LDEQ to host live webinar on Electronic Document Management System (EDMS) August 9

BATON ROUGE - The Louisiana Department of Environmental Quality (LDEQ) provides access to its public records over the Internet through the Electronic Document Management System (EDMS). The EDMS contains all public records that have been created or received by LDEQ.

This helpful tool gives quick access to the environmental information you need. Join us August 9 from 10 a.m. until noon for an overview of LDEQ's records in the EDMS, plus tips on how to locate documents.

Registration is required for the webinar through <http://deq.louisiana.gov/form/enviroschool-EDMS-training>.

The EnviroSchool program at LDEQ is the environmental education outreach arm of the agency that provides training for communities, businesses and other organizations on a number of regulatory topics. The goal of this program is for the attendees to become informed about the environmental regulatory process and to maintain and improve environmental compliance.

EnviroSchool workshops are free and open to the public, and LDEQ encourages those interested in registering for any of our upcoming workshops.

For more information, go to <http://deq.louisiana.gov/page/enviroschool> or email EnviroSchool at Enviroschool@la.gov.
