I. Introduction

The Louisiana Department of Environmental Quality's (LDEQ) Intended Use Plan (IUP) for the Clean Water State Revolving Fund (CWSRF) is prepared in accordance with the provisions of Title VI of the Clean Water Act of 1987, the Federal Fiscal Year (FFY) 2016 Appropriations Act. This IUP is a required part of the process to request the Capitalization Grants, which will be matched with 20 percent in state matching funds. The FFY2016 grant allotment is \$14,688,000 requiring \$2,937,600 in state matching funds. This IUP describes LDEQ's intended uses for all funds available in the CWSRF program for State Fiscal Year (SFY) 2016, including the projects that LDEQ expects to provide financial assistance to in SFY 2016 and an overview of how the state will comply with federally mandated requirements.

The CWSRF program was established pursuant to Title VI of the Clean Water Act, as amended in 1987 (the Act). The CWSRF program presently operates under R.S. 30:2301-2306 (Act 296 of the 2010 Regular Session of the Louisiana Legislature). These statutes establish a state revolving loan fund capitalized by federal grants (Capitalization Grants for Clean Water State Revolving Funds, CFDA 66.458), by state funds when required or available, and by any other funds generated by the operation of the clean water revolving loan fund. LDEQ is authorized to engage in activities regarding the sums on deposit in, credited to, or to be received by the state revolving loan fund. The Financial Services Division and Business, Community Outreach & Incentives Division within LDEQ are responsible for the operations of the CWSRF program in the State of Louisiana. These divisions within LDEQ provide assistance to municipalities in developing, financing, and implementing wastewater treatment management plans. Engineering oversight, design review, and inspection services as well as environmental assessment services are provided by the Business, Community Outreach and Incentives Division and grant management, program administration, and financial services are provided by the Financial Services Division on eligible wastewater treatment projects. All efforts are directed toward improving water quality by assisting communities in providing wastewater treatment processes that meet established effluent limits and achieve the goals of the Clean Water Act.

Since the program's authorization, LDEQ has awarded over \$929,882,862 in assistance to over 119 borrowers in 209 loan agreements, including projects funded by the American Recovery and Reinvestment Act to small and large municipalities. In SFY2016, LDEQ expects to fund \$45 million in high-priority water quality projects.

How the CWSRF Program Operates

Every year since the inception of the CWSRF program, the federal government has appropriated funds for the CWSRF. These capitalization grants are distributed to states using a formula outlined in the Clean Water Act Amendments of 1988. Since 1989, the LDEQ has received \$455,166,923 in federal capitalization grants. In addition, as required by the legislation, the state of LDEQ has provided matching funds of over \$82,468,202 which is at least 20 percent of the capitalization grants.

II. State Fiscal Year 2016 Project Funding

LDEQ's FFY2016 capitalization grant is \$14,688,000. Congress has mandated that not less than 10 percent of the FFY2016 grant (at least \$1,468,800) be put towards projects that qualify under the Green Project Reserve. Congress has also mandated that not less than 10 percent of the FFY16 grant (at least \$1,468,800) in additional subsidization to be given. LDEQ plans to provide \$12,000,000 to East Baton Rouge with \$2,000,000 of it being for a green project. LDEQ also plans to provide \$1,567,067 in additional subsidization in SFY2016. Further, CWSRF projects funded in SFY2016, regardless of funding source, must pay their workers the federal Davis-Bacon wage rates for their job classification, and all iron and steel projects used in a project for the construction, alteration, maintenance or repair of a public water system or treatment work are produced in the United States unless it meets one of the exceptions noted in the Grant Agreement in accordance with the American Iron and Steel requirements. In SFY2016, LDEQ expects to finance at least 5 wastewater and storm water infrastructure and nonpoint source projects for \$45,000,000.

Figure 1 includes LDEQ's project funding list, or fundable list. These are the projects that LDEQ may fund in SFY2016. An expanded Project Priority List can be found in Appendix A. Project ranking criteria can be found in Appendix D.

Figure 1: List of Projects to be Funded SFY16

Figure 1: List of Projects to be Funded, SFY2016								Additional Subsidy			Green Project Reserve			
Rank	Recipient	LPDES Permit number	Category	Project Description	Total Assistance	Interest Rate	Term	Principal Forgiveness Amount	Sustainability Policy	Disadvantaged Community	Amount	Category2	Business Case Project?	Estimated Binding Commitment date
1	East Columbia Sewer District No. 1	LAG570172	212	Repair and upgrade various lift stations.	\$215,475	0.95%	20	\$215,475		Yes				10/1/2016
2	Oak Grove	LA0043648	212	Construct additional extended aeration treatment facility on existing site.	\$750,000	0.95%	20	\$412,500		Yes				6/30/2017
3	Bossier Parish	LA0126152	212	Extending collection system and constructing 2 lift stations	\$10,000,000	0.95%	20							12/1/2016
4	Baton Rouge	LA0036439	212	SSO Program including energy reduction through energy efficiency motors	\$12,000,000	0.95%	20				\$2,000,000	Energy Efficiency	Yes	12/1/2016
5	Ville Platte	LA0038814	212	Upgrade existing WWTP. Refurbish 20 sewer pumps. Sewer collection rehab and repair.	\$5,000,000	0.95%	20							12/1/2016
6	BREAUX BRIDGE	LA0033014	212	Treatment and Collection System Improvements	\$8,000,000	0.95%	20							12/1/2016
7	Bossier City	LA0039055	212	I/I Correction	\$10,000,000	0.95%	20							12/1/2016
8	Zwolle	LA0020354	212	Rehabilitation of existing sewer treatment facility.	\$1,059,440	0.95%	20	\$582,692		Yes				6/30/2017
9	Georgetown	LAG570190	212	Replacement / Rehabilitation of the wastewater treatment facilities	\$648,000	0.95%	20	\$356,400		Yes				6/30/2017
					\$47,672,915				\$1,567,067				\$2,000,000	

III. Short and Long Term Goals

LDEQ has developed short- and long-term goals for its CWSRF program. The short-term goals reflect goals for the SFY 2016.

Short-Term Goals

- **Goal:** *Provide principal forgiveness to a community or communities that could not otherwise afford the project.*
Congress has mandated that not less \$1,468,800 of the FFY2016 capitalization grant be allocated towards communities that could not otherwise afford the project. LDEQ will award \$1,567,067 in additional subsidization to 4 municipalities.
- **Goal:** *Fund green infrastructure, water and energy efficiency and environmentally innovative projects in an amount that is at least ten percent of the capitalization grant.*
Congress is expected to mandate that not less than 10 percent of the capitalization grant be allocated towards “Green Project Reserve” projects. LDEQ has identified one project that qualifies for the required green project reserve in the required amount. LDEQ has determined that the East Baton Rouge Parish Energy Efficiency Project will qualify for the Green Project Reserve.
- **Goal:** *Expedite project development and construction by encouraging recipients to begin construction within one year of placement in the Intended Use Plan.*
The LDEQ CWSRF program strives to reduce the time between project application and construction start-up to within one year of the capitalization grant award. The program will also aim to draw the federal capitalization grant funds as quickly as possible.
- **Goal:** *Provide outreach to municipalities across the state of Louisiana.*
Communicate the availability of the CWSRF Program by the LDEQ personnel through outreach to individual municipalities across the state of Louisiana, and participation in conferences or conventions, as well as promotion of the program via the LDEQ website. LDEQ personnel will present CWSRF program information, stressing nonpoint source pollution control and the protection of estuaries at a minimum of two (2) conferences and conventions during the year as well as put on a conference providing the municipalities and their consultants with information regarding our programs along with all of the requirements. The LDEQ will provide marketing materials such as brochures and promotional items. The CWSRF staff will be available to present information about the CWSRF program and obtain contacts for future meetings with potential borrowers. These conference events target local municipalities and local police juries with publicly owned wastewater treatment facilities. Additionally, during these conferences and conventions, the CWSRF staff will interact with representatives of the municipalities to discuss their respective needs.
- **Goal:** *Participate in the Louisiana Waste Water Joint Funding Committee (LWWJFC).*
The mission of the LWWJFC is to assist applicants in securing funding for water and wastewater projects. It is a joint effort between the Louisiana Community Development Block Grants, US

Department of Agriculture, Louisiana Department of Health and Hospitals (Drinking Water State Revolving Fund), and the LDEQ. The committee members will meet monthly throughout the year to review Intent-to-File applications and will review project information and determine which funding programs may provide assistance to the applicants.

- **Goal:** Close at least 5 loans totaling more than \$45 Million.
- **Goal:** Apply for the FFY 2016 Capitalization Grants in SFY 2016.
- **Goal:** Issue a Revenue Bond to provide matching funds for Federal Capitalization Grants as necessary.

Long-Term Goals

- **Goal:** Provide low-cost financing for important water quality projects while maintaining the perpetuity of the CWSRF. LDEQ uses a cash flow model to guide decisions on funding levels, interest rates and other financing terms. LDEQ looks to balance the goals of maximizing subsidies while maintaining the fund in perpetuity.
- **Goal:** Promote and advance wastewater treatment facility improvements in order to meet the requirements of the CWA through compliance assistance. Provide financial assistance to municipalities and other eligible recipients in pursuing statewide compliance with Federal and State water quality standards, assist borrowers in complying with the enforceable requirements of the CWA and to reach the goal of eliminating discharge of pollutants that exceed the standards into the State's waters.
- **Goal:** Expand CWSRF accessibility by creating financial assistance programs that address nonpoint source control and other nontraditional CWSRF projects. LDEQ has been successful in bringing important nonpoint source and other nontraditional CWSRF projects to the program. Many of these projects have special challenges in obtaining financing (outside of grants) due to a lack of user revenues. Financing options will be continually evaluated to help ensure that these projects can continue to come to the program for cost-effective financing.

IV. Allocation of Funds

Criteria and Method for Distribution of Funds

LDEQ's Project Priority Ranking System is attached in Attachment 1. All projects scheduled for funding with Louisiana's CWSRF have been reviewed for consistency with appropriate plans; and developed and approved under Section 205(j), 208, 212, 303(e), 319 and 320 of the of the Clean Water Act, as amended. Evidence of this review and finding of consistency is documented in each CWSRF project file.

The State's Project Priority List (Exhibit 1) consists of a listing of all projects that have, or are expected to qualify for, and participate in the CWSRF program. These projects are ranked by staff in the Business, Community Outreach and Incentives Division, given a priority rating, and then listed in alphabetical order on the current Project Priority List. Loans are approved from this list on a readiness to proceed basis. Should total actual project needs exceed CWSRF funds available, projects to be funded will be prioritized according to the Priority System. When needed, and with EPA approval, procedures will be established by the Department to sell bonds to expand the program to meet demand, or develop other procedures that are in the best interest of the Louisiana CWSRF program.

The ranking criteria emphasize high priority water bodies, projects proactively addressing needs, and projects addressing enforcement and compliance issues. In addition, projects receive extra consideration for implementation of green infrastructure, energy efficiency, water efficiency and environmental innovation.

After projects are ranked according to the criteria, a Project Priority List is developed (Exhibit 1). Projects are further evaluated on their readiness to proceed to a financing agreement and construction; this is based on whether they have completed the environmental review and have obtained the necessary permits. Projects in disadvantaged communities may receive planning and design funding to assist them in planning their projects. Based on the amount available for financing, projects that are ready to proceed are placed on the IUP List of Projects to be Funded (Figure 1).

Bypass Procedures

LDEQ may bypass projects on the IUP List of Projects to be funded if they are later determined to not be ready to proceed. In those events, other projects from the Project Priority List may move to the funding list. The LDEQ CWSRF also reserves the right to provide funding for only a portion of the total costs of a project or only a portion of the amount requested where the municipality can, based on its ability to pay, obtain other affordable financing for the remainder of the project. A project may be bypassed if a different project should be funded due to an emergency condition that can only be addressed in an immediate time frame. Bypassed projects that retain their priority rating will be subject to the same eligibility and funding considerations from future allotments as other fundable projects. All projects must be on the Project Priority List in order to receive funding. All bypasses will be explained in the Annual Report.

Types of Projects to be Funded and Financing Rates

Section 212 Projects

Projects identified in this IUP as qualifying for the CWSRF under the Clean Water Act section 212 will have an interest rate of 0.95 percent. If a project or project component qualifies for the Green Project Reserve or meets one or more of the elements in the Sustainability Policy, lower interest rates or additional subsidization in the form of principal forgiveness may apply. The financing term for most projects will be 20 years.

Nonpoint Source and Estuary Protection Projects

Nonpoint source activities (not specific projects) funded by the CWSRF must appear in Louisiana's Clean Water Act Section 319 Nonpoint Source Management Plan developed by the LDEQ in order to be financed. Estuary protection activities (not specific projects) funded with the CWSRF must appear in the Barataria-Terrebonne National Estuary Comprehensive Conservation and Management Plan developed by the Barataria-Terrebonne National Estuary Program, and be located in the estuary watershed, in order to be eligible for financing. Nonpoint Source (NPS) and estuary projects will receive an interest rate of 0.95 percent. If a project qualifies under the Green Project Reserve, a lower interest rate or additional subsidization in the form of principal forgiveness may apply. The financing term for most projects will be 20 years.

Green Project Reserve

For projects that qualify (in whole or in part) for the Green Project Reserve as Energy Efficiency, Water Efficiency, Green Infrastructure or Environmentally Innovative (as defined by U.S. EPA's guidelines) a lower interest rate or additional subsidization in the form of principal forgiveness may apply. The financing term for most projects will be 20 years. EPA guidelines are used to determine qualification for the Green Project Reserve.

Disadvantaged Communities and Sustainability Policy

In the FFY2016 appropriations, Congress has mandated that not less than ten percent (\$1,468,800) be provided as Additional Subsidization. The LDEQ intends to provide at least \$1,468,800 in additional subsidization in FFY2016. LDEQ will direct the subsidies to disadvantaged communities and sustainability projects, to the extent possible as Congress has directed.

a. Disadvantaged Communities

All projects undergo a financial capability review. LDEQ collects substantial information from all project applicants, including audited financial reports, financial projections, outstanding debt, user rates, collection rates, tax information, and economic information such as unemployment rate and median household income.

Disadvantaged Community -Community that meets one or more of the following affordability criteria using the most recent American Community Survey (ACS) data set published by the U.S. Census Bureau

- a) Median Household Income (MHI) less than the State MHI,
- b) Percentage of population unemployed is greater than the State percentage
- c) Percentage of population growth over the two most recent years is less than the State percentage

LDEQ has allocated \$1,567,067 in additional subsidization to 4 projects based on the Affordability Criteria.

b. Sustainability Policy

LDEQ is committed to promoting sustainable design and management of wastewater utilities and clean water resources. EPA's Sustainability Policy has identified three categories of projects that help promote sustainable design and management of wastewater utilities. LDEQ is implementing this policy as outlined. The categories and types of eligible projects are described below.

Fix it first projects. The main principle is that projects in currently established areas, which are still suitable for use, should be encouraged over projects in undeveloped areas. The repair, replacement and upgrade of this infrastructure is encouraged. Projects that may qualify as fix it first projects include:

- Projects that are critical to assuring continued compliance with NPDES discharge limits in existing facilities.
- Upgrades to existing infrastructure in smart growth districts to spur development/redevelopment in these areas, rather than in unplanned or undeveloped areas.
- Rehabilitation of existing wastewater treatment systems (without expansion beyond a normal growth rate in the community or to service infill areas in the community).

Effective utility management. Plans, studies and projects that help improve the technical, managerial and financial capacity of assistance recipients to operate, maintain and replace their infrastructure. The principle is that improved stewardship of the existing infrastructure will help improve their sustainability and extend the useful life.

Planning. Preliminary planning, development of alternatives, and capital projects that reflect the full life cycle cost of infrastructure, conserve natural resources or use alternative approaches to integrate natural systems into the built environment. Potential projects include:

- Projects that are identified through current facility planning (or similar efforts) as being critical to protecting long-term investments (federal, state and local) in LDEQ community wastewater treatment facilities.
- Projects consistent with local or regional land use plans.

V. Financial Management

Source of State Match

LDEQ's FFY2016 appropriation of \$14,688,000 requires state matching funds of \$2,937,600 (20 percent). Since the LDEQ has issued bonds for a little more than required in the past, the LDEQ will be issuing \$3,000,000 in state match revenue bonds once the grant has been awarded, and before the Federal Funds are deposited to the Automated Clearing House to be put towards meeting state match requirements for FFY2016 in order to be in compliance. The state match bonds will be repaid using interest earnings on investments and assistance agreements.

Fee Income

Annually, the CWSRF assesses a 0.5% administrative fee to assistant recipients on all outstanding loan balances. Federal law allows the state to charge additional fees to supplement the 4% allowed from the fund itself to cover future excess administrative costs. In SFY2016, \$1,075,683 in fees is expected to be deposited into the Administrative fee fund. The Administrative Fees Fund is held outside the CWSRF.

Program Administration

Up to four percent (4%) of the capitalization grant can be used for administration of the CWSRF program by LDEQ. The state reserves the right to the 4% administration funds not drawn down from a capitalization grant to be used on future 4% administrative expenditures. Once those funds are exhausted they are supplemented by a 0.5% administrative fee collected on all outstanding loan balances. As of June 30, 2015, the LDEQ CWSRF has \$14,483,529 in administrative funds, to be used for administration of the program or for other water quality purposes as allowed by EPA. DEQ intends to utilize the administrative funds in FY15 for other water quality related projects and non-point source projects as listed below in Figure 2:

Administration of the CWSRF Program not funded by the grant 160,000

NON POINT SOURCE RELATED PROJECTS:

Match for NPS grant from EPA 1,207,120

OTHER WATER RELATED PROJECTS:

US Geological Survey - Hydrologic Data and Assistance Coop Program 120,100
 Match for PPG grant from EPA 2,104,880

TOTAL USES OF ADMINISTRATIVE FEE FUND

\$3,592,100

Anticipated Cash Draw Ratio

LDEQ uses the cash flow method for the CWSRF. In SFY2016, LDEQ will be using a cash draw ratio of 83.333 percent federal funds and 16.667 percent state match funds. State matching funds will be deposited to the CWSRF before or at the same time as capitalization grant funds.

Transfer of Funds from the Drinking Water State Revolving Fund

LDEQ reserves the authority to transfer additional funds as appropriate, at some time in the future, between the CWSRF and Drinking Water State Revolving Fund (DWSRF) program. Transfers eligible up to 33 percent of the FFY 2016 DWSRF capitalization grants are possible. LDEQ does not currently plan on transferring funds to or from the DWSRF in SFY2016.

Estimated Sources and Uses

The Sources and Uses table in Figure 3 identifies the sources and the uses all of the available funds in the CWSRF in SFY2016 as well as cumulatively. Sources of funds include federal capitalization grants and state matching funds, as well as bond proceeds and repayments. Investment earnings and administrative fees are sources of funds. In keeping with the objective of the CWSRF, the majority of the available funds are used to pay for water quality projects. Interest Earned are also used to pay for state match bonds.

Figure 3: Estimated FY2015 Cumulative Sources & Uses	Cumulative Total through June 30, 2015	July 1, 2015- June 30, 2016 (2016 IUP)	Cumulative Total through June 30, 2016
SOURCES			
Federal Capitalization Grants	\$ 381,338,523	\$ 15,334,000	\$ 396,672,523
State Match			
Appropriation/Agency Cash- Committed	26,753,586		26,753,586
Provided from State Match Bonds Issues	55,858,184	3,100,000	58,958,184
Principal Repayments on Assistance Provided	427,536,575	21,852,149	449,388,724
Interest Repayments on Assistance Provided	105,744,970	1,233,348	106,978,318
Investment Earnings	38,558,248	250,281	38,808,529
Fees Deposited into the CWSRF			
TOTAL SOURCES	\$ 1,035,790,086	\$ 41,769,778	\$ 1,077,559,864
USES			
Financing Agreements Entered	\$ 672,426,423		\$ 672,426,423
Projects on IUP (2016 IUP)		45,000,000	45,000,000
State Match Bonds repaid with Interest & Investments	55,884,093	3,100,000	58,984,093
Administrative Expenses	14,561,144	683,000	15,244,144
TOTAL USES	\$ 742,871,660	\$ 48,783,000	\$ 791,628,751
Available Funds	*		\$ 285,931,113

*LDEQ's sources exceeds its uses by \$285,931,113. LDEQ is working with several communities on our project priority list to determine projects to be funded with the excess sources.

Financial Management Strategies

Comprehensive financial planning is essential to LDEQ's CWSRF. Financial planning is used to determine appropriate interest rates, use of additional subsidies and annual and long term financing capacity. LDEQ is always striving to balance the need to provide as much low-cost financing as possible while ensuring that the fund can continue to operate in perpetuity. Each year, LDEQ obtains a cash flow model from a financial advisor which determines what its lending capacity is, considering different variables for interest rates, additional subsidization and potential for leveraging.

Additional financial planning materials, including the proposed payment schedule, the binding commitment schedule and financial projections can be found in Exhibit 3.

VI. Program Management

Assurances and Specific Proposals

The LDEQ has provided the necessary assurance and certifications as part of the Operating Agreement (OA) between LDEQ and US EPA. The OA describes the mutual obligations between EPA and LDEQ, and through a Memorandum of Understanding. The purpose of the OA is to provide a framework of procedures to be followed in the management and administration of the CWSRF. The OA was last updated on February 8, 2013.

The OA addresses our commitment to key CWSRF requirements, including:

- o 602(a) Environmental Reviews: The CWSRF will conduct environmental reviews according to the State Environmental Review Process developed for the SRF
- o 603(b)(3) Binding Commitments: The CWSRF will enter into binding commitments for 120 percent of each quarterly grant payment within one year of receipt of the payment.
- o 602(b)(4) Expeditious and Timely Expenditures: The CWSRF will expend all funds in the CWSRF in a timely manner.

Federal Requirements

Many federal requirements apply in an amount equal to the capitalization grant. These requirements are:

- o Single Audit Act (OMB A-133)
- o Disadvantaged Business Enterprise compliance (DBE)
- o Federal environmental crosscutters
- o Federal Funding Accountability and Transparency Act (FFATA) reporting

In 2016, we have required all of our projects to comply with these requirements as the new Water Resource Reform and Development Act of 2014 (WRRDA) requirements are not applicable to our projects this year. In the future in order to minimize the burden on borrowers, the CWSRF program will select projects in non-disadvantaged communities to comply with these new WRRDA requirements once Congress has finalized the FFY2016 grant.

These communities will:

- o Demonstrate compliance with the federal environmental crosscutting authorities during the environmental review and project planning stage.
- o Follow the EPA Office of Small Business Programs guidelines for encouraging disadvantaged businesses to participate during the bidding process.
- o Report on executive compensation as outlined in the Federal Funding Accountability and Transparency Act.
- o Submit Single Audit reports in all years when disbursements of federal funds (both CWSRF and non-CWSRF federal funds) are greater than \$500,000 before January 1, 2016, and \$750,000 thereafter. These recipients will be informed of the requirements. LDEQ will maintain records of their compliance in the project files.

Davis-Bacon Wage Rates

We expect that EPA's FFY2016 Appropriations bill will require the application of Davis-Bacon prevailing wage rates to all treatment works projects funded in whole or in part by the CWSRF. The Davis-Bacon requirements do not apply to nonpoint source or decentralized wastewater treatment projects. Davis-Bacon applies to construction contracts over \$2,000 and their subcontractors (regardless of the subcontract amount). To ensure compliance with these requirements, LDEQ will confirm that the correct wage determinations are being included in the bid specifications and/or construction contracts. LDEQ will also provide assistance recipients with the specific EPA Davis-Bacon contract language that is to be included in bid specifications and/or contracts.

Audits and Reporting

The LDEQ CWSRF is committed to transparency and accountability. To that end, program information, Intended Use Plans, Annual Reports, and other program materials are posted on the SRF website: www.deq.louisiana.gov/cwsrf.

An independent audit is conducted annually by the Louisiana Legislative Auditor's office. Project milestones and information are reported through EPA's Clean Water Benefits Reporting database. The LDEQ CWSRF commits to entering benefits information on all projects into CBR by the end of the quarter in which the assistance agreement is signed.

VII. Public Review and Comment

A copy of the IUP will be made available for public review and comment beginning September 15, 2015. Written comments will be accepted through close of business, October 15, 2015. (See copy of public notice Attachment 2.) Any comments received will be duly considered and will be provided to EPA.

BASTROP	221027-01	40	1,623,400	No	212	Install M2 Renewables MicroScreen & rehabilitate two lift stations at the North Pond facility	1,623,400
BOSSIER PARISH SEWER DISTRICT NO. 1	221880-01	65	286,500	No	212	Construct 1,800 Linear Feet of 8 inch gravity sewer main, a lift station and 4,000 linear feet of 4 inch sewer force main	
BREAUX BRIDGE	221381-01	25	1,180,000	No	212	INSTALLATION OF AUTOMATED METOR READING SYSTEM	
Bunkie	221917-01	55	8,940,200	No	212	Wastewater treatment Plant Expansion	8,940,200
GRETNA	221496-01	52	1,974,207	No	212	Rehabilitation of Secondary Clarifiers & Replace associated bridge	1,974,207
HAMMOND	221741-01	8	5,000,000	No	212	I/I correction (CIPP and point repairs)	
Haughton	221701-01	71	3,000,000	No	212	Construct new 0.5 MGD tertiary treatment plant	
HORNBECK	221226-01	25	395,000	No	212	Installation of automated meter reading system	
IDA	221412-01	27	55,000	No	212	Supplemental funding for construction of a 0.025 MGD extended aeration package plant.	
JEFFERSON PARISH	221840-01	40	15,250,000	No	212	A. Replace pumping equipment at lift stations (5) with energy efficient pumps. 1. Stonebridge & Trapp Lift Station 2. Lynnette & Shirley Lift Station 3. Patriot & macArthur Lift Station 4. Cooper Rd & Wilbur Lift Station 5. Cutty Sark & Titanic Lift	

Louisiana Clean Water State Revolving Fund Program

Borrower	Loan Number	Priority Number	Amount Requested	Under Enforcement	Type of Project 212, 319, 31	Project Description	Secondary
KENNER	221860-01	82	21,000,000	No	212	Expand WWTP from 13.55 MGD to 17 MGD Rehab/Upgrade/Replace 4 force mains	
LAKE PROVIDENCE	221887-01	0	650,000	No	212	Automated Meter Reading System and Advance Meter Infrastructure System.	650,000
LOCKPORT	221120-01	35	4,000,000	No	212	CCTV collection system. Coat interior of manholes. Install CIPP into gravity lines where needed. Point repairs	
MANSURA	221020-01	50	0	No	212	New gravity sewer systems and pump. New force main that ties into Pump #9. Extensions of existing gravity sewer.	
MARINGOUIN	221426-01	25	475,000	No	212	Reroute industrial park pond to new hwy. 1 pump station.	
MONROE	221007-06	99	12,000,000	No	212	Automated Meter Reading System	
OLLA	221915-01	25	382,500	No	319	Sanitation sewer line rehabilitation throughout the City of Monroe	
OUACHITA	221775-01	68	1,918,000	No	212	Non-Point Source Green Infrastructure	
PLAQUEMINE	221586-01	70	8,000,000	No	212	Collection system rehabilitation. Replacing 18" D.I. FM with HDPE 24" FM ('7,000 L.F.)	
SHREVEPORT	221870-01	32	5,000,000	No	212	New Wastewater Treatment Plant	8,000,000
SIMMESPORT	221780-01	40	225,900	No	212	Sanitary Sewer Evaluation Survey	
ST. BERNARD PARISH	221310-03	102	51,107,000	No	212	Rehabilitate existing WWTP. Relace a nonfunctioning rotor in the oxidation ditch and install two new effluent pumps.	
STERLINGTON	221280-01	140	2,248,000	No	212	Parishwide WWTP consolidation project	51,107,000
STERLINGTON	221282-01	85	1,284,400	No	212	Increase design average flow from .15 MGD to .375 MGD. Also treatment upgrade to meet new discharge limits.	
SULPHUR	221908-01	55	8,600,000	No	212	New collection linealong Highway 165 in south Sterlington	
TERREBONNE PARISH	221492-01	34	3,875,000	No	212	Work design and rehabilitation and repair of collection lines, to correct I/I problems. Rehabilitation of approximately 15 lift stations.	
WEST MONROE	221392-01	105	964,050	No	212	Design and construct an effluent pump station, force main and distribution system to route treated wastewater to adjacent wetlands	3,875,000
Winn Parish	221830-01	0	275,000	No	212	Rehabilitation of collection system pipe and new PVC main. Constrcut new manholes and services.	
ZACHARY	221452-01	50	5,000,000	No	212	Permeable pavement parking lot at Winn Parish Courthouse	
						Rehabilitate sewer collection system and expand and upgrade system to serve currently unsewered areas of the City	

EXHIBIT 2: Administrative Expenses – Staffing List & Budget

Administrative Expenses

**PART 1 - STAFFING LIST
as of June 30, 2015**

LOUISIANA CWSRF STAFF LISTING	ANNUAL SALARY RATE	EST. CWSRF WORKYEARS	PERSONNEL COST	INDIRECT 68.75%
Accountant 3	47,486	0.04	1,899

Clean Water State Revolving Fund Priority System

§2123. Introduction to the Clean Water State Revolving Fund Priority System

A. Introduction

1. On October 18, 1972, the Federal Water Pollution Control Act Amendments became Public Law 92-500. PL 92-500 was amended by PL 95-217, the Clean Water Act of 1977, PL 97-117, the Municipal Wastewater Treatment Construction Grant amendments of 1981, and most recently by PL 100-4, the Water Quality Act of 1987.
2. The primary aim of the Federal Act is to "restore and maintain the chemical, physical, and biological integrity of the nation's water." The Federal Act emphasizes the national goal that, wherever possible, water quality is to be suitable for recreational contact and for protection and propagation of fish and wildlife. In addition, the Federal Act emphasized the special need for controlling or eliminating discharges of toxic pollutants, and that the goals of the Federal Act be met through the control of both point and nonpoint sources of pollution. A permit program has been established and geared to restricting pollutant discharges from point sources – that is, from factories, municipalities, and large agricultural operations where pollutants enter the nation's water through an outfall pipe, sewer, or other conduit. The permit program has been expanded to include pollutants entering the nation's water through nonpoint sources – that is, stormwater runoff from municipalities, factories, agricultural operations, and other sources that do not require NPDES permits.
3. The Water Quality Act of 1987 added Title VI to the Clean Water Act, which provides for a program of low interest loans. Section 603(c) of the Federal Act states that "The amounts of funds available to each State water pollution control revolving fund shall be used only for providing financial assistance (1) to any municipality, inter-municipal, interstate, or state agency for construction of publicly owned treatment works (as defined in Section 212 of this Act), (2) for the implementation of a management program established under section 319 of this Act, and (3) for development and implementation of a conservation and management plan under Section 320 of this Act."
4. Section 603(g) of the Federal Act states that: "The State may provide financial assistance from its water pollution control revolving fund only with respect to a project for construction of a treatment works described in Subsection (c)(1) if such project is on the State's priority list under Section 216 of this Federal Act. Such assistance may be provided regardless of the rank of such project on such list." Section 603(g) of the Federal Act does not require that projects for the implementation of a management program established under Section 319 of the Federal Act, and for development and implementation of a conservation and management plan under section 320 of the Federal Act must be on the State's priority list to receive financial assistance, however, such projects will be included on the priority list and assigned priority ratings in accordance with LAC 33:IX.2123.C.7.
5. Section 603(c) of the Federal Act states that: "After providing for public comment and review, each State shall annually prepare a plan identifying the intended uses of the amounts available to its water pollution control revolving fund."

6. In implementing the requirements of the Federal Act, the department has derived the State of Louisiana CWSRF Priority System.
7. This system provides an orderly approach to preparing a priority list of publicly owned treatment works projects that meet the definition of section 212 of the Federal Act and provides for the selection of these and other eligible projects to be included on the Intended Use Plan (IUP) for each year.

B. List of Stream Subsegments and Subsegment Priority Numbers

1. The most effective use of water quality management assets in achieving state and national goals requires that management emphasis be directed at the most important problem areas first. The priority of management effort is intended to give more consideration to those areas where the most significant problems occur.
2. The state of Louisiana is divided into 12 water quality management basins which exhibit distinct hydrologic characteristics. Each designated basin is divided into stream segments and subsegments which exhibit common reactions to stresses, i.e., pollutants. The stream segmentation for Louisiana is contained in the state's areawide water quality management plans submitted under Section 208 of the Federal Act.
3. In order to provide the basis for directing the management effort for water quality, each stream subsegment is ranked according to its designated uses and the degree to which those designated uses are supported. The values from each of the category classifications, from Table B-1, are multiplied together to produce the stream subsegment priority number.
4. Information on designated uses and degree of support is taken from the latest approved Louisiana Water Quality Inventory: Integrated Report, which may be found on the department's website.
5. The stream priority list is used as the base for the later determination of the project priority ratings.

TABLE B-1

SUBSEGMENT PRIORITY RANKING MULTIPLIERS

Designated Uses	Multiplier
Shellfish Propagation	20
Sole Source Drinking Water Supply	15
Outstanding Natural Resource	10
Primary Contact Recreation	5
Secondary Contact Recreation	5
Fish and Wildlife Propagation	5

Agriculture	5
Degree of Support	Multiplier
Not Supported	5
Partially Supported	4
Fully Supported but Threatened	3
Fully Supported	2

Formula:

Designated Uses X Degree of Support = Stream Subsegment Priority Number

C. List by Priority Rank

1. In conjunction with the priority of the stream subsegments of the state of Louisiana, each municipality that has requested consideration for funding is rated as to its ability to comply with the Federal Act. This rating of municipalities forms an important water quality management tool.
2. The priority rating for each municipality considered is composed of two factors, the stream subsegment priority rating and the municipality factor. These two numbers are added together to form the basic project priority rating.
3. The municipality factor is the summation of two factors: the category factor and the pollution reduction factor. The category factor depends on the age of a particular treatment system within a project area. Depending on the type of the system whether it is a treatment or collection, the factor can be obtained from Tables C-1 or C-2.

Table C-1

Age of treatment plant	0 to 5 years	6 to 10 years	11 to 15 years	16 to 20 years	Over 20 years
Type of treatment plant					
Mechanical plant	2	4	6	8	10
Aerated lagoon	1	2	4	5	7
Stabilization pond	0	1	2	3	4
Other	0	0	1	1	2

Those projects with an existing collection system in need of rehabilitation or I/I correction will be awarded points from the Table C-2 based on the age of the collection system.

Table C-2

Age of collection system	Points
0 - 10 years	2
11 - 20 years	4
21 - 30 years	6
31 - 40 years	8
Over 40 years	10

The Category Factor is the higher of the two values from Tables C-1 and C-2 and will be used calculating the municipality factor. The Pollution Reduction Factor is an indication of the ability to reduce the pollution discharged into the receiving waters, and it obtained from Table C-3.

Table C-3

FUTURE LEVEL OF TREATMENT	SECONDARY	ADVANCED (BOD(20))	ADVANCED (20>BOD(10))	ADVANCED (BOD<10)
PRESENT TREATMENT LEVEL				
Raw (from existing outfall)	80	90	90	100
Less than Secondary	60	70	80	90
Secondary	20*	60	70	80
Advanced (BOD(20))	NA	20*	60	70
Advanced (20>BOD(10))	NA	NA	20*	60
Advanced (BOD<10)	NA	NA	NA	20*
Unsewered (no outfall)	30	40	50	60
N/A - Rehabilitation and/or I/I correction only				40
N/A- No reduction in pollution discharge anticipated				20

* If no change to treatment but increase capacity, change 20 to 40

Formula:

Category Factor + Pollution Reduction Factor = Municipality Factor

4. A separate municipality factor shall be determined for each treatment facility and the collection system within its service area. When two or more treatment facilities will be included in a single project, regardless of whether they are in the same or different municipalities, the municipality factor for the project will be the weighted average, weighted on population served, of the municipality factors for all treatment facilities included in the project. For wastewater projects: Basic Project Priority Rating = Stream Subsegment Priority Rating + Municipality Factor.

5. The priority rating for a municipality may be re-evaluated and adjusted whenever new information is made available. Such information may result from facilities planning, water quality analysis, etc.

6. Any municipality may request a reevaluation of its priority rating. Any such requests should include the reasons that the municipality believes the priority rating to be in error.

7. Projects for the implementation of a management program established under Section 319 of the Federal Act, and for development and implementation of a conservation and management plan under Section 320 of the Federal Act will be assigned a Stream Subsegment Priority Number based on the stream subsegment that will be most impacted by the project. These projects will also be assigned an additional factor based on the ability of the project to reduce pollution in receiving waters. Since such projects may take numerous forms, this factor will be assigned by the department based on evaluation of individual project applications and will not exceed 100 points. The Basic Priority Rating for projects under sections 319 and 320 of the Federal Act are as follows:

Basic Project Priority Rating = Stream Subsegment Priority Rating + Additional Assigned Factor.

D. CWSRF Priority List

1. Upon receipt of a request by the authorized representative of a municipality or an applicant, the basic priority rating will be determined and the proposed project will be placed on the CWSRF Priority List.
2. Request for inclusion on the CWSRF Priority List must include the following:
 - a. for public entities, a resolution from the governing authority designating a project representative and authorizing him/her to submit pre-application materials;
 - b. a completed Form RF-100; and
 - c. a map of the proposed planning area.
3. It is the responsibility of each authorized project representative to maintain current and accurate information for his/her project, and to submit any revised or updated project information to the department each year which will be used to prepare the CWSRF Priority List.
4. The loan amount shown on the list will be the estimated amount of those items that are eligible for loan assistance. Eligibility of specific items will be based on the latest federal requirements in effect at the time the list is prepared. Should these requirements be changed subsequent to preparation of the list, all projects on the list will be adjusted accordingly. The monetary amount of each item will be based on the latest information supplied by the authorized project representative in accordance with Paragraph 2 of this Section.

5. Projects normally proceed in three steps: Facility Planning, Design, and Construction.

It is intended that projects that have completed Facility Planning and Design and are ready to begin construction will be considered for funding before projects that are not ready to begin construction. Projects will be awarded points in addition to the basic priority rating based on the readiness to proceed to construction in accordance with the following milestone:

Milestone	Points
Project has completed Facility Planning and planning documents have been approved	1000
Project has completed design and plans and specifications have been approved	2000

6. Large projects may be offered assistance in several phases based on a request by the authorized project representative, on a comparison of project cost and funds available, or on other factors that may require delayed funding for portions of a project. Each phase of a project will be listed separately on the CWSRF Priority List. All phases will have the same basic priority rating but each phase will have its own points awarded based on readiness to proceed.
 7. The CWSRF Priority List will include all projects that have requested funding assistance, ranked in priority order, regardless of the amount of funds available. The priority list will be used for the later preparation of the CWSRF IUP.
 8. The CWSRF Priority List will be made available for review each year, not less than 30 days prior to submission to the EPA. Each municipality that has submitted pre-application materials will be notified by letter of the availability of the CWSRF Priority List. It is the responsibility of each potential borrower to examine all the information listed for his/her project for accuracy. Any errors or omissions should be reported to the department prior to the deadline for comments.
 9. Any project or project phase will be removed from the CWSRF Priority List once funding for the project or project phase has been provided through the CWSRF; or when the project or project phase has been constructed using another source of funds.
 10. Any project that has had no written communication with the department for a period of five years and has presented no other evidence of progress toward completion of items that are prerequisites to funding during the five year period shall be deemed to be an inactive project and may be removed from the CWSRF Priority List. Prior to removal of an inactive project from the CWSRF Priority List the department will contact the project representative in writing to inform them of the impending removal of the project.
- E. Intended Use Plan
1. An IUP is prepared for each state fiscal year and details the intended uses of amounts expected to be available to the CWSRF during the year. These intended uses will include loans for projects as well as other allowable uses of the Fund, including but not limited to repayment

of bonds issued by the Fund, loan guarantees or insurance for local obligations, and payment of allowable costs of administering the Fund.

2. On July 1 of each year, the Administrative Authority or his designated representative will determine the amount expected to be available for loans for projects for the current state fiscal year.
3. Of the amount expected to be available in accordance with Paragraph 2 of this Section, certain amounts will be reserved in accordance with Section F.
4. Projects must be included on the current CWSRF Priority List that has met public participation requirements and has been submitted to the EPA in order to be selected for the IUP. Projects on the proposed CWSRF Priority List may be selected for the proposed IUP provided that both the proposed Priority List and IUP meet public participation requirements and are accepted by the EPA.
5. Projects on the CWSRF Priority List will be selected to receive funds from the amount expected to be available in accordance with Paragraph 2 of this Section, less any reserves established in accordance with Section F, by considering projects in several categories for funding. All projects in a high priority category will be funded before any projects in a lower priority category are funded. Within each category projects will be considered for funding in order of the priority ranking of the individual project. The several categories that are considered are as follows:
 - a. Projects that meet specific requirements of federal law. Where federal law requires that a percentage of capitalization grant funds must be used to fund certain categories of projects, projects meeting those requirements will be funded ahead of other projects until the required percentage of funds has been satisfied.
 - b. Projects which are required for completion of an ongoing project for which at least one phase has already received funding through the CWSRF program, and that will not result in an operable treatment system without the additional funds. To qualify as an ongoing project, the work for which additional funds are required must be specifically identified within the scope of work for the project for which a Facilities Plan has been approved by the department.
 - c. All other projects that do not meet either of the above conditions.
6. Notwithstanding the provisions of paragraph 5 above, no project on the CWSRF Priority List will be placed on the IUP unless the municipality has submitted a Letter of Intent to the department stating the Municipality's intention to proceed with the project, and a project schedule that indicates that the Municipality will have completed all prerequisite program requirements and will be able to receive a loan during the fiscal year.
7. The CWSRF IUP is divided into two portions: a. the fundable portion and b. the planning portion. The fundable portion includes those projects expected to be awarded assistance during the fiscal year for which the list was prepared. The planning portion includes those project steps expected to receive funding during the next four fiscal years after the fiscal year of the list, based on the best available information on funds expected to be available.
8. The CWSRF IUP will be made available for inspection at the same time as the CWSRF Priority List each year, but not less than 30 days prior to submission to the EPA. Each

municipality or applicant that has submitted pre-application materials will be notified by letter of the availability of the IUP. It is the responsibility of each potential borrower to examine all the information listed for his/her project for accuracy. Any errors or omissions should be reported to the department prior to the deadline for comments. Applications for assistance which deviate substantially from the proposed project amount contained in the IUP might not be processed.

9. A project may be moved from the fundable portion of the list to the planning portion (bypassed) if it is determined that the project will not be ready to proceed during the funding year. Department staff will contact the project representative in writing to advise them of the impending bypass of the project and afford them an opportunity to present updated information that might avoid a bypass.
 10. If cash flow of the program permits, either through project bypasses or the availability of additional federal capitalization funds, or if for any other reason it is determined by the department that additional funds are available for projects, projects from the planning portion of the list which are ready for funding and which have completed the priority list public participation requirements will be advanced to the fundable portion of the list. Individual projects will be advanced, in accordance with provisions of Paragraph 5 of this Section, until the available federal funding is consumed.
 11. If insufficient projects meeting the criteria of Paragraph 6 of Section D for advancement from the planning to the fundable portion of the list are available to consume the additional funds, the department may prepare a revised list containing projects which have not met public hearing requirements; however, such projects will not be funded until public hearing requirements have been met.
 12. If the actual amount available during the year is less than the projected amount expected to be available in accordance with Paragraph 2 above, and it is not possible to fund all projects on the fundable portion of the IUP, then, of the projects not yet funded, those projects selected last for inclusion on the IUP will be moved from the fundable portion to the planning portion until the remaining projects can be funded with the available funds.
 13. If any project requests more funds than the amount listed on the IUP for that project, and granting the additional funds would result in insufficient funds for the remaining projects on the fundable portion, the additional funds will not be granted; but the project may request the additional funds be added to the fundable portion for the next fiscal year.
 14. The CWSRF IUP will be submitted to the EPA for their review and acceptance as soon as possible after the public comment period has expired.
- F. Reserves Related to the IUP
1. Reserves for State Management Assistance
 - a. The state may set aside a portion of the total funds available during the IUP year for use by the department in fulfilling its obligations to manage the CWSRF Program.
 - b. This reserve will be limited to the amount authorized by federal law as a percentage of each federal capitalization grant.
 2. Reserve for loans for Facilities Planning and Design

Louisiana Clean Water State Revolving Fund Program

- a. The state may set aside a portion of the total funds available during the IUP year for loans to municipalities for Facilities Planning and Design.
- b. This reserve is limited to municipalities that meet all of the following conditions:
 - i. The construction portion of the project must appear within the five year planning portion of the IUP.
 - ii. The loan is to perform facility planning or design work that has not been previously funded.
 - iii. The applicant does not have the financial capability to complete facility planning and design work without financial assistance.
- c. This reserve will be implemented only to the extent that the state deems necessary to provide assistance to municipalities that would be unable to complete Facilities Planning and Design work without assistance and that are expected to receive assistance for construction when Facility Planning and Design work are completed. This reserve may not exceed ten percent of the funds available in accordance with Paragraph 2 of Section E.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:2011(D)(1).

HISTORICAL NOTE: Promulgated by the Department of Environmental Quality, Office of Water Resources, LR 17:342 (December 1987), amended by the Office of Environmental Assessment, Environmental Planning Division, LR 26:2551 (November 2000), amended by the Office of the Secretary, Legal Affairs Division, LR 31:2508 (October 2005), LR 33:2164 (October 2007).

ATTACHMENT 2: Public Notice

Louisiana Clean Water State Revolving Fund Program

PUBLIC NOTICE

Notice is hereby given that the Financial Services Division of the Louisiana Department of Environmental Quality (LDEQ) is applying for approval of the Clean Water State Revolving Loan Fund Program FY16 Intended Use Plan (IUP) and FY16 Project Priority List (PPL) from the U.S. Environmental Protection Agency. Copies of the IUP which include the PPL are available at www.deq.louisiana.gov/cwsrf or by contacting the department at cwsrf@la.gov.

LDEQ will hold a public hearing on Thursday October 15, 2015 at 1:00 PM to hear public comment about the IUP and PPL. The public hearing will be held at the Galvez Building, 602 North 5th Street, Baton Rouge, LA, 70802 in Room 1019.

602 NORTH FIFTH STREET • BATON ROUGE, LA 70802
