

A Message from the Department of Environmental Quality's
Drinking Water Protection Team

Where Does Your Drinking Water Come From?

You go to get a drink of water out of the fountain after gym. You wake up thirsty in the middle of the night and fill a glass of water out of the kitchen faucet. But have you ever stopped to think about where that water actually comes from?

Your drinking water comes from surface water. Surface water is water from lakes, rivers, or streams. Pipes carry the water to your home or school. Sometimes water is stored in water towers. How does the water get to lakes and rivers? It is all part of the water cycle.

Color the Water Cycle

"Protect Your Water One Drop At A Time"

This is the first printing of this public document, published at a total cost of \$180.00 for 2000 copies by the Louisiana Department of Environmental Quality, P. O.
