STEP 2: Requesting Access to NetDMR (for Data Providers)

3. In the upper left corner of the screen, above the NetDMR leaf logo, click Request Access.

4. Enter your permit number, including the LAG, LA, LAR, or LAP in front of the numbers. Click Update.

5. Click the dropdown box for Role and choose Edit. Click Add Request.

6. If you have more than one permit number, repeat steps 4 and 5 until you have added requests for all of your permit numbers.

7. Click Submit when you’ve entered requests for all of your permit numbers.

8. Review the information you provided and click Confirm. If something needs to be corrected, click Cancel and you will be directed back to the previous screen.

9. Notify the appropriate clients that your access requests have been completed. The Signatory or Permit Administrator for each permit number must approve your request(s) in their own NetDMR account.
