholic church, Edgard. The evacuation of onsite personnel at Waterford 3 will be facilitated by Waterford 3 Security personnel. The St. Charles Parish Emergency Director will provide direction to Waterford 1 and 2 on which evacuation routes to take to evacuate non-essential personnel (W3 EP-002-071: Site Protective Measures).

b. Evacuation of the General Public

- i. Evacuation of any affected sections within St. Charles Parish will be at the discretion and direction of the Parish President.

- ii. If a "State of Emergency" has been declared by the Governor, under the provisions of the Louisiana Homeland Security and Emergency Assistance and Disaster Act, the Governor would direct the evacuation jointly with the Parish President.
- iii. The basis for a decision to evacuate will be recommendations from Waterford 3 Steam Electric Station (W3SES) and the Secretary of LDEQ or designee based on accident assessment and operational considerations at the time of emergency.

If the order to evacuate is given, evacuation will be by Protective Action Area. Citizens residing in a given section and ordered to evacuate will be instructed to proceed according to predetermined evacuation routes. All evacuation routes will lead citizens toward a reception center. St. Charles Parish EOC will consider alternate routes as needed.

- iv. Evacuees from St. Charles Parish will initially report to the designated reception centers for registration, monitoring and decontamination (as required). If necessary, evacuees will then be routed to temporary shelters. Figure G-1 shows the location of the reception center and shelter areas.
- v. Resources available to assist in evacuation of affected Parish areas are maintained in Parish Implementing Procedures or Resource Data Books.
- vi. The primary means of evacuating residents, transients, and industrial workers from the 10-mile EPZ will be by private automobiles. Announcements will be made via the EAS requesting that car-pooling arrangements be implemented to accommodate those without transportation, and multiple-car families will be encouraged to take only one car to minimize traffic congestion. Designated pickup points for persons without private transportation are outlined in the W-3 Emergency Reference Information Brochure distributed to the public.
- vii. St. Charles Parish Planning is not restricted to only 10 mile radius. Historical data indicates number of persons without transportation would be approximately 2% of population.

c. Traffic Control

Strict traffic control measures will be utilized to:

- 1) control ingress and egress of affected areas;
- 2) maintain orderly flow of evacuated traffic;

- 3) remove impediments on evacuation routes;
 - 4) assure access by ambulance and rescue vehicles;
 - 5) assure area security.
- ii. Periodic patrols by law enforcement and/or other emergency personnel will canvas areas to:
 - 1) maintain order;
 - 2) assist disabled evacuees;
 - 3) confirm evacuation and remove remaining persons as required.
 - iii. More details on traffic and access control, including the flow chart which addresses the potential need to use alternate routes, can be found in the following procedures:
 - 1) St. Charles Parish Emergency Plan Implementing Procedure Law Enforcement Service
 - 2) St. Charles Parish Emergency Plan Implementing Procedure, Public Works
 - 3) Waterford 3 SES Traffic and Access Control Points map and index.
- d. Evacuation for Disabilities and Access/Functional Needs
- The Office of Emergency Preparedness Director will ensure that a current list of special-need evacuees is available. The Emergency Operations Center (EOC) will also ensure that special-needs people will be provided transportation as required. Disabled and access/functional need evacuees who are not evacuated by private vehicles will be evacuated by ambulance or mini-van. Specific information regarding the amount of time estimated for evacuation can be found in the Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report.
- e. Evacuation of Schools
- Protective response measures will be implemented to minimize radiological exposure risks to school children. The entire parish is generally evacuated if evacuation is necessary during an emergency. If

a decision to evacuate is made during school session, school children located within the 10-mile Emergency Planning Zone will be placed on school buses and transported outside the 10-mile Emergency Planning Zone to a designated Reception Center. Designated reception centers will register and perform monitoring and decontamination (as required). Children will remain under the supervision of school personnel until they are returned to their parents. Specific information regarding the amount of time estimated for evacuation can be found in the Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report

For more information, see:

- St. Charles Parish Emergency Plan Implementing Procedures, School Services, and
- St. Charles Parish Emergency Plan Implementing Procedures, Transportation Services.
- Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report

f. Evacuation of Medical Facilities

- Protective response measures for St. Charles Parish Hospital, the Luling Nursing Home and Evangeline of Ormond must be coordinated with the Parish EOC's Health/Medical Officer and the Louisiana Department of Health. Overall responsibility for appropriate action rests with the Administrator of each facility. Specific information regarding the amount of time estimated for evacuation can be found in the Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report.

g. Evacuation of Incarceration Facilities

The Nelson Coleman Correctional Center is located in Hahnville, approximately two miles from Waterford 3. Sheltering, respiratory protection, or the use of radioprotective drugs may be recommended as an alternative to evacuation depending upon the circumstances surrounding the accident.

The St. Charles Parish Sheriff is responsible for the protection of prisoners incarcerated in the Parish Correctional Center. The Sheriff will implement those actions necessary for the protection of prisoners. If an evacuation is recommended but cannot be immediately accomplished, the use of radioprotective drugs will be considered. These substances will only be administered to prisoners with the concurrence of the State Health Officer.

- If circumstances warrant, an evacuation of the Parish Correctional Center will be accomplished using designated transportation resources. Agreements have been reached with the Sheriffs of neighboring Parishes

and State Police for the transportation and confinement of prisoners during an evacuation. Specific information regarding the amount of time estimated for evacuation can be found in the Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report.

h. Evacuation of Major Industry and Parks

Major industries and industrial parks which lie within the 10-mile EPZ will be notified as outlined in Section F. No additional transportation is expected to be needed beyond vehicles already available at these locations at the time of an emergency.

FIGURE G-1

**St. Charles Parish
Reception Centers and Shelter Locations**

FIGURE G-1a

St. Charles Parish Reception Centers and Shelter Listing

<u>Support Parish</u>	<u>Reception Centers</u>
Tangipahoa	Chappapeela Sports Park 19325 Hipark Boulevard Hammond, LA
East Baton Rouge	Baton Rouge River Center 275 S River Road Baton Rouge, LA
Jefferson	Pontchartrain Center 4545 Williams Boulevard Kenner, LA
Jefferson	Alario Center 2000 Segnette Boulevard Westwego, LA
Lafourche	Lafourche Ag Center 115 Texas Street Raceland, LA

SHELTERS:

St. Charles and St. John the Baptist Parishes, as the 10-mile EPZ risk parishes during an emergency at Waterford 3 Steam Electric Station, will direct evacuees to reception centers located outside the 10-mile EPZ in support parishes. These support parishes include Tangipahoa, Jefferson, Orleans, East Baton Rouge and Lafourche.

Shelter assignments in the support parishes will be made by the host parish and will be determined as the need presents itself. Once shelter capacities have been reached, additional shelters will be opened to house the additional evacuees. The American Red Cross will be utilized as a secondary shelter provider. Shelter capacities are maintained by the host Parish and/or American Red Cross representatives, as applicable.

The support parish is responsible for managing its designated reception center, including staffing, registration, arrangements for handling students at the center and provisions for the radiological monitoring of evacuees. Students are under the supervision of their respective school until a parent or designee can take over the supervision.

H. Public Health Support

1. Reception and Care

Following decontamination, if necessary, at the reception center, an initial registration of evacuees will be accomplished by the Louisiana Department of Children and Family Services and/or Parish designees. Health and medical care will be provided to evacuees as necessary. Evacuees will be directed to shelters made available through the Parish and/or American Red Cross.

A second, more detailed registration of evacuees will be accomplished at the shelters by the Department of Children and Family Services. Registration data will be tabulated and submitted to the State Emergency Operations Center through WebEOC. Food, clothing, and health and medical care will be provided to the evacuees as needed. When the situation subsides, evacuees will be allowed to re-enter the affected area in accordance with procedures described in the General Plan.

2. Medical

Injured evacuees may be treated at the St. Charles Parish Hospital. Contaminated injured evacuees will be treated at West Jefferson Medical Center or Ochsner Medical Center, whose staff is equipped to handle contaminated individuals. In addition, St. Charles Parish Emergency Medical Services is trained in the transport of victims of radiological incidents.

Appendix II-2: List of St. Charles Standard Operating Procedures.

Appendix II-3: St. Charles Standard Operating Procedure NUREG 0654 Cross Reference.

APPENDIX I-1

Responsibilities for Radiological Emergency Implementing Procedures

Implementing Procedures have been prepared by functional areas. Staff responsibilities associated with functional areas are as follows. (Specific areas of responsibility/coordination appear in the appropriate Implementing Procedures.)

1. Public Alert/Notification
 - a. Parish President
 - b. Emergency Preparedness Director
 - c. School Services Officer
 - d. Health/Medical Officer
 - e. Law Enforcement Officer
 - f. Communication Officer

2. Public Information
 - a. Parish President
 - b. Emergency Preparedness Director
 - c. Public Information Officer

3. Radiological Exposure Control
 - a. Parish President
 - b. Emergency Preparedness Director
 - c. Radiological Officer

4. Transportation Services
 - a. Emergency Preparedness Director
 - b. Transportation Officer
 - c. School Services Officer
 - d. Health/Medical Officer

5. School Services
 - a. Emergency Preparedness Director
 - b. School Services Officer
 - c. Transportation Officer

6. Health and Medical Services
 - a. Emergency Preparedness Director
 - b. Health/Medical Officer
 - c. Transportation Officer
 - d. Radiological Officer

7. Fire Services
 - a. Emergency Preparedness Director
 - b. Fire Services Officer
 - c. Radiological Officer

8. Law Enforcement Services
 - a. Emergency Preparedness Director
 - b. Law Enforcement Officer
 - c. Radiological Officer
 - d. Public Works Officer

9. Public Works
 - a. Emergency Preparedness Director
 - b. Public Works Officer
 - c. Radiological Officer
 - d. Law Enforcement Services Officer

A. Introduction

This Enclosure together with the General Plan of Attachment 1, Louisiana Peacetime Radiological Response Plan, constitutes the entire planning document to guide the direction and control of local government responses to an emergency situation at Waterford-3 Steam Electric Station. This Enclosure addresses preparedness criteria and planning elements specific for St. John the Baptist Parish. It outlines the direction and control, the responsibilities for the performance of Parish emergency operations and support activities, the means for timely warning and protective actions as needed for citizens threatened by a release of radioactive material, and the means of integrating the actions of local government with those of the State of Louisiana, and Louisiana Energy Operations, Inc. (EOI).

Although the construction of nuclear power facilities provides substantial safeguards against the occurrence of radiological emergencies, this Enclosure provides an additional level of safety to ensure protection of the public through a coordinated emergency response by local government.

B. Authority

Authority for the development and implementation of this Enclosure is consistent with and pursuant to the provisions of St. John the Baptist Parish Civil Defense Ordinance of 1964, as amended.

C. Direction and Control

St. John the Baptist Parish, when affected by an emergency at Waterford 3 Steam Electric Station, is responsible for initial radiological emergency response operations within its jurisdiction. The Parish President has the authority to declare a State of Emergency for St. John the Baptist Parish giving him full control of emergency response. The Parish will coordinate such actions through its Director of Emergency Preparedness (DEP) and through the Parish emergency response organization. The DEP will provide the necessary direction and control to initiate actions and conduct emergency operations required to protect the population of St. John the Baptist Parish from an emergency at Waterford 3 Steam Electric Station. In his absence, responsibility will be delegated according to Parish procedures for continuity of Parish government.

The Emergency Operations Center (EOC) for St. John the Baptist Parish is located at, 1801 W. Airline Highway, LaPlace. The EOC contains an emergency communications center and provides adequate space for staff and equipment to perform ESF functions including but not limited to tables, telephones, computers (with internet access) and status boards. The Parish EOC has generators for backup power, as noted in St. John the Baptist Parish Emergency Operations Plan Standard Operating Procedure: Emergency Operations Center – Attachment 3:

EOC Activation – Enclosure 6. The St John the Baptist Parish alternate EOC is the St. James Parish EOC located at 5800 LA Hwy 44 in Convent, Louisiana. Generally, Staff assignments to the EOC may include representatives of the following:

1. Operations Staff

- Parish President
- Emergency Preparedness Director
- Emergency Preparedness Deputy Director(s)
- EOC Operations Officer
- Law Enforcement and Traffic Control Officer
- Communications Officer
- Fire and Rescue Officer
- Public Information Officer
- Health and Medical Officer
- Radiological Officer
- School Services Officer
- Transportation Officer
- Public Works Officer
- Public Utilities Officer

2. Resource Staff

- Resource Support Officer(s)
- Human Welfare Services Officer
 - Council on Aging Representative
 - American Red Cross Representative
- Damage Assessment Officer
- Finance and Logistics Officer
- Message Center Coordinator
- Operational and Support Assistants
- Parks and Recreation Department Representative
- Training Officer
- Planning Officer
- Communication Assistants and Amateur Radio Operators

- Technical Advisors, Engineer(s)
- State Liaison Representative(s):
 - Louisiana State Police
 - Governor's Office of Homeland Security & Emergency Preparedness
 - Louisiana Department of Environmental Quality
 - Louisiana Department of Health
 - Parish Health Unit Director
 - Louisiana Department of Children & Family Services
 - Louisiana Department of Agriculture and Forestry
 - USDA Parish Emergency Board Chairperson
 - Louisiana Department of Wildlife and Fisheries

State agency support and technical analysis will be provided through the Louisiana Department of Environmental Quality (LDEQ) and the Governor's Office of Homeland Security and Emergency Preparedness (GOHSEP). The LDEQ will be responsible for offsite radiological monitoring and analysis and protective action recommendations. The GOHSEP will coordinate all state resources through the appropriate state agencies. In the event the emergency situation is beyond local control and response capabilities, the Governor may issue a "Declaration of Emergency," whereby any or all emergency operations would then be under the direction of the Governor.

D. Organization and Responsibilities

Local organizations with emergency responsibilities are identified in the following sections. Each organization is responsible for assuring continuity of resources to support emergency operations for a protracted period. Each organization or suborganization having an operations role is responsible for maintaining its own Emergency Implementing Procedures (EIPs) which describe detailed emergency actions to be performed.

The relationships between the local organizations are graphically depicted in Figure D-1. As shown, local organizations are coordinated by the Parish Director of Emergency Preparedness with the exception of the Parish Health Unit, which is coordinated by the Louisiana Department of Health (LDH); Department of Children and Family Services (DCFS); and the American Red Cross; however, the DEP may provide limited coordination, if required by the circumstances at the time of the emergency, with the approval of the LDH and DCFS. The primary and support responsibilities of the local organizations for key emergency functions are specified in the Emergency Function and Responsibility Matrix shown in Figure D-2.

1. Local Government

a. Parish President

The St. John the Baptist Parish President has the following responsibilities.

- i. The safety and well being of persons in the Parish.
- ii. Maintenance and implementation of the St. John the Baptist Parish Radiological Emergency Response Plan through the Parish Department of Public Safety for response to an accident at Waterford 3 Steam Electric Station.
- iii. Initiating actions and providing direction and control at the local level.
- iv. Conducting emergency operations through the Director of Emergency Preparedness.
- v. Through the advice of LDEQ, authorizing emergency workers to incur exposure in excess of general public Protective Action Guidelines (PAGs).
- vi. Management of resources and facilities within the parish.
- vii. Liaison to state agencies, military and industry.
- viii. Designating a chief spokesperson and approving official news releases for the Parish.

b. The Parish Attorney is responsible for:

- i. Providing legal advice and counsel to the DEP in the

interpretation of Parish, State, and Federal law relating to disaster preparedness under a given circumstance.

- ii. Ensuring legality of any and all emergency laws and ordinances passed by the Parish Council.
- iii. Providing an emergency representative to the Parish EOC, as requested, during an emergency.

c. St. John the Baptist Parish Emergency Preparedness

The Emergency Preparedness Office, under the direction of the Director, is responsible for the development and maintenance of procedures to implement this plan.

- i. The Director of Emergency Preparedness is responsible for:

- 1) Acting as the Chief of Staff for the Parish President and directing and coordinating Parish emergency response to an accident at Waterford 3 Steam Electric Station.
- 2) Serving as the liaison between the Parish President and emergency response forces.
- 3) Supervising the development and maintenance of plans and procedures for Parish response to an accident at Waterford 3 Steam Electric Station, including:
 - a. quarterly verification and update of emergency implementing procedures contact numbers,
 - b. an annual review and update of emergency implementing procedures. See St. John the Baptist Parish Emergency Operations Plan; ESF #10; Emergency Management –Radiological Officer Procedures.
 - c. An annual review of the plan and certified to be current and;
 - d. an update of plans and agreements, as needed, taking into account issues identified in drills and exercises. LDEQ may assist the Coordinator in determining the issues which require a plan update and the options to correct those issues.
- 4) Supervising the development and

implementation of training and public information and education programs within the Parish.

- 5) Maintaining an adequate supply of radiation monitoring equipment through a program of equipment inspection, inventory, and operational checks. See St. John the Baptist Parish Standard Operating Procedure for additional information regarding the amounts of dosimeters and KI being stored at the EOC.
- 6) Maintaining an adequate supply of KI and ensuring the KI is stored at room temperature.
- 7) Developing and maintaining contracts and agreements necessary to implement the Parish radiological emergency response plan.
- 8) Ensuring the coordination of special facility (e.g., schools, nursing homes, jails, and industry) emergency procedures and protective actions with Parish plans in response to an accident at Waterford 3 Steam Electric Station.
- 9) Ensuring notification and coordination of all local agencies supporting emergency operations, as required, including the coordination with GOHSEP for activation and use of appropriate reception centers and shelters should an evacuation be necessary.
- 10) Coordinating overall emergency operations to protect life and property at the local level.
- 11) Coordinating with GOHSEP and LDEQ in supporting emergency operations at the local level.
- 12) Activating the public alert system, ensuring warning and notification of persons within the 10-mile EPZ, as necessary. For more information, see the St. John the Baptist Parish Emergency Operations Plan Standard Operating Procedure: Emergency Operations Center; ESF #5; Emergency Management; – Attachment 4: Public Alert/Notification.
- 13) Maintaining adequate communications to conduct and coordinate local emergency operations.

- 14) Coordinating with the Public Information Officer to disseminate public information.
 - 15) Appointing a Public Information Officer, Radiological Officer, Communications Officer, and Health/Medical Officer to assist him with certain functions.
- ii. The Public Information Officer is responsible for:
- 1) Participating in the Parish-level program aimed at educating the public on response to an accident at Waterford 3 Steam Electric Station.
 - 2) Providing liaison with news media organizations prior to and during an emergency.
 - 3) Assisting in preparation of news releases.
 - 4) Coordinating with the Joint Information Center.
- iii. The Radiological Officer is responsible for:
- 1) Establishing arrangements for the surveying and decontamination of emergency personnel and vehicles, and coordinating this effort with LDEQ.
 - 2) Distribution of dosimetry devices to emergency personnel and maintenance of related records.
 - 3) Ensuring that emergency personnel in the field are informed of radiological conditions and necessary protective actions, as necessary.
 - 4) Maintaining an inventory of radiological equipment within the parish.
 - 5) Gathering radiological information and keeping records on the radiological response efforts.
 - 6) Distribution of potassium iodide to emergency personnel and maintenance of related records.
- iv. The Communications Officer is responsible for:
- 1) Ensuring the maintenance and availability of communication equipment and all call lists necessary to provide alert/notification and communications support in an emergency.
 - 2) Initiating the communication of the alert/notification message to emergency response organizations.
 - 3) Establishing and maintaining a communications

system capable of linking the St. John the Baptist Parish EOC with Waterford 3 Steam Electric Station, State response agencies, Parish emergency response agencies, and with St. Charles Parish.

- 4) Recruiting and training radio operators and telephone attendants.
- 5) Ensuring staffing of the St. John the Baptist Parish E911 Communications Center is maintained 24 hours a day.

v. The Health/Medical Officer, under the direction of the Director, is responsible for:

- 1) Providing rescue and emergency medical services, including the transportation of victims of radiological incidents.
- 2) Providing transportation support for non-ambulatory evacuees.
- 3) Coordinating with hospitals from adjacent jurisdictions.
- 4) Coordinating with the Parish Health Unit and local medical practitioners.
- 5) Providing medical services assistance to other W3P, as needed.
- 6) Maintaining communications with the Parish Sheriff's Office.

d. Sheriff's Office

The Sheriff's Office is the primary law enforcement and traffic control agency within St. John the Baptist Parish. The Sheriff, as the Chief Law Enforcement Officer, will be responsible for:

- i. Managing the evacuation of portions of the Parish within the 10-mile EPZ.
- ii. Direction and control of traffic within the Parish.
- iii. Direction and control of traffic coming from other W3P in transit to reception centers in nearby support parishes.
- iv. Preservation of law and order.
- v. Instituting access control and area security.
- vi. Assisting in performing search and rescue work, as required.

- vii. Assisting in warning residents and transients, as required.
- viii. Providing assistance to, and liaison with outside law enforcement agencies, as required.
- ix. Coordination with local and state law enforcement agencies to provide emergency support operations.
- x. Emergency communications support.
- xi. Providing a representative to the parish EOC, as requested, during an emergency.
- xii. Providing protective measures for parish prison inmates.

e. Volunteer Fire Departments

The Volunteer Fire Departments within St. John the Baptist Parish support Emergency Preparedness by providing technical assistance, manpower, and equipment to aid disaster victims within the Parish. Under the direction of the respective Chiefs, the Volunteer Fire Departments are responsible for:

- i. Providing fire and rescue aid.
- ii. Assisting in warning and notification of the public within the EPZ, if needed.
- iii. Providing rescue and emergency medical services.
- iv. Assisting in radiological monitoring and decontamination of evacuees and emergency personnel and vehicles as necessary.
- v. Providing a representative to the EOC, as requested, during an accident.

f. School Board

The Parish School Board, under the direction of the Superintendent, and private school principals, are responsible for:

- i. Providing school buses and drivers for evacuation of students and school personnel from schools (when school is in session).
- ii. Providing transportation for assisting evacuation of residents and transients from the affected areas.
- iii. Establishing arrangements for the care of school students at reception centers or host schools until students are picked up by parents.

- iv. Maintaining communications with the Parish EOC on operations and support needs and coordinating with other agencies on support services.
- v. Providing a School Services Officer to the Parish EOC, as requested, during an accident.

g. St. John the Baptist Parish Public Works Department

The St. John the Baptist Parish Public Works Department, under the direction of the Director, is responsible for:

- i. Assisting in traffic control and re-entry/recovery operations by providing signs and barriers.
- ii. Coordinating resources available to the Parish.
- iii. Providing highway maintenance and clearing impediments to allow road passage.
- iv. Coordinating with the State Department of Transportation and Development and Office of Highways personnel for additional assistance as required.
- v. Providing personnel with knowledge of the area to act as guides for LDEQ response personnel (field teams), as necessary.
- vi. Providing an emergency representative to the Parish EOC, as requested, during an accident.

2. Parish-Level State Support Agencies

a. Parish Health Unit (LDH)

In conjunction with the Louisiana Department of Health, the Director of the Parish Health Unit is responsible for:

- i. Assisting in the coordination of required medical services.
- ii. Assisting with expedient acquisition of radio-protective drugs (i.e., KI) and for their use by emergency works and institutionalized persons, if required.
- iii. Assisting in collection of water and milk samples, and transportation of such samples for laboratory analysis.
- iv. Maintaining communications with the Parish EOC on operations and support needs and coordinating with other agencies on support services as needed.
- v. Providing an emergency representative to the Parish EOC, as requested, during an emergency.

- vi. In coordination with the FDA, providing for the collection of water, milk, sewage, and food samples from food processing plants, and for the transportation of such samples for laboratory analysis, during a radiological emergency.
- vii. In coordination with the Department of Agriculture and Forestry, USDA, and LDEQ, when requested, providing guidance and advice on identifying storing and disposing of contaminated agricultural products.
- viii. In coordination with the FDA, providing guidance for the diversion or destruction of radiologically contaminated food, crops, and milk during an accident.
- ix. Providing for the inspection of shelter facilities to ensure that adequate sanitary, water, and food service is available for the number of people assigned.
- x. Providing guidance and advice to water purification facilities of an accident and advice on the appropriate protective action.
- xi. Supporting the relocation of hospital patients from hospitals within the risk areas to identified support hospitals, during an accident.
- xii. Assisting in the provision of mass emergency medical transportation resources to be used for the relocation of hospital patient during an accident.
- xiii. Supporting risk health care facilities and risk Parishes with identification and coordination of medical resources.

b. Parish Extension Service

The St. John the Baptist Parish Extension Service, under the direction of the County Agent, in cooperation with the State Department of Agriculture & Forestry and USDA, is responsible for:

- i. Providing general assistance and coordination with USDA federal disaster assistance programs to include crop loss, livestock feed, and other emergency measures as applicable.
- ii. Disseminating agricultural advisories to affected Parish farmers and other agribusinesses during an accident at Waterford 3 Steam Electric Station.
- iii. Assessing damage to Parish crops and livestock in the event of an emergency.

c. State Police (Troop B)

In conjunction with the State Department of Public Safety and Corrections, the State Police, under the direction of the Troop Commander, will be responsible for the following:

- i. In coordination with the Sheriff, assisting in traffic control operations during an evacuation, particularly on State or Federal highways.
- ii. In coordination with the Sheriff, assisting in establishing access control to affected areas.
- iii. In coordination with the Sheriff, assisting in security and law enforcement support for affected areas.
- iv. Providing communications support, if necessary.
- v. Providing a representative in the Parish EOC, as requested, to coordinate State Police support with the State EOC.

3. Other Organizations

a. Ochsner Medical Complex

Ochsner Medical Complex, under the direction of the Administrator, is responsible for:

- i. Providing health and medical care services to non-contaminated injured individuals. The primary hospital for medical support for contaminated injured persons will be provided by Ochsner Medical Center or West Jefferson Medical Center. The secondary or backup hospital is Our Lady of the Lake Regional Medical Center.
- ii. Maintaining current emergency management plans and procedures that are consistent with Parish emergency plans and implementing procedures.

b. Twin Oaks Nursing Home

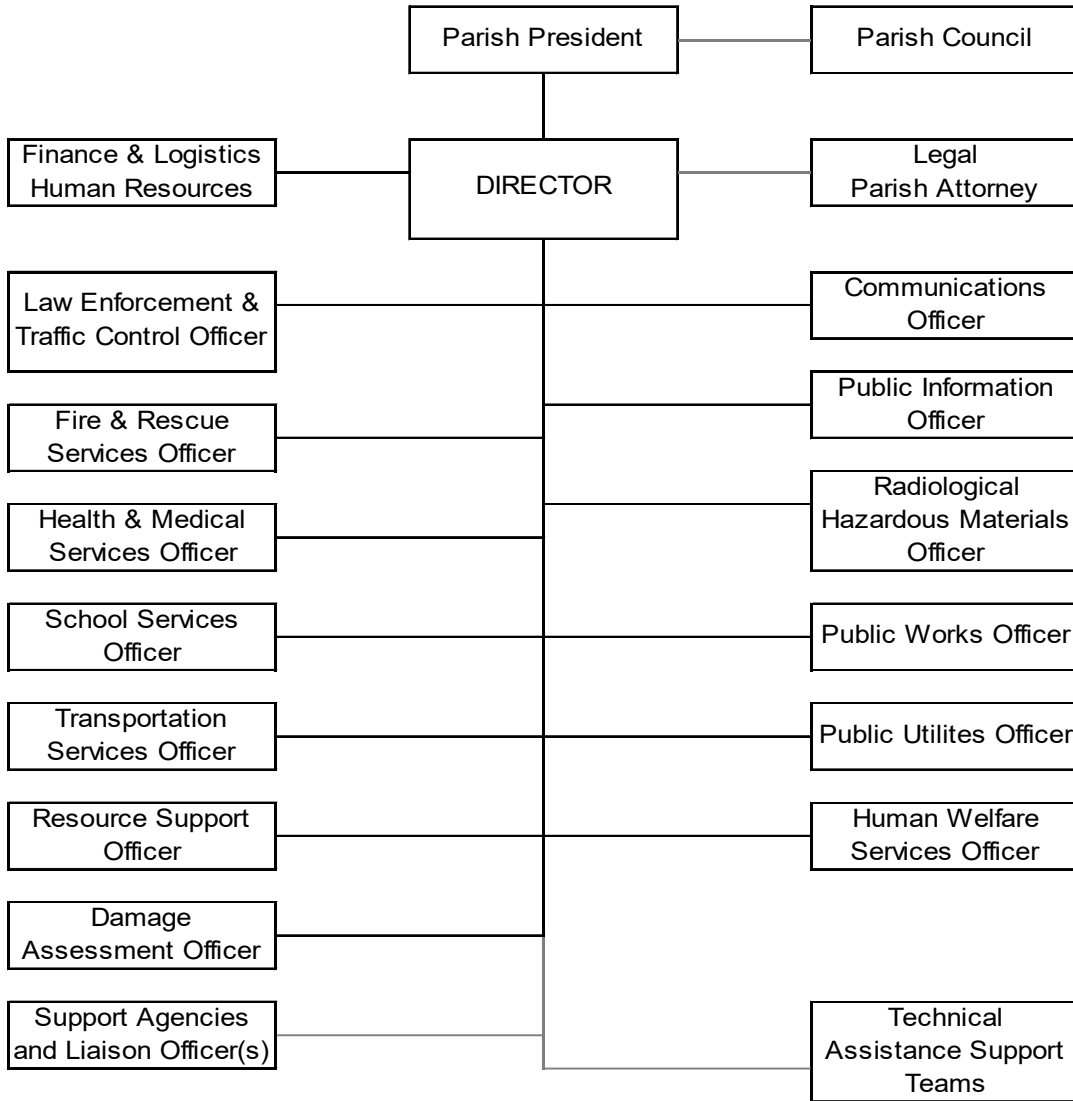

The Twin Oaks Nursing Home, under the direction of the Administrator, is responsible for maintaining current emergency management plans and procedures that are consistent with Parish emergency plans and implementing procedures.

c. Southeast Louisiana (SELA) War Veterans Home

The SELA War Veterans Home, under the direction of the Administrator, is responsible for maintaining current emergency management plans and procedures that are consistent with Parish emergency plans and implementing procedures.

E. Notification and Activation

Once an emergency classification has been declared at W-3, the Control Room will notify the Parish warning points. Shifts of dispatchers at the Parish Communication Center will provide for 24-hour per day coverage of the communications equipment. Notification messages, including those received from entities other than the licensee, will be verified by the dispatcher in accordance with established procedures. The primary means of notification is the Internet- based Electronic Notification System; 2) the Waterford 3 Operational Hotline; 3) the commercial telephone system; and 4) the Emergency Preparedness Radio System (See Section F - Emergency Communications).

When the Communications Center in the Parish EOC is activated, the Parish's responsibility for receiving notifications will shift to the EOC Communications Center.

This emergency response plan will be activated by the Parish President through the DEP. Local response organizations will be notified of the emergency by the Parish. Such notification messages will specify whether the organization is to standby, or start to mobilize emergency response personnel. Emergency response personnel will be called to duty using the alert/notification call system of the response agency. Support agencies will be alerted by the agency they are supporting. Should mobilization be required, emergency response personnel will report to their agency response center for specialized equipment and further instructions.

During an emergency at W3SES, St. John the Baptist Parish will not send personnel to the W3SES EOF.

A roster of emergency personnel contacts are located in the St. John the Baptist Parish Emergency Operations Plan, Emergency Operations Center Standard Operating Procedure, Attachment 1, Staff Notification Procedure. Upon arrival of the key staff defined in this procedure, the EOC is declared operational.

- The sequences for anticipated notifications and activation of emergency response personnel for each emergency classification are provided below. Details of notification and activation consistent with the emergency classification scheme are provided in established procedures.

1. Unusual Event

a. Notification

Upon receipt of a classification of Unusual Event by W-3, the Public Safety Dispatcher will notify the DEP and other key individuals consistent with this classification and in accordance with established procedures utilizing the paging system described in Section F. During normal working hours, notification is simultaneous to the Emergency

Operation Center and the Parish Communication Center; after normal hours, the Public Safety Dispatcher provides notification to the Director of Emergency Preparedness.

b. Activation

No activation of emergency response personnel or emergency facilities is anticipated for the Event. However, such action can be taken if deemed appropriate at the time. The DEP will monitor the situation and be prepared to escalate to a higher level of response if the situation warrants, or standby until closeout of the emergency.

2. Alert

a. Notification

Upon receipt of a classification of Alert by W-3, the Public Safety dispatcher will notify the DEP (if not previously notified), other key individuals, and other supporting response organizations consistent with this classification and in accordance with established procedures utilizing the paging system described in Section F. The organizations will, in turn, alert to a standby status those emergency personnel in their respective organizations by telephone or two-way radio. Radio stations WWL-AM/ WLMG-FM (the EAS station for St. John Parish) will be alerted to standby by the EOC. For more information, see St. John the Baptist Parish Emergency Operations Plan Standard Operating Procedure: Emergency Operations Center; ESF #5; Emergency Management; Attachment 2–Communications Procedure and Attachment 15- Public Information.

b. Activation

Upon notification, the DEP and key staff will augment the Parish's emergency response resources by bringing the Parish EOC to a standby status and activating the Communications Center with the Parish EOC. All supporting response organizations will maintain standby status until closeout or escalation of the emergency.

3. Site Area Emergency

a. Notification

Upon receipt of a classification of Site Area Emergency by W-3, the Public Safety dispatcher will notify the DEP (if not previously notified), other key individuals, and other supporting response organizations consistent with this classification and in accordance with established

procedures. The paging system described in Section F will be utilized. The organizations will, in turn, notify key emergency personnel in their respective departments by telephone or two-way radio. Radio stations WWL-AM/WLMG-FM (the EAS radio station) will be notified and brought to standby status (if not previously alerted) and, if appropriate, given messages to broadcast consistent with the situation via St. John the Baptist Parish EOC.

b. Activation

Upon notification, the DEP will activate the Parish EOC and other emergency response centers as appropriate. The EOC Staff and resource staff will be activated for protracted (12 hour shifts) operations. The Operations Staff Officer will implement duty roster for extended stay for EOC Staff and support personnel. A Parish representative may be dispatched to the Waterford 3 EOC if the DEP feels conditions warrant such action at this time. All local emergency response organizations will report to their duty stations. Traffic control and transportation support personnel will prepare for possible evacuation and reception centers will prepare for opening should conditions warrant. Radio station WWL-AM/WLMG-FM (the EAS station for St. John Parish) will provide the public in the affected areas of St. John the Baptist Parish out to a 10-mile radius of Waterford 3 with periodic updates of the emergency.

4. General Emergency

a. Notification and Activation

Upon receipt of a classification of General Emergency by Waterford 3, the Public Safety dispatcher will notify the DEP (if not previously notified), other key individuals, and other supporting response organizations in accordance with established procedures, and emergency response centers will be activated. The Alert Notification System will be activated in the Parish.

b. All other response actions will be as for a Site Area Emergency.

5. Notification of the Public

a. The primary alert system for St. John the Baptist Parish is comprised of a combination of fixed sirens, helicopters fitted with mounted alerting devices, the Industrial Mutual Aid Radio net, cable TV override, automatic telephone dialing devices, school board radios, and the U.S. Coast Guard for the notification of ships along with the Mississippi River.

- b. Upon determination that conditions at Waterford 3 warrant protective actions, the DEP will issue instructions for the activation of the primary alert system.
- c. Should an element of the primary alert system fail, the DEP has available a number of backup methods including route alerting in populated and wetland areas and commercial telephone.
- d. St. John Parish will contact WWL-AM/WLMG-FM Newsroom Hotline for release of EAS messages. The Hotline is assessible 24 hours a day, 7 days a week.
- e. The default rebroadcast time for St John Parish is 15 minutes, however, circumstances could dictate a shorter or longer rebroadcast frequency, at the discretion of the St. John Parish DEP.

F. Emergency Communications

This section describes the various communications systems available for prompt communications among principal organizations and emergency personnel, and to the public. See the St. John the Baptist Parish Emergency Operations Plan Standard Operating Procedures: ESF #5 Emergency Management] – Attachment 2–Communications Procedure and ESF #15 -Public Information Procedures. A summary of communications systems available is shown in Figure F-1.

The Parish EOC provides the focus of communications for emergency operations. Direction, control and coordination emanates from the EOC through the Parish President and the DEP. Data and feedback relevant to the administration of emergency operations will be directed to the EOC.

1. W3SES Notification System

The primary means of 24-hour per day notification and communication between W3SES and the St. John the Baptist Parish emergency response organization is an Internet-based Electronic Notification System. The Operational Hotline is also utilized, which allows St. John the Baptist Parish, the other W3P, LDEQ and GOHSEP to receive emergency notification messages from W3SES simultaneously.

Locations equipped with a the Internet-based Electronic Notification System/W3SES Operational Hotline include, but are not limited to, the following:

- W3SES Control Room
- W3SES Technical Support Center (TSC)
- W3SES Emergency Operations Facility (EOF)
- W3SES Back Up EOF
- St. John the Baptist Parish EOC
- St. John the Baptist Parish E-911 Communications Center.
- St. Charles Parish
- St. Charles Parish 911 Center
- LDEQ/REP&R Office, Baton Rouge
- GOHSEP EOC, Baton Rouge

The Internet-based Electronic Notification System is backed up by a W3SES Operational Hotline and dedicated telephone system. The EOC provides 24-hour per day monitoring within the Parish. The 911 Center is used as a backup.

In addition, the capability exists for W3 to transmit hard-copies of emergency information to the St. John the Baptist Parish EOC, the GOHSEP EOC, and the LDEQ Office. Types of information that can be received on hard-copy include initial and follow up notification messages, plant status, release information, dose projections, protective action recommendations, and press releases.

Upon receiving notification of an emergency at Waterford 3, the Parish Dispatcher will notify key emergency personnel within the St. John the Baptist Parish Emergency Organization. The Parish Public Safety Dispatcher will activate the EOC when an Alert, SAE, or GE is declared, or as directed by the Director of St. John the Baptist Parish OHSEP. Additional information regarding staff and contact information of individuals needing to be notified/activated can be found in the St. John the Baptist Parish Implementing Procedure: Staff Notification.

2. Back-up Communication System

The Emergency Preparedness Radio System serves as a backup communications system to the Internet-based Electric Notification System. A receive-transmit console is available at the same locations listed above. DEP will provide 24-hour per day monitoring of the Emergency Preparedness Radio System within the Parish. The Emergency Preparedness Radio System also serves as an alternate communication system to the commercial telephone for communicating with other W3P, LDEQ and GOHSEP.

3. Parish Radio Systems

Fixed, mobile and hand-held radios operating on various frequencies provide for communication between the Parish EOC and representatives from the following organizations (see also Figure F-1):

- Sheriff's Office
- Mutual Aid Industrial Plants
- Volunteer Fire Departments
- Hospitals
- Parish Public and Private Schools
- Emergency Medical Services
- State Police
- Parish Public Works and Public Utilities

4. Medical Support Facilities Communications Systems

A coordinated communications link for the Parish EOC, hospitals, and ambulances are provided by Emergency Medical Services and Fire/Rescue Communications Systems. These systems are comprised of either fixed/mobile radios or commercial telephones.

5. Commercial Telephone

Commercial telephone service is available at each emergency response facility. It can also be used as an alternate communication system. The Parish is primarily serviced by AT&T and Reserve Telecommunications (RTC) systems. Total breakdown is backed up by special lines outside the normal systems.

St. John the Baptist Parish has requested priority from AT&T and RTC for restoring service provided in the Parish EOC.

6. Paging System

Key emergency personnel in the emergency response organizations and supporting emergency personnel can be contacted through the paging system.

7. Alert Notification System

An Alert Notification System located throughout the 10-mile EPZ will be used to alert the public to listen to the radio station WWL-870 AM and WLMG-101.9 FM (the EAS radio stations). That portion of the system located within St. John the Baptist Parish will be activated from the Parish EOC. This system is maintained by Waterford 3. For more information, see the St. John the Baptist Parish Emergency Operations Plan Standard Operating

Procedure: Emergency Operations Center [ESF #5 Emergency Management] – Attachment 4: Public Alert/Notification.

Special notification devices, such as automatic telephone dialing systems, are provided for special facilities including schools, hospitals, and major employers. Facilities with special notification devices are shown in Figure F-2. When activated, the DEP can provide information and instructions over the system.

Mobile sirens and public address systems mounted on patrol cars, fire department and other emergency vehicles, and helicopters could provide backup to the Alert Notification System.

8. Testing

Periodic testing of emergency communications and the Alert Notification System is conducted on a regularly scheduled basis (approximately monthly) in accordance with established procedures. For more information see LPRRP, Basic Plan, Chapter 4, Section IV, and St. John the Baptist Parish Emergency Operations Plan Standard Operating Procedure: Emergency Operations Center [ESF #5 Emergency Management] – Attachments 2– Communications and 4- Public Alert/Notification.

Industrial Mutual Aid Radio System

Automatic telephone dialer includes day care centers, special facilities (nursing home, elderly high rise, etc.), private and parochial schools, which are not included on parish radio system and industries with high level background noise. Additionally, automatic telephone dialing devices include the parish's residential and commercial telephone database and this means may be used as a notification backup

Special facilities are listed in the St. John the Baptist Parish Emergency Operations Plan, Emergency Operations Center Standard Operating Procedure.

G. Protective Response for the Plume Exposure Pathway (10 Mile EPZ)

1. Waterford 3 Steam Electric Station (W3SES) will simultaneously notify the Parish and State agencies of protective action recommendations based on accident conditions.

LDEQ will provide an independent assessment and protective action recommendations to the LDEQ Secretary or designee, who will coordinate with GOHSEP on the efficacy of proposed recommendations.

2. The Parish will make a decision on the implementation of these recommendations based on local conditions.
3. St. John the Baptist Parish will coordinate operational elements for implementation of the protective response recommendation with GOHSEP as appropriate to the situation.
4. Predetermined protective actions may be taken when the projected dose at any place and time appears to be at or above those recommended in Protective Action Guides (PAGs).

The Parish and the 10-mile EPZ have been divided into Protective Response Areas (PRA) for designation of threatened areas and to denote where protective actions are to be taken. Tab A to Appendix B in Attachment 1 address the PAS in detail.

5. Protective Actions

Actions taken to protect the public may include any or all of the following:

- a. An advisory Monitor and Prepare
- b. Notification of affected residents and transients to seek immediate shelter,
- c. Evacuation of transients and residents within a designated Protective Action Section to reception centers or shelter areas outside the ten mile EPZ,
- d. Control of entrance into affected areas,
- e. Implementation of respiratory protective procedures: people within the risk area will be advised to cover their noses and mouths with handkerchiefs, cloth, or other protective materials, and to limit air intake from heating or cooling systems if they take in outside air.
- f. Implementation of procedures to prevent the consumption and distribution of contaminated food and water supplies,

- g. Implementation of procedures to decontaminate persons when necessary.

Precautionary protective actions can be taken in advance of a release or a declaration of a General Emergency (GE). These actions can include, but are not limited to, the closing off of waterways and the evacuations of schools, nursing homes, and/or other special facilities, etc.

6. Monitor and Prepare

If current conditions at the nuclear power plant do not warrant an evacuation, but there is a possibility that an evacuation or other protective action may be warranted later as the situation develops, the public in the affected sections will be advised to Monitor and Prepare, that is, to stay tuned to TV, radio and other media to keep informed of any future protective action decisions, and to prepare for the possibility of evacuation, Shelter in-place, or other protective actions.

7. Control of Entrance into Affected Areas

Under certain conditions, action will be taken to limit the number of people who enter an affected area. These conditions will be determined by the Parish President upon recommendations from LDEQ. The Parish Sheriff's Office will provide support to control access with assistance as requested from Louisiana State Police.

For more information, see the St. John the Baptist Emergency Operations Plan, Standard Operating Procedure, Law Enforcement & Traffic Control.

8. Sheltering (in-place)

The decision to recommend taking shelter indoors will be made by the Parish President through the advice of LDEQ. The notification to take shelter indoors will be issued via the Alert Notification System and the EAS.

9. Evacuation

a. Evacuation of the Utility

In the event of an evacuation at W3SES, the St. John the Baptist Parish Sheriff's Department is responsible for traffic control per St. John the Baptist Parish Radiological Emergency Implementing Procedure: Law Enforcement and Traffic Control. Waterford 3 evacuates all non-essential personnel to either Monsanto Park, Luling or St. John the Baptist Catholic church, Edgard. The evacuation of onsite personnel at Waterford 3 will be facilitated by Waterford 3 Security personnel. The St. John the Baptist Parish Emergency Director will provide direction to Waterford 1 and 2 on which evacuation

routes to take to evacuate non-essential personnel (W3 EP-002-071: Site Protective Measures).

b. Evacuation of the General Public

- i. Evacuation of any affected sections within St. John the Baptist Parish will be at the discretion and direction of the Parish President.
- ii. If a "State of Emergency" has been declared by the Governor, under the provisions of the Louisiana Homeland Security and Emergency Assistance and Disaster Act, the Governor would direct the evacuation jointly with the Parish President.
- iii. The basis for a decision to evacuate will be recommendations from Waterford 3 Steam Electric Station (W3SES) and LDEQ based on accident assessment and operational considerations at the time of emergency.
- iv. If the order to evacuate is given, evacuation will be by Protective Action Section. Citizens residing in a given section and ordered to evacuate will be instructed to proceed according to predetermined evacuation routes. All evacuation routes will lead citizens toward a reception center. St. John the Baptist Parish EOC will consider alternate routes as needed.
- v. Evacuees from St. John the Baptist Parish will initially report to the designated reception centers for registration, monitoring and decontamination (as required). If necessary, evacuees will then be routed to temporary shelters. Figure G-1 shows the location of the reception centers and shelter areas.
- vi. Resources available to assist in evacuation of affected Parish areas are maintained in Parish Implementing Procedures or Resource Data Books.
- vii. The primary means of evacuating residents, transients, and industrial workers from the 10-mile EPZ will be by private automobiles. Announcements will be made via the EAS requesting that car-pooling arrangements be implemented to accommodate those without transportation, and multiple-car families will be encouraged to take only one car to minimize traffic congestion. Designated pickup points for persons without private transportation are outlined in the W-3 Emergency Reference Brochure distributed to public.

c. Traffic Control

i. Strict traffic control measures will be utilized to:

- 1) control ingress and egress of affected areas;
- 2) maintain orderly flow of evacuated traffic;
- 3) remove impediments on evacuation routes;
- 4) assure access by ambulance and rescue vehicles;
- 5) and assure area security.

ii. Periodic patrols by law enforcement and/or other emergency personnel will canvass areas to:

- 6) maintain order;
- 7) assist disabled evacuees;
- 8) confirm evacuation and remove remaining persons as required.

iii. More details on traffic and access control, including the flow chart which addresses the potential need to use alternate routes, can be found in the following procedures:

- 9) St. John the Baptist Emergency Operations Plan, Standard Operating Procedure, Law Enforcement & Traffic Control.
- 10) St. John the Baptist Emergency Operations Plan, Standard Operating Procedure, Public Works.
- 11) Waterford 3 SES Traffic and Control Points map and index.

d. Evacuation for Disabilities and Access/Functional Needs

- Emergency Preparedness will maintain a current list of special-need evacuees. Emergency Preparedness will coordinate with all available transportation providers for the special-need transportation resources of these persons. Specific information regarding the amount of time estimated for evacuation can be found in the Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report.

For more information, see the St. John the Baptist Emergency Operations Plan:

- Standard Operating Procedure, Health Services, and
- Standard Operating Procedure, Transportation Services.
- Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report

e. Evacuation of Schools

- Protective response measures will be implemented to minimize radiological exposure risks to school children. The entire parish is generally evacuated if evacuation is necessary during an emergency. If a decision to evacuate is made during school session, school children located within the 10-mile Emergency Planning Zone will be placed on school buses and transported outside the 10-mile Emergency Planning Zone to a designated Reception Center. Designated reception centers will register and perform monitoring and decontamination (as required). Children will remain under the supervision of school personnel until they are returned to their parents. Specific information regarding the amount of time estimated for evacuation can be found in the Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report.

For more information, see the St. John the Baptist Emergency Operations Plan:

- Standard Operating Procedure, School Services, and
- Standard Operating Procedure, Transportation Services.
- Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report

f. Evacuation of Medical Facilities

Protective response measures for Ochsner Medical Complex, Twin Oaks Nursing Home, and the Southeast Louisiana War Veterans Home must be coordinated with the Parish EOC's Health/Medical Officer and the Louisiana Department of Health. Overall responsibility for appropriate actions rests with the Administrator of each facility.

Pre-designated reception facilities are identified in facility emergency plans and Parish implementing procedures.

- For more information, see the St. John the Baptist Emergency Operations Plan, Standard Operating Procedure, Health Services. Specific information regarding the amount of time estimated for evacuation can be found in the Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report.

g. Evacuation of Incarceration Facilities

The Parish Prison is located in LaPlace, approximately 5.7 miles from Waterford 3. Sheltering, respiratory protection, or the use of radioprotective drugs may be recommended as an alternative to evacuation depending upon the circumstances surrounding the accident.

The St. John the Baptist Parish Sheriff is responsible for the protection of prisoners incarcerated in the Parish Prison. The Sheriff will implement those actions necessary for the protection of Parish Prison prisoners. If an evacuation is recommended but cannot be immediately accomplished, the use of radioprotective drugs will be considered. These substances will only be administered to prisoners with the concurrence of the Secretary of LDEQ, his Official Designee, and the State Health Officer.

- If circumstances warrant, an evacuation of the Parish Prison will be accomplished using designated transportation resources. Agreements have been reached with the Sheriffs of neighboring Parishes and State Police for the transportation and confinement of prisoners during an evacuation. Specific information regarding the amount of time estimated for evacuation can be found in the Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report.

For more information, see the St. John the Baptist Emergency Operations Plan:

- Standard Operating Procedure, Health Services
- Standard Operating Procedure, Law Enforcement & Traffic Control
- Waterford 3 Evacuation Time Estimates (ETE) 5-03 Report

h. Evacuation of Major Industry and Parks

Major industries and industrial parks which lie within the Parish portion of the 10-mile EPZ will be notified. No additional transportation is expected to be needed beyond vehicles already available at these locations at the time of an emergency.

For more information, see the St. John the Baptist Emergency Operations Plan:

- Emergency Operations Center Standard Operating Procedure, Attachment 4, Public Alert/Notification

FIGURE G-1
St. John The Baptist Parish
Reception Centers and Shelter Locations

FIGURE G-1a

St. John The Baptist Parish Reception Centers and Shelter Locations

RECEPTION CENTERS:

<u>Support Parish</u>	<u>Reception Centers</u>
Tangipahoa	Chappapeela Sports Park 19325 Hipark Boulevard Hammond, LA
East Baton Rouge	Baton Rouge River Center 275 S River Road Baton Rouge, LA
Jefferson	Pontchartrain Center 4545 Williams Boulevard Kenner, LA
Jefferson	Alario Center 2000 Segnette Boulevard Westwego, LA
Lafourche	Lafourche Ag Center 115 Texas Street Raceland, LA

SHELTERS:

St. Charles and St. John the Baptist Parishes, as the 10-mile EPZ risk parishes during an emergency at Waterford 3 Steam Electric Station, will direct evacuees to reception centers located outside the 10-mile EPZ in support parishes. These support parishes include Tangipahoa, Jefferson, Orleans, East Baton Rouge and Lafourche.

Shelter assignments in the support parishes will be made in conjunction with American Red Cross. Shelter capacities are maintained by American Red Cross representatives.

The support parish is responsible for managing its designated reception center, including staffing, registration, arrangements for handling students at the center and provisions for the radiological monitoring of evacuees. Students are under the supervision of their respective school until a parent or designee can take over the supervision.

H. Public Health Support

1. Reception and Care

Following decontamination (if necessary) at the reception center, an initial registration of evacuees will be accomplished by the Louisiana Department of Children and Family Services and/or Parish designees. Health and medical care will be provided to evacuees as necessary. Evacuees will be directed to shelters made available through the Parish and/or American Red Cross.

A second, more detailed registration of evacuees will be accomplished at the shelters by the Department of Children and Family Services. Registration data will be tabulated and submitted to the State Emergency Operations Center through WebEOC. Food, clothing, and health and medical care will be provided to the evacuees as needed. When the situation subsides, evacuees will be allowed to re-enter the affected area in accordance with procedures described in the General Plan.

2. Medical

Injured evacuees may be treated at the Ochsner Medical Complex. The primary hospital for medical support for contaminated injured persons will be provided by Ochsner Medical Center or West Jefferson Hospital. The secondary or backup hospital is Our Lady of the Lake Regional Medical Center.

- Appendix II-1:** Responsibilities for Radiological Emergency Implementing Procedures.
- Appendix II-2:** List of St. John the Baptist Standard Operating Procedures.
- Appendix II-3:** St. John the Baptist Standard Operating Procedure NUREG-0654 Cross Reference.

APPENDIX I-1

Responsibilities for Radiological Emergency Implementing Procedures

Implementing Procedures have been prepared by functional areas. Staff responsibilities associated with functional areas is as follows. (Specific areas of responsibility/coordination appear in the appropriate Implementing Procedures.)

1. PUBLIC ALERT/NOTIFICATION
 - a. Parish President
 - b. Emergency Preparedness Director
 - c. Fire/Rescue Officer
 - d. School Services Officer
 - e. Health/Medical Officer
 - f. Law Enforcement and Traffic Control Officer
 - g. Public Information Officer
 - h. Warning Officer

2. PUBLIC WORKS
 - a. Emergency Preparedness Director
 - b. Public Works Officer
 - c. Law Enforcement Officer
 - d. Transportation Officer
 - e. Radiological Officer
 - f. Resource Officer

3. PUBLIC UTILITIES
 - a. Emergency Preparedness Director
 - b. Public Works Officer
 - c. Law Enforcement Officer
 - d. Transportation Officer
 - e. Radiological Officer
 - f. Resource Officer

4. RADIOLOGICAL EXPOSURE CONTROL
 - a. Parish President
 - b. Emergency Preparedness Director
 - c. Radiological Officer

5. SCHOOL SERVICES
 - a. Emergency Preparedness Director
 - b. School Services Officer
 - c. Transportation Officer

6. HEALTH AND MEDICAL SERVICES
 - a. Emergency Preparedness Director
 - b. Health/Medical Officer
 - c. Transportation Officer
 - d. Radiological Officer

7. TRANSPORTATION SERVICES
 - a. Emergency Preparedness Director
 - b. Transportation Officer
 - c. School Services Officer
 - d. Health/Medical Officer

8. PUBLIC INFORMATION
 - a. Parish President
 - b. Emergency Preparedness Director
 - c. Public Information Officer

9. FIRE AND RESCUE SERVICES
 - a. Emergency Preparedness Director
 - b. Fire/Rescue Officer
 - c. Radiological Officer

10. LAW ENFORCEMENT AND TRAFFIC CONTROL
 - a. Emergency Preparedness Director
 - b. Law Enforcement and Traffic Control Officer
 - c. Radiological Officer
 - d. Public Works Officer

11. Resources
 - a. Emergency Preparedness Director
 - b. Purchasing & Procurement
 - c. Public Works Officer
 - d. Public Utilities Officer
 - e. Health & Human Services

12. Damage Assessment
 - a. Emergency Preparedness Director
 - b. Damage Assessment Office
 - c. Law Enforcement and Traffic Control Officer
 - d. Fire/Rescue Officer
 - e. Public Works Officer
 - f. Public Utilities Officer
