

## 2012 Reporting Year ERIC System Changes

January 07, 2013

- **GET STARTED EARLY ON YOUR INVENTORIES!**
- “Permanently Shutdown” is now an option for Facility Status.
  - Emissions must equal 0.
  - Sources must have a status of Idle or Permanently Shutdown
  - If emissions are greater than 0, then facility status must be Active
  - If Facility Status is Permanently Shutdown, then ERIC will ignore validations on everything but Facility and Contact tabs.
- If inventory type is Criteria and emissions are reported for toxic pollutants (excluding ammonia), you will receive an error.
- If inventory type is Toxic and emissions are reported for criteria pollutant (excluding ammonia), you will receive an error.
- Inventory type can now be changed on an inventory in Editing status.
- Toxic VOCs emissions must be within 25 pounds of Total VOC emissions
- **Release point coordinates are LOCKED and users can no longer edit them.**
  - **Users can still request a change to the coordinates.**
  - **An email will be sent to the facility’s assigned LDEQ staff for review.**
  - **LDEQ staff will review the request and approve or deny the changes.**
  - **GET STARTED ON YOUR INVENTORIES EARLY IF YOU WANT TO CHANGE YOUR COORDINATES!**
- Public Reports page includes Emissions by Parish, a Radius search for actual emission rates, and a radius search for permitted emission rates.
  - Actual emissions are limited to certified emissions
  - Actual emissions by radius are limited to the last 5 years worth of data plus baseline data
    - Users will select the year and pollutant, and enter center point coordinates in either lat/long or UTM and provide a radius in meters and will be able to download the results in an Excel spreadsheet
  - Replaces public records requests for actual and permitted emissions data for modeling
  - Please read the document titled “Limitations of the Actual and Permitted Emissions Reports” before using the report
- Ozone season validations now only require ozone season emissions for CO, NO<sub>x</sub>, VOC, propylene, and ethylene.
- Changes to applicable validations of prior year revisions:
  - *Current Reporting Year*
    - New Inventory - **ALL validations** applied to **ALL data fields**
    - Revision - **ALL validations** applied to **ALL data fields**

Updated 01/07/2013

Items in [Blue](#) represent changes from previous revision

- *Up To Four Years Prior*
  - New Inventory - **ALL validations** applied to **ALL data fields**
  - Revision - **ALL validations** applied to **CHANGED data fields**
  
- *More Than Four Years Prior*
  - New Inventory - **PARTIAL validations** applied to **ALL data fields**
  - Revision - **PARTIAL validations** applied to **CHANGED data fields**
