§905. Control Facilities to be Installed When Feasible.

A. Except as provided in Subsection B, to aid in controlling the overall levels of air contaminants into the atmosphere, air pollution control facilities should be installed whenever practically, economically, and technologically feasible. When facilities have been installed on a property, they shall be used and diligently maintained in proper working order whenever any emissions are being made which can be controlled by the facilities, even though the ambient air quality standards in affected areas are not exceeded.

B. Exemptions.

1. The provisions of Subsection A of this Section shall not apply when the controls are installed to comply with a regulation that explicitly limits the required use of the controls to specific circumstances or times.

2. The administrative authority may grant a written exemption to the owner or operator of the air pollution control facility.

   a. An exemption may be granted when the air pollution control facility has been installed, but not operated solely to comply with:

      i. a proposed federal or state regulation that has not been adopted and promulgated; or

      ii. a final federal or state regulation that has been vacated and remanded by a court of proper jurisdiction and is no longer effective.

   b. An exemption shall not authorize:

      i. the noncompliance with any limit, standard, or requirement otherwise provided in a permit or other regulation; or

      ii. a physical change or change in the method of operation of the facility that increases emissions.

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:2054.
HISTORICAL NOTE: Promulgated by the Department of Environmental Quality, Office of Air Quality and Nuclear Energy, Air Quality Division, LR 13:741 (December 1987), amended by the Office of the Secretary, Legal Division, LR 39:**.
