

EPA Region 6 Wastewater System Emergency Response Plan Workshop

Wednesday, August 23, 2023 · 9:00 AM - 12:00 PM Central
Thursday, August 24, 2023 · 9:00 AM - 12:00 PM Central

The U.S. EPA is sponsoring a free, virtual workshop to assist wastewater systems in Arkansas, Louisiana, Oklahoma, New Mexico, and Texas with updating or developing an Emergency Response Plan (ERP). This interactive workshop will be held over two sessions and provide wastewater system representatives with a broad overview of strategies, resources, plans, and procedures to prepare for and respond to an all-hazard incident. The workshop will also include wastewater system case studies, cybersecurity best practices, and an overview of EPA's [ERP Template for Wastewater Utilities](#). This will be a great opportunity to learn from subject matter experts and peers, and we encourage participants to bring their questions and comments.

Who Should Attend?

- Representatives from wastewater systems of all sizes.
- Vendors and consultants, especially those who are assisting wastewater systems in developing or updating their ERP.
- Other decision makers (e.g., town clerks, mayors) involved in developing or implementing ERPs.

Applications will be submitted for Region 6 state wastewater operators to receive continuing education hours for participating in this virtual workshop.
