PROCEEDINGS UNDER THE LOUISIANA
ENVIRONMENTAL QUALITY ACT,

CONSOLIDATED
COMPLIANCE ORDER & NOTICE OF POTENTIAL PENALTY

The following CONSOLIDATED COMPLIANCE ORDER & NOTICE OF POTENTIAL PENALTY is issued to LOUISIANA DEPARTMENT OF TRANSPORTATION AND DEVELOPMENT (RESPONDENT) by the Louisiana Department of Environmental Quality (the Department), under the authority granted by the Louisiana Environmental Quality Act (the Act), La. R.S. 30:2001, et seq., and particularly by La. R.S. 30:2025(C), 30:2050.2 and 30:2050.3(B).

FINDINGS OF FACT

I.

The Respondent owns and/or operates Louisiana Department of Transportation and Development – US 190 Mississippi River Bridge maintenance project located at the District 61 Maintenance Yard under the US 190 Mississippi River Bridge (the Site). The Respondent is performing maintenance on the bridge which includes blasting activities to remove paint from the bridge followed by application of a new coating of paint. The Respondent notified the Department as a large quantity generator (LQG) of hazardous waste and operates under the EPA facility identification number LAR000060640.

II.

On or about December 1, 2016, and December 2, 2016, inspections of the Site conducted by a representative of the Department revealed the following violations:
A. The Respondent failed to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of the facility operation in an emergency, as specified in LAC 33:V.1511.F, in violation of LAC 33:V.1109.E.1.e. Specifically, the aisles in the less than 90-day container storage area were not sufficient for the movement of personnel and equipment. Some aisles were noted to have less than ten and a half (10.5) inches of aisle space.

B. The Respondent failed to keep hazardous waste containers at or near any point of generation where wastes initially accumulate closed during storage, except when necessary to add or remove hazardous waste, as specified in LAC 33:V.2107.A, in violation of LAC 33:V.1109.E.4. Specifically, at the time of the inspection, the following containers, managed as satellite accumulation, were open:
   a. Two (2) fifty-five (55) gallon drums of spent blasting waste (hazardous waste code D008) located in the West Reclaimer;
   b. Multiple five (5) gallon and three (3) gallon containers of hazardous waste ground debris (hazardous waste code D008) located west side of the bridge; and,
   c. Some of the five (5) gallon containers of hazardous waste spent solvent (hazardous waste codes F005, D001, and D028) near the paint reclamation unit in Area 1. However, these containers were closed by a facility representative at a later time during the inspection.

C. The Respondent failed to clearly label or mark hazardous waste containers at or near any point of generation where wastes initially accumulate with the words “Hazardous Waste” or with other words that identify the contents of the containers, in violation of LAC 33:V.1109.E.4. Specifically, at the time of the inspection, the following containers managed as satellite accumulation were not labeled with the words “Hazardous Waste:”
   1. Two (2) drums of spent blasting waste (hazardous waste code D008) located in the West Reclaimer;
2. One (1) fifty-five (55) gallon drum of spent blasting waste (hazardous waste code D008) from a screen filter for the reclamer located in the West Réclaimer;

3. One (1) fifty-five (55) gallon drum of hazardous waste ground debris (hazardous waste code D008) located on the west side of the river under the bridge;

4. Multiple five (5) gallon and three (3) gallon containers of hazardous waste ground debris (hazardous waste code D008) located on the west side of the river under the bridge; and,

5. Several five (5) gallon containers of hazardous waste spent solvent (hazardous waste codes F005, D001, and D028) near the paint reclamation unit in Area 1.

D. The Respondent failed to mark containers containing hazardous waste with an accumulation start date, in violation of LAC 33:V.1109.E.1.c. Specifically, three (3) fifty-five (55) gallon drums of hazardous waste (D008) in the less than 90-day container storage area were not marked with an accumulation start date at the time of the inspection. A facility representative marked the drums with an accumulation start date later during the inspection. This violation has been addressed.

E. The Respondent failed to clearly mark and/or label containers used to store used oil with the words "Used Oil," in violation of LAC 33:V.4013.D.1. Specifically, one (1) drum of used oil filters and two (2) drip pans of used oil in Area 1 were not labeled. However, a facility representative labeled these containers with the words "Used Oil" later during the inspection. This violation has been addressed.

F. The Respondent failed to keep a copy of each signed manifest for three (3) years or until a signed copy is received from the designated facility which received the waste in accordance with LAC 33:V.1107.D.1, in violation of LAC 33:V.1111.A.1. Specifically, at the time of the inspections, the Respondent did not have a signed copy from the designated treatment, storage, and disposal (TSD) facility for some of the manifests.

G. The Respondent failed to create and implement a contingency plan for the facility as specified in LAC 33:V.1513.A.1, in violation of LAC 33:V.1109.E.1.c. Specifically, the facility has comprehensive plans which contain some of the contents required to
be in the contingency plan; however, the plans did not include all the necessary requirements for a contingency plan.

H. The Respondent failed to develop and retain onsite a waste minimization plan certified by a Louisiana registered professional engineer, as specified in LAC 33: V.2245.J & K, in violation of LAC 33: V.1109.E.1.e. Specifically, the facility does not have a waste minimization plan. The facility has a similarly titled plan, but it only describes ways to minimize non-hazardous waste and recycling of that type of waste, not minimization in regard to hazardous waste.

I. The Respondent failed to conduct and implement a training program to ensure personnel who handle hazardous waste do so in accordance with regulatory procedure as specified in LAC 33: V.1515, in violation of LAC 33:1109.E.1.e. Specifically, training records were provided for safety and other types of training, but no training was conducted regarding hazardous waste. Additionally, one of the training plans included information regarding the management of hazardous waste; however, there was no record this was provided to employees.

J. The Respondent failed to submit a copy of the annual report to the Office of Environmental Services by March 1 of each year, in violation of LAC 33: V.1111.B.1. Specifically, the facility failed to submit an annual report for 2015.
